THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks, and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data, (Catalogue Nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The indexes of Real Domestic Product by Industry (included with Catalogue Nos. carrying the prefix 61) provide "constant dollar" measures of the contribution of each industry to gross domestic product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue Nos. with prefix 14).

Both the Input-Output Tables and Indexes of Real Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics, and the legal entity is the main unit of classification of transactors. Also, provision is made in the System for incorporation of balance sheet (wealth) estimates when such data are sufficiently developed.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2, Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, l'explication des cadres théoriques et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels de revenu et de dépenses (publiés dans les bulletins dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance des paiements internationaux (numéros de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes de revenu et de dépenses.

Une nomenclature, sensiblement augmentée, d'industries et de biens et services figure dans les tableaux d'intrants et extrants (input-output) du système (numéro de catalogue commençant par 15). Les indices du produit intérieur réel par industrie (compris dans les publications dont les numéros de catalogue commencent par 61) mesurent, en "dollars constants", l'apport de chaque branche d'activité au produit intérieur brut au coût des facteurs. Un rapport est établi entre intrants et extrants dans les études de productivité (publications dont les numéros de catalogue commencent par 14).

L'établissement sert d'unité de base de la production industrielle tant dans les tableaux 'input-output' que dans les indices du produit intérieur réel. Les comptes de flux financiers (publications dont les numéros de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. En outre, le système a été conçu de façon à pouvoir incorporer les comptes de bilans (qui prennent pour objet le patrimoine) lorsque les données s'y rapportant seront suffisamment développées.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité légale que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données fondées, par exemple, sur l'établissement de manière à les faire correspondre aux données établies d'après la société ou l'entreprise.

Dans ses grandes lignes, le système de comptabilité nationale du Canada est étroitement relié à la norme internationale exposée dans la publication des Nations Unies — *Système de comptabilité nationale* (Études méthodologiques, série F, N° 2, Rev. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE RE: HISTORICAL CONTINUITY

On the 1971 base, a continuous record of Real Domestic Product and the Index of Industrial Production and their components may be obtained from the following Statistics Canada publications:

61-213 *Real Domestic Product by Industry (1971 = 100)*, 1971 - 1974 issue, for the 1971 - 1974 period.

61-005 *Indexes of Real Domestic Product by Industry*, the October 1975 issue and current issues for the period beginning January 1975.

The same data are available in the following CANSIM matrices:

Real Domestic Product (including the Index of Industrial Production)

	Matrix Numbers
Monthly	1122
Quarterly	1123
Annual	1124

For the period prior to 1971 the data are not available on a 1971 base. To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically rebased to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Real Domestic Product and the Index of Industrial Production and the component indexes required for linking to the 1971 based series may be obtained from the following Statistics Canada publications:

Indexes of Real Domestic Product by Industry - (1961 Base) Catalogue 61-506, for Real Domestic Product for the period from 1935 - 1960 and for the Index of Industrial Production for the period from 1919 - 1960.

Indexes of Real Domestic Product by Industry, 1961 - 1969, 1961 = 100, Catalogue 61-510, for the period from 1961 - 1967 except for certain industries, RDP and other aggregates listed in the annual supplement below.

Real Domestic Product by Industry, 1974 Supplement 1961 = 100; released with the March 1974 issue, Catalogue 61-005, incorporating revisions for the period from 1968 - 1971 and for the period 1961 - 1967 for certain industries and aggregates.

REMARQUES SUR LA CONTINUITÉ CHRONOLOGIQUE

Les publications de Statistique Canada sous mentionnées peuvent servir à établir une continuité du produit intérieur réel et de l'indice de la production industrielle et de leurs composantes sur la base 1971 = 100:

61-213 *Produit intérieur réel par industrie (1971 = 100)*, publication consacrée à la période 1971 - 1974.

61-005 *Indices du produit intérieur réel par industrie*, l'édition d'octobre 1975 et les publications courantes présentent des données pour la période commençant en janvier 1975.

On peut obtenir les mêmes données des matrices suivantes de CANSIM:

Produit intérieur réel (y compris l'indice de la production industrielle)

	Numéros de matrice
Mensuel	1122
Trimestriel	1123
Annuel	1124

En ce qui concerne les années antérieures à 1971, les données ne sont pas disponibles sur la base 1971 = 100. Pour obtenir une continuité des données de ces années, les indices sur la base 1961 = 100 doivent être convertis arithmétiquement à l'année de référence 1971 en les multipliant par 100.0 et en divisant le produit obtenu par la valeur de l'indice de 1971 sur la base de 1961 = 100. Dans le cas de 1971 et des années antérieures, le produit intérieur réel et l'indice de la production industrielle et des composantes nécessaires au raccordement avec les séries dont l'année de référence est 1971 peuvent être tirés des publications suivantes:

Indexes of Real Domestic Product by Industry - (1961 Base) n° 61-506 au catalogue, produit intérieur réel pour la période 1935 - 1960 et indice de la production industrielle pour la période 1919 - 1960.

Indices du produit intérieur réel, par industrie, 1961 - 1969, 1961 = 100, n° 61-510F au catalogue, la période 1961 - 1967 sauf pour certaines industries, le P.I.R. et d'autres agrégats qui paraissent dans le supplément annuel suivant:

Produit intérieur réel par industrie, Supplément 1974, 1961 = 100; paru dans l'édition de mars 1974 de la publication n° 61-005 au catalogue qui présente des révisions pour les périodes 1968 - 1971 et 1961 - 1967 pour certaines industries et agrégats.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following CANSIM matrices:

	Matrix Numbers
Real Domestic Product:	
Annual	383
Quarterly	15
Monthly	1421
Index of Industrial Production:

Catalogue 61-506 — Se reporter à cette publication, qui présente les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'ont entraîné l'application de la Classification type des industries de 1960 et l'adoption de l'année 1961 comme base de pondération et de référence.

Catalogue 61-510F — Se reporter à cette publication, qui contient les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'ont entraîné l'introduction du concept "d'activité totale", l'adoption du régime de pondération finale de 1961, l'incorporation des plus récents niveaux de production annuelle établis d'après le recensement, et l'introduction d'une méthodologie nouvelle.

Catalogue 61-213 — Se rapporter à cette publication, qui contient les remarques techniques concernant les changements du produit intérieur réel qui ont entraîné l'introduction de la C.A.É. de 1970 et l'adoption de l'année 1971 comme base de pondération et de référence.

SYMBOLS AND CODES

The interpretation of the symbols used in the tables throughout this publication is as follows:

- . . figures not available.
- nil or zero.
- amount too small to be expressed.

S.I.C. code: The Standard Industrial Classification code appearing in the tables should be interpreted as follows:

An S.I.C. Division is indicated by one of the integers 1 to 11.

An S.I.C. Major group within the Division is indicated by two digits following the Division code and separated from it by a colon.

A 3- or -4 digit industry class is indicated by 3 or 4 digits respectively.

CONTENT OF SPECIAL INDUSTRY GROUPINGS

The industry content of these special groupings is defined as follows:

Real Domestic Product less agriculture: All industries less agriculture (S.I.C. 2 to 11).

Goods-producing industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); construction industry (S.I.C. 6); and electric power, gas and water utilities (S.I.C. 7:04).

Goods-producing industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; 7:04).

Service-producing industries: Transportation, storage and communication (S.I.C. 7:01-03); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); community, business and personal service industries (S.I.C. 10); and public administration and defence (S.I.C. 11).

Commercial industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); construction industry (S.I.C. 6); transportation, storage and communication (S.I.C. 7:01-03) less highway and bridge maintenance (S.I.C. 516); electric power (S.I.C. 572); gas distribution (S.I.C. 574); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); related health care institutions (S.I.C. 822); offices of

SIGNES ET CODES CONVENTIONNELS

Voici la signification des signes et des codes conventionnels employés dans les tableaux:

- . . chiffre non disponible.
- néant ou zéro.
- chiffre infime.

Code C.A.É.: le code de la classification type des industries figurant aux tableaux doit être interprété comme suite:

Une branche de la C.A.É., est indiquée par un des nombres entiers de 1 à 11.

Un groupe de la C.A.É., à l'intérieur d'une branche, est indiqué par deux chiffres qui suivent le code de la branche et sont séparés de celui-ci par deux points (:).

Une classe d'industrie à 3 ou 4 chiffres est indiquée par 3 ou 4 chiffres respectivement.

INDUSTRIES RÉUNIES DANS CHAQUE AGRÉGAT SPÉCIAL

Énumération des industries composant chaque groupe spécial ci-après:

Produit intérieur réel, moins l'agriculture: Toutes les industries, moins l'agriculture (C.A.É. 2-11).

Industries productrices de biens: Agriculture (C.A.É. 1); forêts (C.A.É. 2); chasse et pêche (C.A.É. 3); mines (y compris le broyage), carrières et puits de pétrole (C.A.É. 4); industries manufacturières (C.A.É. 5); bâtiment et travaux publics (C.A.É. 6); et énergie électrique, gaz et eau (C.A.É. 7:04).

Industries productrices de biens, moins l'agriculture: Le total du groupement précédent, moins l'agriculture (C.A.É. 2-6; 7:04).

Industries productrices de services: Transports, entreposage et communications (C.A.É. 7:01-03); commerce (C.A.É. 10); administration publique et défense (C.A.É. 11).

Industries commerciales: Agriculture (C.A.É. 1); forêts (C.A.É. 2); chasse et pêche (C.A.É. 3); mines (y compris broyage), carrières et puits de pétrole (C.A.É. 4); industries manufacturières (C.A.É. 5); bâtiment et travaux publics (C.A.É. 6); transports, entreposage et communications (C.A.É. 7:01-03); moins l'entretien des routes et des ponts (C.A.É. 516); électricité (C.A.É. 572); distribution de gaz (C.A.É. 574); commerce (C.A.É. 8); finances, assurances et affaires immobilières (C.A.É. 9); établissements annexes de

physicians and surgeons (S.I.C. 823); offices of para-medical personnel (practitioners) (S.I.C. 824); offices of dentists (S.I.C. 825); diagnostic and therapeutic services n.e.s. (S.I.C. 826); miscellaneous health services (S.I.C. 827); amusement and recreation services (S.I.C. 10:04); services to business management (S.I.C. 10:05); personal services (S.I.C. 10:06) less private households (S.I.C. 873); accommodation and food services (S.I.C. 10:07); miscellaneous services (S.I.C. 10:08).

Commercial industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; part of 7; 8; part of 10).

Non-commercial industries: Highway and bridge maintenance (S.I.C. 516); water systems and other utilities (S.I.C. 576; 579); hospitals (S.I.C. 821); welfare organizations (S.I.C. 828); religious organizations (S.I.C. 831); private households (S.I.C. 873); education and related services (S.I.C. 10:01); and public administration and defence (S.I.C. 11).

Index of Industrial Production: Mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); and electric power, gas and water utilities (S.I.C. 7:04).

Note: 1. Due to rounding, sub-annual detail may not average annual level.

2. For RDP purposes the content of S.I.C. Division 7 has been altered to include only transportation, storage and communication; electric power, gas, water and other utilities are excluded and measured separately, as a component of the Index of Industrial Production.

soins sanitaires (C.A.É. 822); cabinets de médecin et de chirurgien (C.A.É. 823); cabinets de praticiens paramédicaux (C.A.É. 824); cabinets de dentiste (C.A.É. 825); services de diagnostic et de soins N.C.A. (C.A.É. 826); services de santé divers (C.A.É. 827); divertissements et loisirs (C.A.É. 10:04); services fournis aux entreprises (C.A.É. 10:05); services personnels (C.A.É. 10:06), moins ménages privés (C.A.É. 873); hébergement et restauration (C.A.É. 10:07); services divers (C.A.É. 10:07).

Industries commerciales, moins l'agriculture: Le total du groupe précédent, moins l'agriculture (C.A.É. 2-6; partie de 7; 8; 9 et partie de 10).

Industries non commerciales: Entretien des routes et des ponts (C.A.É. 516); distribution d'eau et autres services d'utilité publique (C.A.É. 576; 579); hôpitaux (C.A.É. 821); organismes de bien-être (C.A.É. 828); organisations culturelles (C.A.É. 831); ménages (C.A.É. 873); enseignement et services connexes (C.A.É. 10:01); administration publique et défense (C.A.É. 11).

Indice de la production industrielle: Mines (y compris le broyage), carrières et puits de pétrole (C.A.É. 4); industries manufacturières (C.A.É. 5); énergie électrique, gaz et eau (C.A.É. 7:04).

Nota: 1. En raison de l'arrondissement des chiffres, il se peut que la moyenne des données mensuelles et trimestrielles n'équivaille pas au niveau annuel.

2. Pour le calcul du produit intérieur brut, la division 7 de la classification type des industries a été modifiée de façon à inclure seulement les transports, l'entreposage et les communications. L'énergie électrique, le gaz, l'eau et les autres services d'utilité publique sont évalués séparément.

TECHNICAL NOTE

This report presents measures of Real Domestic Product (RDP) by industry for the 1971 - 1974 period on a 1971 time and weight base. It should also be noted that the 1970 Standard Industrial Classification is used in this publication. Underlying concepts and general methodology remain unchanged.

1971 Industry Weights

The 1971 industry weights introduced in this report are based on preliminary estimates of the industrial distribution of Gross Domestic Product for the year 1971. In deriving the industry weights, the latest available data from Statistics Canada censuses and annual surveys were used. It was also necessary to exploit sources such as company annual reports and taxation records, as well as operating ratios from other sources. The 1971 GDP distributions can be finalized only after detailed reconciliation of all components of the System of National Accounts following the completion of the 1971 Input-Output table. It is expected, however, that the industrial distribution will not be substantially changed, particularly for the higher aggregates.

As shown by the table below, service-producing industries increased their share of total GDP in 1971 as compared with 1961. This represents a continuation of a trend apparent between 1949 to 1961, the two previous weight base periods.

	1949	1961	1971
Goods-producing industries .	53.080	44.233	40.754
Service-producing industries .	46.920	55.767	59.246
Gross Domestic Product . . .	100.00	100.00	100.00

Annual Measures

Annual measures as distinct from monthly projectors have been calculated on a 1971 base for only the few industries for which annual survey data beyond 1972 were available. Additional annual levels will be incorporated into the monthly record at the time of the next annual publication. At that time additional industrial detail may be provided as well.

Monthly Measures

The monthly measures have been modified to reflect changes in available data. Average 1971 unit values were used to combine quantities of commodity outputs where these form the basis of projection. Monthly employment series used in the computation of the output measures have been mechanically rebased to 1971 in most instances, and will be revised later when they are fully converted to the 1970 S.I.C. and a 1971 base. Where deflated value series are used, price

NOTE TECHNIQUE

Cette publication présente des mesures du produit intérieur réel (P.I.R.) par industrie pour la période 1971 - 1974. Les bases de référence et de pondération de ces mesures sont celles de 1971. Il est à noter également que la Classification des activités économiques de 1970 est utilisée dans cette publication. Les concepts sous-jacents et la méthodologie générale n'ont pas changé.

Pondérations 1971 de l'industrie

Les pondérations 1971 de l'industrie présentées ici sont basées sur des estimations provisoires de la répartition industrielle du produit intérieur brut pour l'année 1971. Les dernières données disponibles des recensements et des enquêtes annuelles de Statistique Canada ont été utilisées pour établir ces pondérations. On s'est également servi d'autres données, comme les déclarations annuelles et les dossiers fiscaux des entreprises, et aussi des ratios d'exploitation provenant d'autres sources. Les répartitions du P.I.B. de 1971 ne pourront être calculées que lorsqu'on aura terminé le rapprochement détaillé de tous les éléments du système des comptes nationaux, une fois le tableau des entrées sorties de 1971 terminé. On s'attend, cependant, à ce que la répartition industrielle et en particulier les principaux agrégats, ne subissent pas de changements importants.

Comme l'indique le tableau ci-dessous, comparative-ment à 1961, les industries de services tiennent une place plus importante dans le P.I.B. total. Cette augmentation est la suite de la tendance apparue entre 1949 et 1961, les deux dernières années à servir de base aux pondérations.

	1949	1961	1971
Industries de biens	53.080	44.233	40.754
Industries de services	46.920	55.767	59.246
Produit intérieur brut	100.000	100.000	100.000

Mesures annuelles

Des mesures annuelles différentes des projections mensuelles n'ont été calculées sur la base 1971 = 100 que pour les quelques industries dont les données annuelles d'enquête avant 1972 étaient encore disponibles. Des niveaux annuels supplémentaires seront ajoutés aux données mensuelles dans le prochain numéro annuel de cette publication qui présentera peut-être également d'autres données sur les industries.

Mesures mensuelles

Les mesures mensuelles ont été modifiées de façon à prendre en compte les changements propres aux données disponibles. Des valeurs unitaires moyennes de 1971 ont été utilisées pour combiner les quantités produites lorsque ces dernières servaient de base aux projections. La plupart des séries mensuelles sur l'emploi utilisées dans le calcul des mesures de sorties ont été converties arithmétique-ment sur l'année de base 1971 et seront révisées lorsque toutes ces séries auront été alignées sur la C.A.É. de 1970

indexes used in the construction of deflators have been simply re-expressed on a 1971 time base.

As before the monthly measures have been level adjusted on the basis of the historical relationship between monthly projectors and annual measures. The seasonal adjustment factors have been revised for the 1971 - 1974 period.

Linking RDP on a 1971 base with RDP on a 1961 base

Subject to rounding errors, a linked series can be calculated between the 1961- and 1971-based RDP series which are identical under the 1960 and 1970 S.I.C.'s using the index values for 1971. For a 1971-based series, the 1961-based series should be multiplied by 100.0 and divided by the index value for 1971 for the series on the 1961 base. For a continuous series on a 1961 base, the 1971-based series should be multiplied by the index value for 1971 for the series on a 1961 base and divided by 100.0.

A table providing linkages between the 1961- and 1971-based series will be prepared and made available at a later date. The availability of this table will be announced in the *Statistics Canada Daily* and in the monthly publication (catalogue 61-005).

et l'année de référence 1971. Dans les cas où des séries de valeurs, après déflation, sont utilisées, les indices de prix servant à l'élaboration des indices de déflation ont tout simplement été reconvertis sur la base 1971 = 100.

Comme auparavant, les mesures mensuelles ont été ajustées sur la base de la relation chronologique qui existe entre les bases de projection mensuelles et les mesures annuelles. Par ailleurs, les facteurs saisonniers ont été révisés pour la période 1971 - 1974.

Raccordement du P.I.R. sur la base 1971 = 100 au P.I.R. sur la base 1961 = 100

Compte tenu des erreurs d'arrondissement, il est possible de calculer une série raccordée entre les séries du P.I.R. dont les années de référence sont 1961 et 1971 et qui ont la même définition dans la C.T.I. de 1960 et la C.A.É. de 1970 en utilisant la valeur des indices de 1971. Dans le cas d'une série 1971 = 100, il faut multiplier les séries 1961 = 100 par 100.0 et diviser le produit obtenu par la valeur de l'indice de 1971 pour la série dont l'année de référence est 1961. En ce qui concerne les séries continues dont l'année de référence est 1961, il faut multiplier la série 1971 = 100 par la valeur de l'indice de 1971 pour la série sur la base 1961 et diviser le produit obtenu par 100.0.

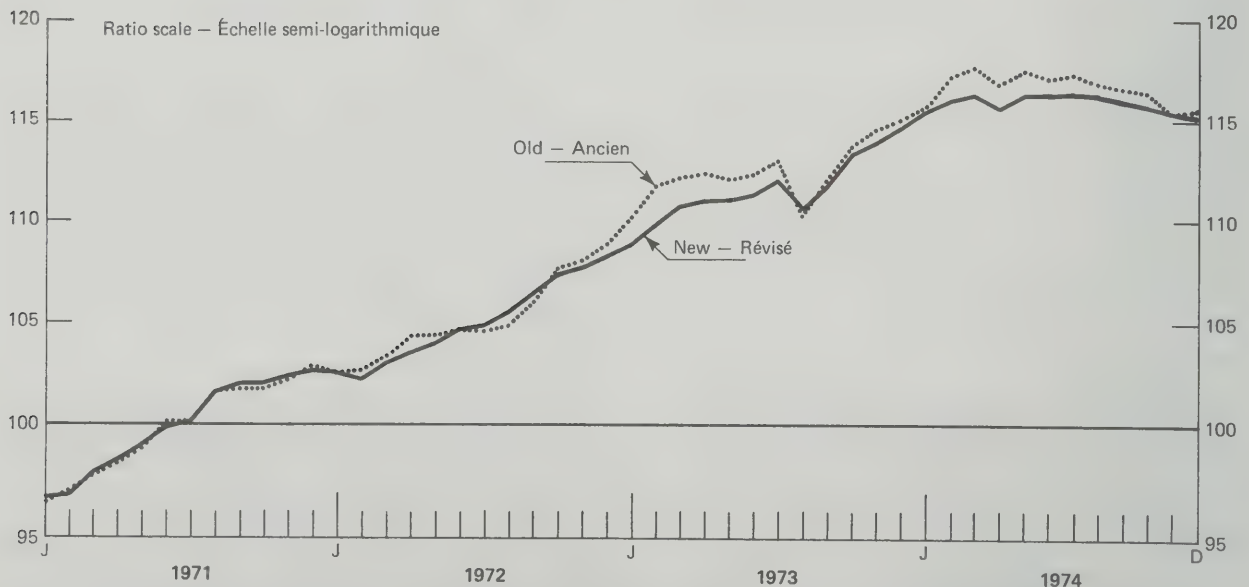

Un tableau présentant les raccordements entre les séries 1961 = 100 et 1971 = 100 sera préparé et publié à une date ultérieure qui sera annoncée dans le *Quotidien de Statistique Canada* et dans la publication mensuelle n° 61-005 au catalogue.

Comparison of Real Domestic Product Before and After Re-basing, by Months, 1971-74

(Seasonally Adjusted Quantity Indexes, 1971=100)

Comparaison du produit intérieur réel avant et après reversion, par mois, 1971-74

(Indices de quantité désaisonnalisées, 1971=100)

Footnote: The Index of Real Domestic Product on a 1961 base has been mechanically rebased to 1971 for purposes of this comparison.

Note: L'indice du produit intérieur réel a été mécaniquement reconverti de la base 1961 à celle de 1971 pour fins de cette comparaison.

Comparison of the 1961 and 1971 Based Series

The table below provides a comparison of year-to-year changes in a number of aggregate measures. For Real Domestic Product the growth rates are 3.8% for 1974, 6.3% for 1973 and 5.0% for 1972. Growth has been lowered for 1972 and 1973 and raised slightly for 1974.

As can be seen from the table, Real Domestic Product excluding agriculture has been altered in roughly the same pattern as Real Domestic Product. Goods-producing industries have changed only in 1973 while service-producing industries have changed in all three years.

The monthly seasonal movements have been altered as a result of revisions to seasonal factors, modification of some projectors, and the introduction of new weights. Seasonally adjusted Real Domestic Product is now smoother than in the previously published data.

The chart on page X provides a comparison of seasonally adjusted monthly RDP on the 1961 and 1971 bases.

Comparaison entre les séries 1961 = 100 et les séries 1971 = 100

Le tableau ci-dessous sert à comparer les changements annuels d'un certain nombre d'agrégats. Le taux de croissance du produit intérieur réel était de 3.8 % en 1974, 6.3 % en 1973 et 5.0 % en 1972. Il a été réduit pour 1972 et 1973 et légèrement augmenté pour 1974.

Comme le tableau l'indique, le produit intérieur réel sans l'agriculture a été modifié en gros de la même façon que le produit intérieur réel. Les séries relatives aux industries de biens n'ont été modifiées que pour 1973, tandis que celles des industries de services l'ont été pour les trois années observées.

Les variations mensuelles désaisonnalisées ont changées à la suite de la révision des facteurs saisonniers, de la modification de certaines bases de projection et de l'introduction de nouvelles pondérations. La courbe du produit intérieur réel après désaisonnalisation est maintenant plus lisse.

Le graphique, page X, permet de comparer le P.I.R. mensuel après désaisonnalisation basé sur les séries 1961 = 100 et sur celles dont l'année référence est 1971.

Year-to-year Percentage Changes in Major Aggregates on a 1961 Base and on a 1971 Base

Variations annuelles en pourcentage des principaux agrégats sur la base de 1961 et sur la base de 1971

		1972	1973	1974
Real Domestic Product – Produit intérieur réel.	1971 = 100	5.0	6.3	3.8
	1961 = 100	5.2	6.9	3.7
Real Domestic Product excluding agriculture – Produit intérieur réel sans l'agriculture.	1971 = 100	5.5	6.5	4.0
	1961 = 100	5.8	7.1	4.0
Ind. of industrial prod. – Indice de la production industrielle.	1971 = 100	7.0	8.3	2.7
	1961 = 100	6.9	8.3	2.5
Goods - producing industries – Industries productrices de biens.	1971 = 100	4.7	7.2	1.4
	1961 = 100	4.7	7.8	1.4
Service - producing industries – Industries productrices de services.	1971 = 100	5.3	5.6	5.4
	1961 = 100	5.8	6.0	5.5
Non-commercial industries – Industries non commerciales.	1971 = 100	3.2	3.1	3.6
	1961 = 100	3.5	4.4	3.9
Commercial industries – Industries commerciales.	1971 = 100	5.4	7.0	3.8
	1961 = 100	5.5	7.2	3.7

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks, and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data, (Catalogue Nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and on services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The indexes of Real Domestic Product by Industry (included the Catalogue Nos. carrying the prefix 61) provide "constant dollar" measures of the contribution of each industry to gross domestic product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue Nos. with prefix 14).

Both the Input-Output Tables and Indexes of Real Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics, and the legal entity is the main unit of classification of transactors. Also, provision is made in the System for incorporation of balance sheet (wealth) estimates when such data are sufficiently developed.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature, sensiblement augmentée, d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les indices du produit intérieur réel par industrie (compris dans les publications dont le numéro de catalogue commence par 61) mesurent, en dollars constants, l'apport de chaque branche d'activité au produit intérieur brut au coût des facteurs. Un rapport est établi entre entrées et sorties dans les études de productivité (publications dont le numéro de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les indices du produit intérieur réel. Les comptes de flux financiers (publications dont le numéro de catalogue commence par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. En outre, le système a été conçu de façon à pouvoir incorporer les comptes de bilans (qui prennent pour objet le patrimoine) lorsque les données s'y rapportant seront suffisamment développées.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque

Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, "A system of National Accounts" (studies in Methods, Series F, No. 2, Rev. 3, Statistical Office Department of Economic and Social Affairs, United Nations, New York, 1968).

les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données, par exemple, sur l'établissement de manière à les faire correspondre aux données établies d'après la société ou l'entreprise.

Dans ses grandes lignes, le système de comptabilité nationale du Canada est étroitement relié à la norme internationale exposée dans la publication des Nations Unies intitulée Système de comptabilité nationale (Études méthodologiques, série F, n° 2, Rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE RE: HISTORICAL CONTINUITY

On the 1971 base, a continuous record of Real Domestic Product and the Index of Industrial Production and their components may be obtained from the following Statistics Canada publications:

61-213 *Real Domestic Product by Industry (1971 = 100)*, 1971-1975 issue, for the 1971-1975 period.

61-005 *Indexes of Real Domestic Product by Industry*, the July 1976 issue and current issues for the period beginning January 1976.

The same data are available in the following CANSIM matrices:

Real Domestic Product (including the Index of Industrial Production)

	Matrix numbers
Monthly	1122
Quarterly	1123
Annual	1124

For the period prior to 1971 the data are not available on a 1971 base. To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically rebased to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Real Domestic Product and the Index of Industrial Production and the component indexes required for linkage to the 1971 based series may be obtained from the following Statistics Canada publications:

Indexes of Real Domestic Product by Industry - (1961 Base) Catalogue 61-506, for Real Domestic Product for the period from 1935-1960 and for the Index of Industrial Production for the period from 1919-1960.

Indexes of Real Domestic Product by Industry, 1969-1969, 1961 = 100, Catalogue 61-510, for the period from 1961-1967 except for certain industries, RDP and other aggregates listed in the annual supplement below.

Real Domestic Product by Industry, 1974 Supplement 1961 = 100; released with the March 1974 issue, Catalogue 61-995, incorporating revisions for the period from 1968-1971 and for the period 1961-1967 for certain industries and aggregates.

REMARQUES SUR LA CONTINUITÉ CHRONOLOGIQUE

Les publications de Statistique Canada sous mentionnées peuvent servir à établir une continuité du produit intérieur réel et de l'indice de la production industrielle et de leurs composantes sur la base 1971 = 100:

61-213 *Produit intérieur réel par industrie (1971 = 100)*, publication consacrée à la période 1971-1975.

61-005 *Indices du produit intérieur réel par industrie*, l'édition de juillet 1976 et les publications courantes présentent des données pour la période commençant en janvier 1976.

On peut obtenir les mêmes données des matrices suivantes de CANSIM:

Produit intérieur réel (y compris l'indice de la production industrielle)

	Numéros de matrice
Mensuel	1122
Trimestriel	1123
Annuel	1124

En ce qui concerne les années antérieures à 1971, les données ne sont pas disponibles sur la base 1971 = 100. Pour obtenir une continuité des données de ces années, les indices sur la base 1961 = 100 doivent être convertis arithmétiquement à l'année de référence 1971 en les multipliant par 100.0 et en divisant le produit obtenu par la valeur de l'indice de 1971 sur la base de 1961 = 100. Dans le cas de 1971 et des années antérieures, le produit intérieur réel et l'indice de la production industrielle et des composantes nécessaires au raccordement avec les séries dont l'année de référence est 1971 peuvent être tirés des publications suivantes:

Indexes of Real Domestic Product by Industry - (1961 Base) n° 61-506 au catalogue, produit intérieur réel pour la période 1935-1960 et indice de la production industrielle pour la période 1919-1960.

Indices du produit intérieur réel, par industrie, 1961-1969, 1961 = 100, n° 61-510F au catalogue, la période 1961-1967 sauf pour certaines industries, le P.I.R. et d'autres agrégats qui paraissent dans le supplément annuel suivant:

Produit intérieur réel par industrie, Supplément 1974, 1961 = 100; paru dans l'édition de mars 1974 de la publication n° 61-005 au catalogue qui présente des révisions pour les périodes 1968-1971 et 1961-1967 pour certaines industries et agrégats.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following CANSIM matrices:

	Matrix Numbers
Real Domestic Product:	
Annual	383
Quarterly	15
Monthly	1421
Index of Industrial Production:	
Annual	384
Monthly	16

Des données de raccordement peuvent être obtenues pour 1971 et les années antérieures des matrices suivantes de CANSIM:

	Numéros de matrice
Produit intérieur réel:	
Annuel	383
Trimestriel	15
Mensuel	1421
Indice de la production industrielle:	
Annuel	384
Mensuel	16

CONCEPTS, SOURCES AND METHODS

SYMBOLS AND CODES

The interpretation of the symbols used in the tables throughout this publication is as follows:

- . . figures not available.
- nil or zero.
- amount too small to be expressed.

S.I.C. code: The Standard Industrial Classification code appearing in the tables should be interpreted as follows:

An S.I.C. Division is indicated by one of the integers 1 to 11.

An S.I.C. Major group within the Division is indicated by two digits following the Division code and separated from it by a colon.

A 3- or 4- digit industry class is indicated by 3 or 4 digits respectively.

CONTENT OF SPECIAL INDUSTRY GROUPINGS

The industry content of these special groupings is defined as follows:

Real Domestic Product less agriculture: All industries less agriculture (S.I.C. 2 to 11).

Goods-producing industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); construction industry (S.I.C. 6); and electric power, gas and water utilities (S.I.C. 7:04).

Goods-producing industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; 7:04).

Service-producing industries: Transportation, storage and communication (S.I.C. 7:01-03); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); community, business and personal service industries (S.I.C. 10); and public administration and defence (S.I.C. 11).

Commercial industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); construction industry (S.I.C. 6); transportation, storage and communication (S.I.C. 7:01-03) less highway and bridge maintenance (S.I.C. 516); electric power (S.I.C. 572); gas distribution (S.I.C. 574); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); related health care institutions (S.I.C. 822); offices of

SIGNES ET CODES CONVENTIONNELS

Voici la signification des signes et des codes conventionnels employés dans les tableaux:

- . . chiffre non disponible.
- néant ou zéro.
- chiffre infime.

Code C.A.É.: le code de la classification type des industries figurant aux tableaux doit être interprété comme suite:

Une branche de la C.A.É., est indiquée par un des nombres entiers de 1 à 11.

Un groupe de la C.A.É., à l'intérieur d'une branche, est indiqué par deux chiffres qui suivent le code de la branche et sont séparés de celui-ci par deux points (:).

Une classe d'industrie à 3 ou 4 chiffres est indiquée par 3 ou 4 chiffres respectivement.

INDUSTRIES RÉUNIES DANS CHAQUE AGRÉGAT SPÉCIAL

Énumération des industries composant chaque groupe spécial ci-après:

Produit intérieur réel, moins l'agriculture: Toutes les industries, moins l'agriculture (C.A.É. 2-11).

Industries productrices de biens: Agriculture (C.A.É. 1); forêts (C.A.É. 2); chasse et pêche (C.A.É. 3); mines (y compris le broyage), carrières et puits de pétrole (C.A.É. 4); industries manufacturières (C.A.É. 5); bâtiment et travaux publics (C.A.É. 6); et énergie électrique, gaz et eau (C.A.É. 7:04).

Industries productrices de biens, moins l'agriculture: Le total du groupement précédent, moins l'agriculture (C.A.É. 2-6; 7:04).

Industries productrices de services: Transports, entreposage et communications (C.A.É. 7:01-03); commerce (C.A.É. 10); administration publique et défense (C.A.É. 11).

Industries commerciales: Agriculture (C.A.É. 1); forêts (C.A.É. 2); chasse et pêche (C.A.É. 3); mines (y compris broyage), carrières et puits de pétrole (C.A.É. 4); industries manufacturières (C.A.É. 5); bâtiment et travaux publics (C.A.É. 6); transports, entreposage et communications (C.A.É. 7:01-03); moins l'entretien des routes et des ponts (C.A.É. 516); électricité (C.A.É. 572); distribution de gaz (C.A.É. 574); commerce (C.A.É. 8); finances, assurances et affaires immobilières (C.A.É. 9); établissements annexes de

physicians and surgeons (S.I.C. 823); offices of para-medical personnel (practitioners) (S.I.C. 824); offices of dentists (S.I.C. 825); diagnostic and therapeutic services n.e.s. (S.I.C. 826); miscellaneous health services (S.I.C. 827); amusement and recreation services (S.I.C. 10:04); services to business management (S.I.C. 10:05); personal services (S.I.C. 10:06) less private households (S.I.C. 873); accommodation and food services (S.I.C. 10:07); miscellaneous services (S.I.C. 10:08).

Commercial industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; part of 7; 8; part of 10).

Non-commercial industries: Highway and bridge maintenance (S.I.C. 516); water systems and other utilities (S.I.C. 576; 579); hospitals (S.I.C. 821); welfare organizations (S.I.C. 828); religious organizations (S.I.C. 831); private households (S.I.C. 873); education and related services (S.I.C. 10:01); and public administration and defence (S.I.C. 11).

Index of Industrial Production: Mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); and electric power, gas and water utilities (S.I.C. 7:04).

Note: 1. Due to rounding, sub-annual detail may not average annual level.

2. For RDP purposes the content of S.I.C. Division 7 has been altered to include only transportation, storage and communication; electric power, gas, water and other utilities are excluded and measured separately, as a component of the Index of Industrial Production.

soins sanitaires (C.A.É. 822); cabinets de médecin et de chirurgien (C.A.É. 823); cabinets de praticiens paramédicaux (C.A.É. 824); cabinets de dentiste (C.A.É. 825); services de diagnostic et de soins N.C.A. (C.A.É. 826); services de santé divers (C.A.É. 827); divertissements et loisirs (C.A.É. 10:04); services fournis aux entreprises (C.A.É. 10:05); services personnels (C.A.É. 10:06), moins ménages privés (C.A.É. 873); hébergement et restauration (C.A.É. 10:07); services divers (C.A.É. 10:07).

Industries commerciales, moins l'agriculture: Le total du groupe précédent, moins l'agriculture (C.A.É. 2-6; partie de 7; 8; 9 et partie de 10).

Industries non commerciales: Entretien des routes et des ponts (C.A.É. 516); distribution d'eau et autres services d'utilité publique (C.A.É. 576; 579); hôpitaux (C.A.É. 821); organismes de bien-être (C.A.É. 828); organisations culturelles (C.A.É. 831); ménages (C.A.É. 873); enseignement et services connexes (C.A.É. 10:01); administration publique et défense (C.A.É. 11).

Indice de la production industrielle: Mines (y compris le broyage), carrières et puits de pétrole (C.A.É. 4); industries manufacturières (C.A.É. 5); énergie électrique, gaz et eau (C.A.É. 7:04).

Nota: 1. En raison de l'arrondissement des chiffres, il se peut que la moyenne des données mensuelles et trimestrielles n'équivaille pas au niveau annuel.

2. Pour le calcul du produit intérieur réel, la division 7 de la classification type des activités économiques a été modifiée de façon à inclure seulement les transports, l'entreposage et les communications. L'énergie électrique, le gaz, l'eau et les autres services d'utilité publique sont évalués séparément.

TECHNICAL NOTE

This report presents measures of Real Domestic Product (RDP) by industry for the 1971-1975 period on a 1971 time and weight base. It should also be noted that the 1970 Standard Industrial Classification is used in this publication. Underlying concepts and general methodology remain unchanged.

1971 Industry Weights

The 1971 industry weights are unchanged from the previous annual publication. They are based on preliminary estimates of the industrial distribution of Gross Domestic Product for the year 1971. In deriving the industry weights, the latest available data from Statistics Canada censuses and annual surveys were used. It was also necessary to exploit sources such as company annual reports and taxation records, as well as operating ratios from other sources. The 1971 GDP distributions can be finalized only after detailed reconciliation of all components of the System of National Accounts following the completion of the 1971 Input-Output table. It is expected, however, that the industrial distribution will not be substantially changed, particularly for the higher aggregates.

As shown by the table below, service-producing industries increased their share of total GDP in 1971 as compared with 1961. This represents a continuation of a trend apparent between 1949 to 1961, the two previous weight base periods.

	1949	1961	1971
Goods-producing industries — Industries de biens . .	53.080	44.233	40.754
Service-producing industries — Industries de services	46.920	55.767	59.246
Gross domestic product — Produit intérieur brut . . .	100.000	100.000	100.000

Annual Measures

Annual measures as distinct from monthly projectors have been calculated for a number of additional industries. Data from the Census of Merchandising and Services have been used to make trend adjustments to a number of series. In addition the deflators for wholesale and retail trade have been modified by expanding the number of prices used and the working levels for deflation. For retail trade the base year weights have been changed to incorporate more recent information.

NOTE TECHNIQUE

Cette publication présente des mesures du produit intérieur réel (P.I.R.) par industrie pour la période 1971-1975. Les bases de référence et de pondération de ces mesures sont celles de 1971. Il est à noter également que la Classification des activités économiques de 1970 est utilisée dans cette publication. Les concepts sous-jacents et la méthodologie générale n'ont pas changé.

Pondérations 1971 de l'industrie

Les pondérations 1971 de l'industrie sont les mêmes que celles utilisées dans la publication annuelle précédente. Elles sont basées sur des estimations provisoires de la répartition industrielle du produit intérieur brut pour l'année 1971. Les dernières données disponibles des recensements et des enquêtes annuelles de Statistique Canada ont été utilisées pour établir ces pondérations. On s'est également servi d'autres données, comme les déclarations annuelles et les dossiers fiscaux des entreprises, et aussi des ratios d'exploitation provenant d'autres sources. Les répartitions du P.I.B. de 1971 ne pourront être calculées que lorsqu'on aura terminé le rapprochement détaillé de tous les éléments du système des comptes nationaux, une fois le tableau des entrées sorties de 1971 terminé. On s'attend, cependant, à ce que la répartition industrielle et en particulier les principaux agrégats, ne subissent pas de changements importants.

Comme l'indique le tableau ci-dessous, comparative-ment à 1961, les industries de services tiennent un place plus importante dans le P.I.B. total. Cette augmentation est la suite de la tendance apparue entre 1949 et 1961, les deux dernières années à servir de base aux pondérations.

Mesures annuelles

Des mesures annuelles différentes des projections mensuelles ont été calculées pour un plus grand nombre d'industries. On utilisa les données du recensement du commerce et des services pour fins d'ajustement de tendance à de nombreuses séries. De plus, on modifia les déflateurs utilisés dans le commerce de gros et le commerce de détail en augmentant le nombre de prix utilisés et les niveaux de calcul de déflation. Les pondérations de base pour le commerce de détail furent modifiées suite à l'incorporation d'informations plus récentes.

Monthly Measures

The monthly measures are changed to reflect revisions in the projectors, incorporation of the revised annual data and revisions to seasonal factors. For some industries, the methodology has been changed and some further refinements have been made to the 1971 base year unit values used to combine quantities of commodity outputs.

Comparison of the Revised and Unrevised Series

The table below provides a comparison of year-to-year changes in revised and unrevised data for a number of aggregates. For RDP as a whole, the major revision is to 1973 with about equal changes for both goods and services. Real Domestic Product excluding agriculture shows a similar pattern of revision for 1972 and 1973 but is revised upwards more in 1974 than total RDP and less for 1975.

Mesures mensuelles

Les changements dans les mesures mensuelles proviennent de révisions dans les indicateurs, de l'introduction de données annuelles révisées et de révisions dans les facteurs saisonniers. Pour certaines industries, on changea la méthodologie et certaines améliorations furent apportées aux valeurs unitaires de l'année de base 1971 utilisées pour pondérer les quantités dans les indicateurs de production de marchandises.

Comparaison entre les séries révisées et non révisées

Le tableau ci-dessous sert à comparer les changements annuels des données révisées et non révisées pour un certain nombre d'agrégats. Pour l'ensemble du P.I.R., la plus forte révision, également partagée entre les biens et les services, survient en 1973. Le produit intérieur réel sans l'agriculture montre un comportement similaire de révisions pour 1972 et 1973, mais une révision à la hausse plus forte en 1974 et moins forte que le P.I.R., pour 1975.

TABLE 1. Year-to-year Percentage Changes in Real Domestic Product and Major Aggregates
TABLEAU 1. Variations annuelles en pourcentage du produit intérieur réel et des principaux agrégats

	1972	1973	1974	1975
Real Domestic Product – Produit intérieur réel:				
Revised – Révisé	5.2	7.0	4.2	0.3
Unrevised – Non révisé	5.0	6.3	3.8	– 0.1
Real Domestic Product excluding agriculture – Produit intérieur réel sans l'agriculture:				
Revised – Révisé	5.8	7.1	4.7	0.2
Unrevised – Non révisé	5.5	6.5	4.0	0.0
Index of industrial production – Indice de la production industrielle:				
Revised – Révisé	7.0	9.0	2.9	– 4.6
Unrevised – Non révisé	7.0	8.3	2.7	– 4.5
Good-producing industries – Industries productrices de biens:				
Revised – Révisé	4.5	8.1	2.0	– 3.3
Unrevised – Non révisé	4.7	7.2	1.4	– 4.3
Service-producing industries – Industries productrices de services:				
Revised – Révisé	5.6	6.3	5.7	2.8
Unrevised – Non révisé	5.3	5.6	5.4	2.7
Non-commercial industries – Industries non commerciales:				
Revised – Révisé	3.1	3.4	3.6	3.5
Unrevised – Non révisé	3.2	3.1	3.6	3.7
Commercial industries – Industries commerciales:				
Revised – Révisé	5.6	7.9	4.4	– 0.3
Unrevised – Non révisé	5.4	7.0	3.8	– 0.9

Linking RDP on a 1971 base with RDP on a 1961 base

Subject to rounding errors, a linked series can be calculated between the 1961- and 1971-based RDP series which are identical under the 1960 and 1970 S.I.C.'s using the index values for 1971. For a 1971-based series, the 1961-based series should be multiplied by 100.0 and divided by the index value for 1971 for the series on the 1961 base. For a continuous series on a 1961 base, the 1971-based series should be multiplied by the index value for 1971 for the series on a 1961 base and divided by 100.0.

A table providing linkages between the 1961- and 1971-based series will be prepared and made available at a later date. The availability of this table will be announced in the *Statistics Canada Daily* and in the monthly publication (Catalogue 61-005).

Raccordement du P.I.R. sur la base 1971 = 100 au P.I.R. sur la base 1961 = 100

Compte tenu des erreurs d'arrondissement, il est possible de calculer une série raccordée entre les séries du P.I.R. dont les années de référence sont 1961 et 1971 et qui ont la même définition dans la C.T.I. de 1960 et la C.A.E. de 1970 en utilisant la valeur des indices de 1971. Dans le cas d'une série 1971 = 100, il faut multiplier les séries 1961 = 100 par 100.0 et diviser le produit obtenu par la valeur de l'indice de 1971 pour la série dont l'année de référence est 1961. En ce qui concerne les séries continues dont l'année de référence est 1961, il faut multiplier la série 1971 = 100 par la valeur de l'indice de 1971 pour la série sur la base 1961 et diviser le produit obtenu par 100.0.

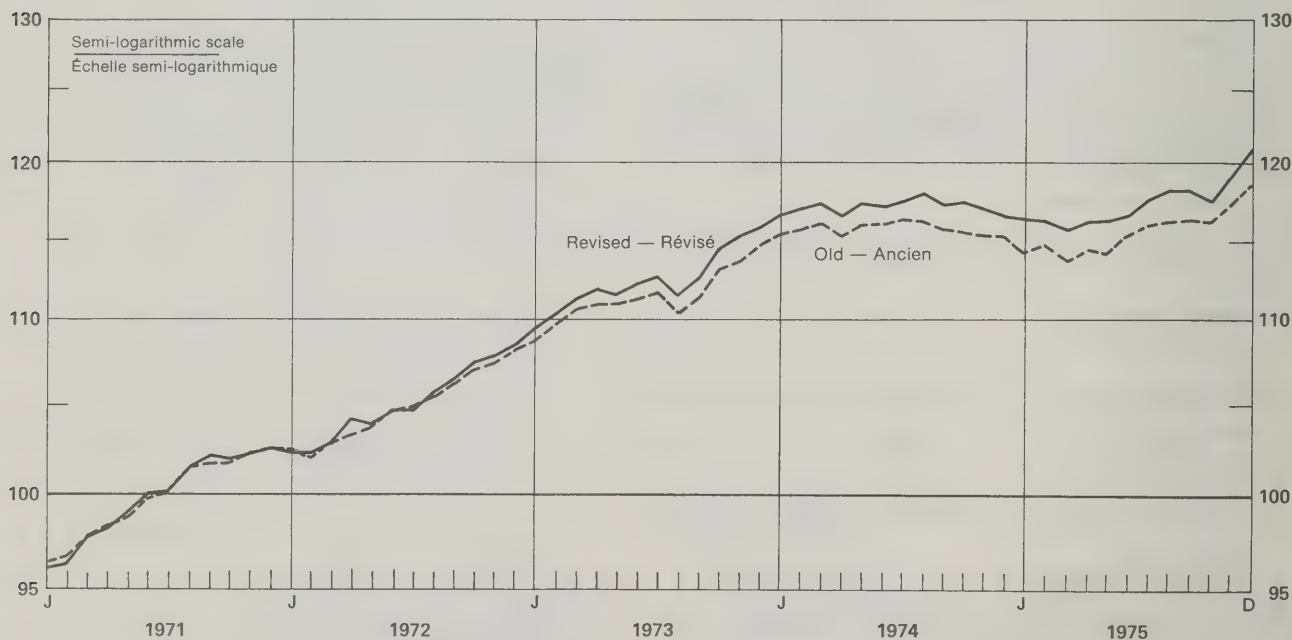

Un tableau présentant les raccordements entre les séries 1961 = 100 et 1971 = 100 sera préparé et publié à une date ultérieure qui sera annoncée dans le *Quotidien de Statistique Canada* et dans la publication mensuelle n° 61-005 au catalogue.

Comparison of Real Domestic Product Before and After Revision, by Months, 1971-75

(Seasonally Adjusted Quantity Indexes, 1971=100)

Comparaison du produit intérieur réel avant et après révision, par mois, 1971-75

(Indices de quantité désaisonnalisés, 1971=100)

Review of 1971 - 1975

The Canadian economy grew strongly in 1972 and 1973, moderately in 1974 and marginally in 1975. The non-agricultural economy recorded slightly higher growth rates. Most of the strength in the early years and the weakness in the economy in the later years is attributable to the goods-producing industries. The service-producing industries show a similar growth pattern to the goods-producing industries but of a smaller amplitude. Total employment according to the Labor Force Survey grew more slowly than output for 1972 to 1974.

Revue de 1971 - 1975

L'économie canadienne s'accrut fortement en 1972 et 1973, modérément en 1974 et quelque peu en 1975. L'ensemble de l'économie sans l'agriculture enregistra des taux de croissance un peu plus élevés. Presque toute la vigueur de l'économie au cours des premières années et le ralentissement au cours des dernières années proviennent surtout des industries productrices de biens. Les industries productrices de services présentent une tendance de croissance similaire aux industries productrices de biens, mais dans une amplitude moindre. Le nombre total des employés d'après l'enquête sur la population active s'est accru moins vite que la production de 1972 à 1974.

TABLE 2. Year-to-year Percentage Changes of the Labor Force Survey
TABLERAU 2. Variations annuelles en pourcentage de l'enquête sur la population active

	1972	1973	1974	1975
Labour force — Population active	3.0	4.4	4.1	4.1
Employed — Nombre d'employés	3.1	5.2	4.3	2.5
Unemployed — Nombre de chômeurs	1.8	— 7.5	1.0	32.8
Unemployment rate — Taux de chômage	6.3	5.6	5.4	6.9

Total employment in 1975 grew only 2.5% reflecting the slowdown in the economy. As a result the unemployment rate increased to 6.9%. The changes in employment and output are given below for selected industries.

Le nombre total des employés s'accrut seulement de 2.5 % en 1975, reflétant le ralentissement de l'économie. Par conséquent, le taux de chômage monta à 6.9 %. Les variations dans l'emploi et la production pour des industries choisies sont présentées ci-dessous.

TABLE 3. Year-to-year Percentage Changes in Output and Employment¹ for Selected Industries
 TABLEAU 3. Variations annuelles en pourcentage de la production et de l'emploi¹ pour des industries choisies

	1972	1973	1974	1975
Total economy excluding agriculture – Ensemble de l'économie sans l'agriculture:				
Output – Production	5.8	7.2	4.6	0.1
Employment – Emploi	3.7	5.7	4.5	1.9
Manufacturing – Industries manufacturières:				
Output – Production	7.0	8.6	3.0	- 4.8
Employment – Emploi	3.5	6.0	2.8	- 3.6
Construction – Bâtiment et travaux publics:				
Output – Production	2.6	5.3	4.4	0.1
Employment – Emploi	1.2	9.6	8.9	1.2
Transportation, storage and communication – Transports, entreposage et communications:				
Output – Production	6.8	8.1	6.5	1.1
Employment – Emploi	4.0	5.9	2.2	2.0
Trade – Commerce:				
Output – Production	8.9	7.9	6.7	0.4
Employment – Emploi	6.0	6.2	5.1	3.7

¹ The Labour Force Survey. – L'enquête sur la population active.

Over the 1971 to 1973 period the strength in output came from a variety of sources, strong consumer demand particularly for durables, strong export demand for some commodities, and strong increases in residential construction. The weakness in the 1974 and to greater extent in 1975 is traceable to these same sources and to reduced demand for energy as a result of rising prices and conservation efforts.

The wood industries and pulp and paper have been affected by several factors over the period. Residential construction increased strongly in 1972 and 1973 and fell in 1974 and 1975. Export demand for forest products levelled off in 1974 and decreased by more than 20% in 1975. There were a number of strikes in the forest industries in 1972 and in the pulp and paper industry in 1975.

Au cours de la période 1971 à 1973, la vigueur de la production provient de diverses sources: une demande des consommateurs plus forte, particulièrement pour les biens durables, une demande extérieure forte pour certaines marchandises et des gains vigoureux de la construction domiciliaire. Ces mêmes sources en plus d'une demande réduite d'énergie suite aux hausses de prix et aux efforts de conservation causèrent le ralentissement en 1974 et surtout en 1975.

Plusieurs facteurs ont frappé les industries du bois et des pâtes et papiers au cours de la période. La construction domiciliaire s'accrut fortement en 1972 et en 1973 et chuta en 1974 et 1975. La demande extérieure pour les produits forestiers se stabilisa en 1974 pour ensuite diminuer de plus de 20 % en 1975. Plusieurs grèves frappèrent l'industrie forestière en 1972 de même que l'industrie des pâtes et papiers en 1975.

TABLE 4. Forest Products Industries and Associated Series
TABLEAU 4. Industries des produits forestiers et séries connexes

	Annual percentage changes – Variations annuelles en pourcentage			
	1972	1973	1974	1975
Forestry – Forêts	2.4	19.2	– 2.0	– 18.5
Manufacturing – Industries manufacturières:				
Sawmills – Scieries	8.4	8.2	– 9.8	– 17.0
Veneer and plywood – Placages et contre-plaqués	4.3	9.9	– 14.7	0.1
Pulp and paper – Pâtes et papiers	9.1	6.9	6.0	– 24.0
Furniture and fixtures – Meubles et accessoires d'ameublement	15.5	8.1	0.6	– 11.8
Construction – Bâtiment et travaux publics:				
Residential – Construction domiciliaire	10.2	7.9	– 4.0	– 13.7
United States fixed capital investment in residential construction ¹ – Investissement de capital fixe dans la construction domiciliaire aux États-Unis ¹	18.8	– 3.3	– 25.6	– 18.1
Exports – Exportations:				
Volume index of forest product exports ² – In- dice volumétrique des exportations de produits forestiers ²	8.2	4.3	0.4	– 21.9

³ Exports by Commodities – Exportations par marchandises.

The industries most closely related to residential construction, such as sawmills, veneer and plywood, and furniture and fixtures, all grew sharply in 1972 and 1973, decreased or grew less strongly in 1974 and declined in 1975. The slower growth in veneer and plywood mills in 1972 is attributable to the strike in forestry in British Columbia where the industry is concentrated. Pulp and paper output increased due mainly to increased export demand during the 1971 to 1974 period for pulp and to a lesser extent newsprint. Residential construction in the U.S. has been declining since 1973, reducing exports of forest products.

The construction-oriented industries which include the wood industries are displayed in Table 5. Most of these industries display some reduction in the rate of growth in 1974 in comparison to 1972 and 1973 and most decrease further in 1975.

Les industries les plus reliées à la construction domiciliaire, comme les scieries, les fabriques de placages et de contre-plaqués, l'industrie du meuble et des articles d'ameublement, ont toutes connu des gains importants en 1972 et 1973, ont diminué ou se sont accrues moins fortement en 1974 et ont diminué en 1975. La faible croissance des fabriques de placages et contre-plaqués en 1972 fut causée par les grèves dans l'industrie forestière en Colombie-Britannique où elle est concentrée. La production des pâtes et papiers s'accrut surtout à cause d'une demande extérieure forte durant la période 1971 à 1974, surtout pour la pâte de bois, et pour le papier-journal jusqu'à un certain point. La construction domiciliaire aux États-Unis diminua à partir de 1973, causant une baisse des exportations canadiennes de produits forestiers.

Les industries connexes à la construction, lesquelles comprennent l'industrie du bois, sont présentées dans le tableau 5. La plupart de ces industries connaissent une diminution du rythme de croissance en 1974 comparative-ment à 1972 et 1973 et voire même une baisse en 1975.

TABLE 5. Construction and Construction-oriented Industries
TABLEAU 5. Bâtiment et travaux publics et industries connexes

	Annual percentage changes – Variations annuelles en pourcentage			
	1972	1973	1974	1975
Manufacturing – Industries manufacturières:				
Asphalt roofing – Toitures d'asphalte	13.0	7.3	3.2	6.2
Paint and varnish – Peintures et vernis	7.1	4.8	2.1	– 3.8
Wood industries – Industrie du bois	8.6	8.5	– 6.5	– 9.1
Fabricated structural metal – Fabrication d'éléments de charpente métallique	– 5.7	15.1	4.5	2.4
Ornamental and architectural metal – Produits métalliques d'architecture et d'ornement	6.4	14.8	1.8	0.3
Wire and wire products – Fil métallique et produits en fil métallique	11.1	12.0	7.3	– 16.2
Manufacturers of major appliances – Fabricants de gros appareils	19.3	12.6	4.2	– 18.0
Cement – Ciment	9.1	10.6	5.9	– 8.4
Concrete products – Produits en béton	6.7	13.8	7.1	0.2
Ready-mix concrete – Béton préparé	2.8	12.1	2.6	– 6.4
Glass and glass products – Verre et articles en verre	9.8	10.4	2.8	– 5.5
Construction – Bâtiment et travaux publics	2.6	5.3	4.4	0.1
Wholesale trade – Commerce de gros:				
Construction materials and supplies – Fournitures et matériaux de construction	3.9	7.8	11.0	– 1.9

Exports of crude petroleum increased by more than 20% in both 1972 and 1973 raising the export share of total Canadian production from 53% in 1971 to 64% in 1973. Imports of crude oil also increased strongly, about 15% in each year. The import share of total domestic disappearance increased from 51% in 1971 to 58% in 1973. During 1972 and 1973 and into 1974 Canada was a net exporter of crude oil. During 1974 apparent domestic disappearance increased by less than 3% compared with almost 8% in 1972 and 1973. Exports of crude oil fell by 20% in 1974 and imports by more than 10%. In 1975 exports fell again by 20% to about 51% of total production and imports increased slightly so that by 1975 Canada was a net importer of crude oil. Domestic disappearance of crude oil fell in 1975. The decreased domestic demand is reflected in the decline in 1975 in wholesalers of petroleum products and service stations and garages.

Les exportations de pétrole brut se sont accrues de plus de 20 % en 1972 et en 1973, haussant la proportion des exportations par rapport à la production canadienne totale de 53 % en 1971 à 64 % en 1973. Les importations de pétrole brut se sont également accrues vigoureusement, environ 15 % chaque année. La proportion des importations par rapport à la disparition intérieure s'est accrue de 51 % en 1971 à 58 % en 1973. En 1972, 1973 et même en 1974, le Canada était un exportateur net de pétrole brut. En 1974, la disparition intérieure apparente augmenta de moins de 3 % comparativement à 8 % en 1972 et 1973. Les exportations de pétrole brut diminuèrent de 20 % en 1974 et les importations de plus de 10 %. En 1975, les exportations ont encore diminué de 20 % à un taux représentant 51 % de la production totale et les importations s'accrurent légèrement de telle sorte qu'en 1975 le Canada devient un importateur net de pétrole brut. La disparition intérieure de pétrole brut diminua en 1975. La diminution de la production des grossistes de produits pétroliers et des stations-service et postes d'essence reflète la baisse de la demande intérieure en 1975.

TABLE 6. Crude Petroleum and Natural Gas and Related Series

TABLEAU 6. Pétrole brut et gaz naturel et séries connexes

	1972	1973	1974	1975
Annual percentage changes – Variations annuelles en pourcentage				
Crude petroleum and natural gas mining industry – Industrie du pétrole brut et du gaz naturel	2.9	11.8	3.0	– 4.4
Petroleum and coal products manufacturing industries – Fabrication de produits du pétrole et du charbon	10.8	8.9	4.7	– 2.2
Pipeline transport – Transports par pipe-line	17.3	16.2	– 1.3	– 5.9
Wholesalers of petroleum products – Grossistes de produits pétroliers	5.2	5.4	1.8	– 1.5
Gas distribution – Distribution de gaz	15.3	4.6	8.9	1.2
Service stations and garages – Stations-service et postes d'essence	8.0	5.7	6.0	– 6.3
Apparent domestic disappearance of crude petroleum – Disparition intérieure apparente de pétrole brut	7.9	7.9	2.5	– 3.5
Exports of crude oil – Exportations de pétrole brut	25.9	23.1	– 20.9	– 21.0
Imports of crude oil – Importations de pétrole brut	14.8	16.4	– 11.1	2.4
Ratios – Rapports				
Crude petroleum – Pétrole brut				
Domestic production as a percentage of apparent domestic disappearance – Production intérieure en proportion de la disparition intérieure apparente	111.5	116.5	107.2	93.5
Imports as a percentage of apparent domestic disappearance – Importations en proportion de la disparition intérieure apparente	54.2	58.4	50.7	53.8
Exports as a percentage of total production – Exportations en proportion de la production totale	58.9	64.3	54.0	50.6

In the case of gas distribution, the growth in output continued into 1974 with a moderate increase in 1975. Electric power output grew in the 1972-1974 period – the strongest growth was in 1973 – and levelled off in 1975.

Motor vehicle production increased sharply in 1972 and 1973, increased slightly in 1974 and was almost unchanged from 1974 to 1975. Sales of motor vehicle dealers increased more strongly than total production in all years. Over this period, the export share of total motor vehicle production fell from 56 to 47% and the share of imports in total domestic supply declined from 46% in 1972 to 42% in 1975. Production of the motor vehicle parts and accessories industries advanced strongly in 1972 and 1973 and declined in the two following years.

La production de la distribution de gaz continua sa croissance en 1974 et à un taux plus modeste en 1975. La production d'énergie électrique s'accrut durant la période de 1972 à 1974, avec le plus fort taux de croissance en 1973 et se stabilisa en 1975.

La production des véhicules automobiles augmenta fortement en 1972 et 1973, légèrement en 1974 et ne varia que très peu en 1975. Les ventes des détaillants de véhicules automobiles s'accrurent beaucoup plus que la production totale durant toutes ces années. Pendant cette période, la proportion des exportations par rapport à la production totale des véhicules automobiles diminua de 56 % à 47 % et la proportion des importations par rapport à l'offre intérieure totale diminua de 46 % en 1972 à 42 % en 1975. La production des manufacturiers de pièces et accessoires d'automobile s'accrut fortement en 1972 et 1973 pour ensuite diminuer durant les deux prochaines années.

TABLE 7. Motor Vehicles and Associated Series
TABLEAU 7. Véhicules automobiles et séries connexes

	1972	1973	1974	1975
	Annual percentage changes – Variations annuelles en pourcentage			
Motor vehicles manufacturing – Manufacturiers de véhicules automobiles	8.1	10.3	3.4	0.7
Motor vehicle parts and accessories – Pièces et accessoires d'automobile	13.1	19.3	– 6.1	– 5.8
Motor vehicle dealers – Détaillants de véhicules automobiles	16.0	20.6	4.6	8.2
	Ratios – Rapports			
Exports as a % of total production in units of motor vehicles – Exportations en proportion de la production totale d'unités de véhicules automobiles	56	52	48	47
Imports as a % of total domestic supply in units of motor vehicles – Importations en proportion de l'offre intérieure totale d'unités de véhicules automobiles	46	43	43	42

Food store output shows a different pattern to total RDP; growth occurred in 1972, 1974 and 1975 with a decline in 1973. The food manufacturing industries recorded diverse growth patterns from 1972 to 1975. Liquor, beer and wine stores increased in each year from 1972 to 1975, reaching a peak growth rate in 1973. Output of beverage manufacturers declined in 1974 and increased again in 1975.

La production des magasins d'aliments présente un comportement différent de l'ensemble du P.I.R.; il y eut croissance en 1972, 1974 et 1975, mais baisse en 1973. Les industries manufacturières d'aliments présentèrent divers comportements de croissance de 1972 à 1975. Les magasins de vente spiritueux de vin et de bière ont augmenté leur production chaque année de 1972 à 1975, atteignant leur taux de croissance le plus élevé en 1973. La production manufacturière de boissons diminua en 1974 pour ensuite augmenter en 1975.

TABLE 8. Food and Beverage Industries and Related Services
TABLEAU 8. Industries des aliments et boissons et séries connexes

	Annual percentage changes – Variations annuelles en pourcentage			
	1972	1973	1974	1975
Meat products manufacturers – Industrie de la viande	3.2	0.4	2.2	0.8
Dairy products manufacturers – Industrie laitière	0.3	– 0.7	0.9	2.6
Flour and breakfast cereal – Meunerie et fabrication de céréales de table	– 0.4	– 6.8	– 0.1	5.3
Bakery products – Produits de boulangerie	1.2	0.5	– 1.7	0.9
Fruit and vegetable processing industry – Préparation de fruits et légumes	3.4	2.0	2.8	– 3.2
Beverage manufacturers – Industrie des boissons	7.3	9.6	– 2.8	3.5
Food stores – Magasins d'alimentation	2.7	– 1.5	2.3	3.1
Liquor beer and wine stores – Magasins de vente de spiritueux, de vin et de bière	7.3	9.7	6.5	4.4

The finance, insurance and real estate industries grew steadily over the 1971-75 period, registering lower rates of change than total RDP in 1972 and 1973 and higher growth rates in 1974 and 1975.

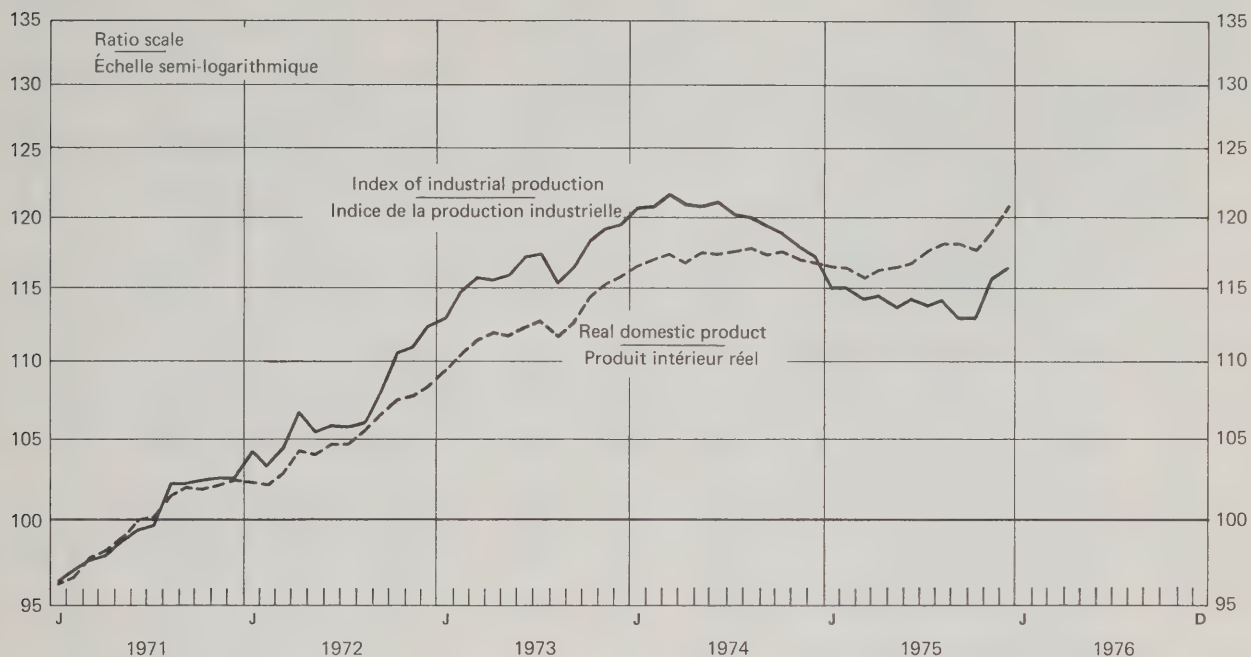

For community, business and personal service, output increased each year with a reduction in the rate of increase in 1975. Public administration and defence advanced by about 4% in 1972, 1974, and 1975, and by more than 5% in 1973.

L'industrie des finances, assurances et affaires immobilières augmenta constamment au cours de la période 1971-75, rapportant des taux de variation moindres que le P.I.R. pour 1972 et 1973 et des taux de croissance plus élevés pour 1974 et 1975.

Les services socio-culturels, commerciaux et personnels virent leur production s'accroître chaque année, mais à un taux toutefois plus réduit en 1975. La production de l'administration publique et de la défense s'accrut d'environ 4 % en 1972, 1974 et 1975 et de plus de 5 % en 1973.

A Note on CANSIM (R)

Data in this publication were retrieved from CANSIM (Canadian Socio-Economic Information Management System) and were manipulated and processed to create a photo-ready copy. All tabular data appearing in this publication, as well as many other data series, are available to the public from CANSIM via terminal, on computer printouts, or in machine readable form.

The next four pages contain a list of Databank Numbers which can be used to access the series in CANSIM. For example, to retrieve Real Domestic Product, monthly, without seasonal adjustment, you must use "D 100215".

For further information write to CANSIM, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8, or call (613) 995-7406.

Note au sujet de CANSIM (R)

Les données figurant dans cette publication ont été extraites du CANSIM (Système canadien d'information socio-économique). Elles ont été traitées de façon à produire une copie destinée à la photocomposition. Toutes les données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal sous forme d'imprimés d'ordinateur ou sous une forme lisible par machine.

Les quatre pages qui suivent renferment une liste des numéros Databank qui peuvent être utilisés pour avoir accès aux séries du CANSIM. Ainsi, pour extraire le produit intérieur réel mensuel avant désaisonnalisation, il suffit d'utiliser "D 100215".

Pour plus de renseignements, écrivez à CANSIM, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphonez à (613) 995-7406.

APPENDIX — APPENDICE

Real Domestic Product CANSIM Matrices — Matrices de CANSIM du Produit intérieur réel

S.I.C. — C.A.E.	Industry — Industrie	Matrix number — Numéro de matrice				
		1122		1123		1124
		Monthly — Mensuelle		Quarterly — Trimestrielle		
		Without seasonal adjustment — Non désaison- nalisés	Seasonally adjusted — Désaison- nalisés	Without seasonal adjustment — Non désaison- nalisés	Seasonally adjusted — Désaison- nalisés	
Databank numbers — numéros dans la banque de données						
1-11	REAL DOMESTIC PRODUCT — PRODUIT INTÉRIEUR RÉEL	D 100215	D 100554	D 100328	D 100441	D 100102
1	AGRICULTURE — AGRICULTURE	D 100216	D 100555	D 100329	D 100442	D 100103
2	FORESTRY — FORÊTS	D 100217	D 100556	D 100330	D 100443	D 100104
3	FISHING AND TRAPPING — CHASSE ET PÊCHE	D 100218	D 100557	D 100331	D 100444	D 100105
4	MINES (including milling), QUARRIES AND OIL WELLS — MINES (y compris broyage), CARRIÈRES ET Puits DE PÉTROLE	D 100219	D 100558	D 100332	D 100445	D 100106
4:01	Metal mines — Mines métalliques.	D 100220	D 100559	D 100333	D 100446	D 100107
051;052	Placer gold and gold quartz mines — Placers d'or et mines de quartz aurifère	D 100221	D 100560	D 100334	D 100447	D 100108
058	Iron mines — Mines de fer	D 100222	D 100561	D 100335	D 100448	D 100109
057;059	Other metal mines — Autres mines métalliques. . . .	D 100223	D 100562	D 100336	D 100449	D 100110
4:02	Mineral fuels — Combustibles minéraux.	D 100224	D 100563	D 100337	D 100450	D 100111
061	Coal mines — Mines de charbon.	D 100225	D 100564	D 100338	D 100451	D 100112
064	Crude petroleum and natural gas industry — Industrie du pétrole brut et du gaz naturel	D 100226	D 100565	D 100339	D 100452	D 100113
4:03	Non-metal mines (except coal mines) — Mines non métalliques (sauf mines de charbon)	D 100227	D 100566	D 100340	D 100453	D 100114
071	Asbestos mines — Mines d'amiante	D 100228	D 100567	D 100341	D 100454	D 100115
5	MANUFACTURING INDUSTRIES — INDUSTRIES MANUFACTURIÈRES	D 100229	D 100568	D 100342	D 100455	D 100116
5:01	Food and beverage industries — Industrie des aliments et boissons.	D 100230	D 100569	D 100343	D 100456	D 100117
101	Meat and poultry products industries — Industrie de la viande et de la volaille	D 100231	D 100570	D 100344	D 100457	D 100118
104	Dairy products industry — Industrie laitière	D 100232	D 100571	D 100345	D 100458	D 100119
105	Flour and breakfast cereal products industry — Meunerie et fabrication de céréales de table	D 100233	D 100572	D 100346	D 100459	D 100120
106	Feed industry — Fabrication d'aliments pour les animaux	D 100234	D 100573	D 100347	D 100460	D 100121
107	Bakery products industries — Boulangerie et pâtis- serie (fabrication)	D 100235	D 100574	D 100348	D 100461	D 100122
109	Beverage industries — Industrie des boissons.	D 100236	D 100575	D 100349	D 100462	D 100123
1092	Distilleries — Distilleries	D 100237	D 100576	D 100350	D 100463	D 100124
1093	Breweries — Brasseries	D 100237	D 100577	D 100351	D 100464	D 100125
5:02	Tobacco products industries — Industrie du tabac . .	D 100239	D 100578	D 100352	D 100465	D 100126
5:03	Rubber and plastics products industries — Industrie du caoutchouc et des produits en matière plastique	D 100240	D 100579	D 100353	D 100466	D 100127
162	Rubber products industries — Industrie des produits en caoutchouc	D 100241	D 100580	D 100354	D 100467	D 100128
5:04	Leather industries — Industrie du cuir	D 100242	D 100581	D 100355	D 100468	D 100129
5:05	Textile industries — Industrie textile.	D 100243	D 100582	D 100456	D 100469	D 100130
5:06	Knitting mills — Bonneterie.	D 100244	D 100583	D 100357	D 100470	D 100131
5:07	Clothing industrie — Industrie de l'habillement. . . .	D 100245	D 100584	D 100358	D 100471	D 100132
5:08	Wood industries — Industrie du bois	D 100246	D 100585	D 100359	D 100472	D 100133

Real Domestic Product CANSIM Matrices – Continued – Matrices de CANSIM du produit intérieur réel – suite

S.I.C. — C.A.É.	Industry — Industrie	Matrix number — Numéro de matrice					
		1122 Monthly — Mensuelle		1123 Quarterly — Trimestrielle		1124 Annual — Annuel	
		Without seasonal adjustment — Non désaison- nalisés	Seasonally adjusted — Désaison- nalisés	Without seasonal adjustment — Non désaison- nalisés	Seasonally adjusted — Désaison- nalisés		
		Databank numbers — numéros dans la banque de données					
251	Sawmills, planing mills and shingle mills — Scie- ries, ateliers de rabotage et usines de bardeaux. . .	D 100247	D 100 586	D 100360	D 100473	D 100134	
252	Veneer and plywood mills — Fabriques de pla- cages et de contre-plaquéés	D 100248	D 100587	D 100361	D 100474	D 100135	
5:09	Furniture and fixture industries — Industrie du me- uble et des articles d'ameublement.	D 100249	D 100588	D 100362	D 100475	D 100136	
5:10	Paper and allied industries — Industrie du papier et activités connexes.	D 100250	D 100589	D 100363	D 100476	D 100137	
271	Pulp and paper mills — Usines de pâtes et papiers . .	D 100251	D 100590	D 100364	D 100477	D 100138	
5:11	Printing, publishing and allied industries — Imprime- rie, édition et activités connexes.	D 100252	D 100591	D 100365	D 100478	D 100139	
5:12	Primary metal industries — Première transforma- tion des métaux.	D 100253	D 100592	D 100366	D 100479	D 100140	
291	Iron and steel mills — Sidérurgie	D 100254	D 100593	D 100367	D 100480	D 100141	
292	Steel pipe and tube mills — Fabriques de tubes et tuyaux d'acier	D 100255	D 100594	D 100368	D 100481	D 100142	
294	Iron foundries — Fonderies de fer	D 100256	D 100595	D 100369	D 100482	D 100143	
295	Smelting and refining — Fonte et affinage.	D 100257	D 100596	D 100370	D 100483	D 100144	
5:13	Metal fabricating industries (except machinery and transportation equipment industries) — Fabrication de produits en métal (sauf machines et équipement de transport)	D 100258	D 100597	D 100371	D 100484	D 100145	
5:14	Machinery industries (except electrical machinery) — Fabrication de machines (sauf électriques)	D 100259	D 100598	D 100372	D 100485	D 100146	
5:15	Transportation equipment industries — Fabrication d'équipement de transport	D 100260	D 100599	D 100373	D 100486	D 100147	
321	Aircraft and aircraft parts manufacturers — Fabri- cants d'aéronefs et de pièces.	D 100261	D 100600	D 100374	D 100487	D 100148	
323;324	Motor vehicle and truck body and trailer manufac- turers — Fabricants de véhicules automobiles et de carrosseries de camions et remorques.	D 100262	D 100601	D 100375	D 100488	D 100149	
325	Motor vehicle parts and accessories manufacturers — Fabricants de pièces et accessoires d'automobiles. .	D 100263	D 100602	D 100376	D 100489	D 100150	
326	Railroad rolling stock industry — Fabricants de matériel ferroviaire roulant	D 100264	D 100603	D 100377	D 100490	D 100151	
327	Shipbuilding and repair — Construction et réparation de navires	D 100265	D 100604	D 100378	D 100491	D 100152	
5:16	Electrical products industries — Fabrication de pro- duits électriques.	D 100266	D 100605	D 100379	D 100492	D 100153	
332	Manufacturers of major appliances (electric and non-electric) — Fabricants de gros appareils (élec- triques ou non)	D 100267	D 100606	D 100380	D 100493	D 100154	
334	Manufacturers of household radio and television receivers — Fabricants de radiorécepteurs et de téléviseurs ménagers	D 100268	D 100607	D 100381	D 100494	D 100155	
335	Communications equipment manufacturers — Fabri- cants d'équipement de télécommunication	D 100269	D 100608	D 100382	D 100495	D 100156	
336	Manufacturers of electrical industrial equipment — Fabricants d'équipement électrique industriel. . . .	D 100270	D 100609	D 100383	D 100496	D 100157	
5:17	Non-Metallic mineral products industries — Fabrica- tion de produits minéraux non métalliques	D 100271	D 100610	D 100384	D 100497	D 100158	
352	Cement manufacturers — Fabricants de ciment . . .	D 100272	D 100611	D 100385	D 100498	D 100159	
354	Concrete products manufacturers — Fabricants de produits en béton.	D 100273	D 100612	D 100386	D 100499	D 100160	

Real Domestic Product CANSIM Matrices — Continued — Matrices de CANSIM du produit intérieur réel — suite

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and on services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The indexes of Real Domestic Product by Industry (included the Catalogue Nos. carrying the prefix 61) provide "constant dollar" measures of the contribution of each industry to Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue Nos. with prefix 14).

Both the Input-Output Tables and Indexes of Real Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Also, provision is made in the System for incorporation of balance sheet (wealth) estimates when such data are sufficiently developed.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2 Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les indices du produit intérieur réel par industrie (compris dans les publications dont les numéros de catalogue commencent par 61) mesurent, en dollars constants, l'apport de chaque branche d'activité au produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le numéro de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les indices du produit intérieur réel. Les comptes de flux financiers (publications dont les numéros de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. En outre, le système a été conçu de façon à pouvoir incorporer les comptes de bilans (qui prennent pour objet le patrimoine) lorsque les données s'y rapportant seront suffisamment développées.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, n° 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE RE: HISTORICAL CONTINUITY

REMARQUES SUR LA CONTINUITÉ CHRONOLOGIQUE

On the 1971 base, a continuous record of Real Domestic Product and the Index of Industrial Production and their components may be obtained from the following Statistics Canada publications:

61-213 *Real Domestic Product by Industry (1971 = 100)*, 1971-1976 issue, for the 1971-1976 period.

61-005 *Indexes of Real Domestic Product by Industry*, the May 1977 issue and current issues for the period beginning January 1977.

The same data are available in the following CANSIM matrices:

Real Domestic Product (including the Index of Industrial Production)

	Matrix numbers
Monthly	1122
Quarterly	1123
Annual	1124

For the period prior to 1971 the data are not available on a 1971 base. To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically rebased to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Real Domestic Product and the Index of Industrial Production and the component indexes required for linkage to the 1971 based series may be obtained from the following Statistics Canada publications:

Indexes of Real Domestic Product by Industry — (1961 Base) Catalogue 61-506, for Real Domestic Product for the period from 1935-1960 and for the Index of Industrial Production for the period from 1919-1960.

Domestic Product by Industry, 1961-1971, 1961 = 100, Catalogue 61-516, for the period from 1961-1971.

Les publications de Statistique Canada sous mentionnées peuvent servir à établir une continuité du produit intérieur réel et de l'indice de la production industrielle et de leurs composantes sur la base 1971 = 100:

61-213 *Produit intérieur réel par industrie (1971 = 100)*, publication consacrée à la période 1971-1976.

61-005 *Indices du produit intérieur réel par industrie*, l'édition de mai 1977 et les publications courantes présentent des données pour la période commençant en janvier 1977.

On peut obtenir les mêmes données des matrices suivantes de CANSIM:

Produit intérieur réel (y compris l'indice de la production industrielle)

	Numéros de matrice
Mensuel	1122
Trimestriel	1123
Annuel	1124

En ce qui concerne les années antérieures à 1971, les données ne sont pas disponibles sur la base 1971 = 100. Pour obtenir une continuité des données de ces années, les indices sur la base 1961 = 100 doivent être convertis arithmétiquement à l'année de référence 1971 en les multipliant par 100.0 et en divisant le produit obtenu par la valeur de l'indice de 1971 sur la base de 1961 = 100. Dans le cas de 1971 et des années antérieures, le produit intérieur réel et l'indice de la production industrielle et des composantes nécessaires au raccordement avec les séries dont l'année de référence est 1971 peuvent être tirés des publications suivantes:

Indexes of Real Domestic Product by Industry — (1961 Base) n° 61-506 au catalogue, produit intérieur réel pour la période 1935-1960 et indice de la production industrielle pour la période 1919-1960.

Produit intérieur par industrie, 1961-1971, 1961 = 100, n° 61-516 au catalogue, la période 1961-1971.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following CANSIM matrices:

	Matrix numbers
Real Domestic Product:	
Annual	383
Quarterly	15
Monthly	1421
Index of Industrial Production:	
Annual	384
Monthly	16

CONCEPTS, SOURCES AND METHODS

Catalogue 61-502 — See this publication for description of concept, sources and methods for the Index of Industrial Production.

Catalogue 61-505 — See this publication for description of concepts, sources and methods for Real Domestic Product by Industry of Origin.

Catalogue 61-506 — See this publication for technical note concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the 1960 Standard Industrial Classification and the adoption of the 1961 weight and reference base.

Catalogue 61-510 — See this publication for technical note concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the “total activity” concept.

Catalogue 61-516 — See this publication for technical note concerning the introduction of annual estimates of Real Domestic Product by industry expressed in constant dollars, the incorporation of the results of the 1971 census of merchandising and services for a large number of the service-producing industries, the introduction of annual estimates of gross outputs, intermediate inputs, and value added in current and constant (1961) prices and the corresponding implicit price indexes, for selected manufacturing industries and the adoption of the final 1961 weighting system.

Catalogue 61-213 — See this publication for technical note concerning changes in Real Domestic Product resulting from the introduction of the 1970 S.I.C. and the adoption of the 1971 weight and reference base.

Des données de raccordement peuvent être obtenues pour 1971 et les années antérieures des matrices suivantes de CANSIM:

	Numéros de matrice
Produit intérieur réel:	
Annuel	383
Trimestriel	15
Mensuel	1421
Indice de la production industrielle:	
Annuel	384
Mensuel	16

CONCEPTS, SOURCES ET MÉTHODES

Catalogue 61-505 — Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement du produit intérieur réel par industrie d'origine.

Catalogue 61-506 — Se reporter à cette publication, qui présente les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'ont entraîné l'application de la Classification type des industries de 1960 et l'adoption de l'année 1961 comme base de pondération et de référence.

Catalogue 61-510F — Se reporter à cette publication, qui contient les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'a entraîné l'introduction du concept “d'activité totale”.

Catalogue 61-516 — Se rapporter à cette publication qui contient les remarques techniques concernant l'introduction d'estimations annuelles du produit intérieur réel par industrie exprimées en dollars constants, l'incorporation des résultats du recensement du commerce et de services de 1971 pour plusieurs industries de services, l'introduction de données annuelles pour certaines industries manufacturières concernant la production brute, nette et la consommation intermédiaire aux prix courants et constants (de 1961) et les indices implicites de prix correspondants et l'adoption du régime de pondération finale de 1961.

Catalogue 61-213 — Se rapporter à cette publication, qui contient les remarques techniques concernant les changements du produit intérieur réel qui ont entraîné l'introduction de la C.A.E. de 1970 et l'adoption de l'année 1971 comme base de pondération et de référence.

SYMBOLS AND CODES

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- nil or zero.
- amount too small to be expressed.

S.I.C. code: The Standard Industrial Classification code appearing in the tables should be interpreted as follows:

An S.I.C. Division is indicated by one of the integers 1 to 11.

An S.I.C. Major group within the Division is indicated by two digits following the Division code and separated from it by a colon.

A 3- or -4 digit industry class is indicated by 3- or -4 digits respectively.

CONTENT OF SPECIAL INDUSTRY GROUPINGS

The industry content of these special groupings is defined as follows:

Real Domestic Product less agriculture: All industries less agriculture (S.I.C. 2 - 11).

Goods-producing industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); construction industry (S.I.C. 6); and electric power, gas and water utilities (S.I.C. 7:04).

Goods-producing industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; 7:04).

Service-producing industries: Transportation, storage and communication (S.I.C. 7:01-03); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); community, business and personal service industries (S.I.C. 10); and public administration and defence (S.I.C. 11).

Commercial industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); construction industry (S.I.C. 6); transportation, storage and communication (S.I.C. 7:01-03) less highway and bridge maintenance (S.I.C. 516); electric power (S.I.C. 572); gas distribution (S.I.C. 574); trade (S.I.C. 8); finance insurance and real estate (S.I.C. 9); related health care institutions (S.I.C. 822); offices of physicians

SIGNES ET CODES CONVENTIONNELS

Voici la signification des signes et des codes conventionnels employés dans les tableaux:

- .. chiffre non disponible.
- néant ou zéro
- chiffre infime.

Code C.A.É.: le code de la classification type des industries figurant aux tableaux doit être interprété comme suite:

Une branche de la C.A.É., est indiquée par un des nombres entiers de 1 à 11.

Un groupe de la C.A.É., à l'intérieur d'une branche, est indiqué par deux chiffres qui suivent le code de la branche et sont séparés de celui-ci par deux points (:).

Une classe d'industrie à 3- ou -4 chiffres est indiquée par 3- ou -4 chiffres respectivement.

INDUSTRIES RÉUNIES DANS CHAQUE AGRÉGAT SPÉCIAL

Énumération des industries composant chaque groupe spécial ci-après:

Produit intérieur réel, moins l'agriculture: Toutes les industries, moins l'agriculture (C.A.É. 2 - 11).

Industries productrices de biens: Agriculture (C.A.É. 1); forêts (C.A.É. 2); chasse et pêche (C.A.É. 3); mines (y compris le broyage), carrières et puits de pétrole (C.A.É. 4); industries manufacturières (C.A.É. 5); bâtiment et travaux publics (C.A.É. 6); et énergie électrique, gaz et eau (C.A.É. 7:04).

Industries productrices de biens, moins l'agriculture: Le total du groupement précédent, moins l'agriculture (C.A.É. 2-6; 7:04).

Industries productrices de services: Transports, entreposage et communications (C.A.É. 7:01-03); commerce (C.A.É. 10); administration publique et défense (C.A.É. 11).

Industries commerciales: Agriculture (C.A.É. 1); forêts (C.A.É. 2); chasse et pêche (C.A.É. 3); mines (y compris broyage), carrières et puits de pétrole (C.A.É. 4); industries manufacturières (C.A.É. 5); bâtiment et travaux publics (C.A.É. 6); transports, entreposage et communications (C.A.É. 7:01-03); moins l'entretien des routes et des ponts (C.A.É. 516); électricité (C.A.É. 572); distribution de gaz (C.A.É. 574); commerce (C.A.É. 8); finances, assurances et affaires immobilières (C.A.É. 9); établissements annexes de soins sanitaires (C.A.É. 822);

and surgeons (S.I.C. 823); offices of para-medical personnel (practitioners) (S.I.C. 824); offices of dentists (S.I.C. 825); diagnostic and therapeutic services n.e.s. (S.I.C. 826); miscellaneous health services (S.I.C. 827); amusement and recreation services (S.I.C. 10:04); services to business management (S.I.C. 10:05); personal services (S.I.C. 10:06) less private households (S.I.C. 873); accommodation and food services (S.I.C. 10:07); miscellaneous services (S.I.C. 10:08).

Commercial industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; part of 7; 8; 9 and part of 10).

Non-commercial industries: Highway and bridge maintenance (S.I.C. 516); water systems and other utilities (S.I.C. 576; 579); hospitals (S.I.C. 821); welfare organizations (S.I.C. 828); religious organizations (S.I.C. 831); private households (S.I.C. 873); education and related services (S.I.C. 10:01); and public administration and defence (S.I.C. 11).

Index of Industrial Production: Mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); and electric power, gas and water utilities (S.I.C. 7:04).

Note: 1. Due to rounding, sub-annual detail may not average annual level.

2. For RDP purposes the content of S.I.C. Division 7 has been altered to include only transportation, storage and communication; electric power, gas, water and other utilities are excluded and measured separately, as a component of the Index of Industrial Production.

cabinets de médecin et de chirurgien (C.A.É. 823); cabinets de praticiens paramédicaux (C.A.É. 824); cabinets de dentiste (C.A.É. 825); services de diagnostic et de soins n.c.a. (C.A.É. 826); services de santé divers (C.A.É. 827); divertissements et loisirs (C.A.É. 10:04); services fournis aux entreprises (C.A.É. 10:05); services personnels (C.A.É. 10:06), moins ménages privés (C.A.É. 873); hébergement et restauration (C.A.É. 10:07); services divers (C.A.É. 10:08).

Industries commerciales, moins l'agriculture: Le total du groupe précédent, moins l'agriculture (C.A.É. 2-6; partie de 7; 8; 9 et partie de 10).

Industries non commerciales: Entretien des routes et des ponts (C.A.É. 516); distribution d'eau et autres services d'utilité publique (C.A.É. 576; 579); hôpitaux (C.A.É. 821); organismes de bien-être (C.A.É. 828); organisations culturelles (C.A.É. 831); ménages (C.A.É. 873); enseignement et services connexes (C.A.É. 10:01); administration publique et défense (C.A.É. 11).

Indice de la production industrielle: Mines (y compris le broyage), carrières et puits de pétrole (C.A.É. 4); industries manufacturières (C.A.É. 5); énergie électrique, gaz et eau (C.A.É. 7:04).

Nota: 1. En raison de l'arrondissement des chiffres, il se peut que la moyenne des données mensuelles et trimestrielles n'équivaille pas au niveau annuel.

2. Pour le calcul du P.I.R., la division 7 de la C.A.É. a été modifiée de façon à inclure seulement les transports, l'entreposage et les communications. L'énergie électrique, le gaz, l'eau et les autres services d'utilité publique sont évalués séparément et font partie de l'indice de la production industrielle.

TECHNICAL NOTE

This report presents measures of Real Domestic Product (RDP) by industry for the 1971-1975 period on a 1971 time and weight base. It should also be noted that the 1970 Standard Industrial Classification is used in this publication. Underlying concepts and general methodology remain unchanged.

1971 Industry Weights

The 1971 industry weights are unchanged from the previous annual publication. They are based on preliminary estimates of the industrial distribution of Gross Domestic Product for the year 1971. In deriving the industry weights, the latest available data from Statistics Canada censuses and annual surveys were used. It was also necessary to exploit sources such as company annual reports and taxation records, as well as operating ratios from other sources. The 1971 GDP distributions can be finalized only after detailed reconciliation of all components of the System of National Accounts following the completion of the 1971 Input-Output table. It is expected, however, that the industrial distribution will not be substantially changed, particularly for the higher aggregates.

As shown by the table below, service-producing industries increased their share of total GDP in 1971 as compared with 1961. This represents a continuation of a trend apparent between 1949 to 1961, the two previous weight base periods.

	1949	1961	1971
Goods-producing industries — Industries de biens . .	53.080	44.233	40.754
Service-producing industries — Industries de services	46.920	55.767	59.246
Gross domestic product — Produit intérieur brut . . .	100.000	100.000	100.000

Annual Measures

Annual measures as distinct from monthly projectors have been calculated for a number of additional industries. Data from the Census of Merchandising and Services have been used to make trend adjustments to a number of series. In addition the deflators for wholesale and retail trade have been modified by expanding the number of prices used and the working levels for deflation. For retail trade the base year weights have been changed to incorporate more recent information.

NOTE TECHNIQUE

Cette publication présente des mesures du produit intérieur réel (P.I.R.) par industrie pour la période 1971-1975. Les bases de référence et de pondération de ces mesures sont celles de 1971. Il est à noter également que la Classification des activités économiques de 1970 est utilisée dans cette publication. Les concepts sous-jacents et la méthodologie générale n'ont pas changé.

Pondérations 1971 de l'industrie

Les pondérations 1971 de l'industrie sont les mêmes que celles utilisées dans la publication annuelle précédente. Elles sont basées sur des estimations provisoires de la répartition industrielle du produit intérieur brut pour l'année 1971. Les dernières données disponibles des recensements et des enquêtes annuelles de Statistique Canada ont été utilisées pour établir ces pondérations. On s'est également servi d'autres données, comme les déclarations annuelles et les dossiers fiscaux des entreprises, et aussi des ratios d'exploitation provenant d'autres sources. Les répartitions du P.I.B. de 1971 ne pourront être calculées que lorsqu'on aura terminé le rapprochement détaillé de tous les éléments du système des comptes nationaux, une fois le tableau des entrées sorties de 1971 terminé. On s'attend, cependant, à ce que la répartition industrielle et en particulier les principaux agrégats, ne subissent pas de changements importants.

Comme l'indique le tableau ci-dessous, comparative-ment à 1961, les industries de services tiennent un place plus importante dans le P.I.B. total. Cette augmentation est la suite de la tendance apparue entre 1949 et 1961, les deux dernières années à servir de base aux pondérations.

Mesures annuelles

Des mesures annuelles différentes des projections mensuelles ont été calculées pour un plus grand nombre d'industries. On utilisa les données du recensement du commerce et des services pour fins d'ajustement de tendance à de nombreuses séries. De plus, on modifia les déflateurs utilisés dans le commerce de gros et le commerce de détail en augmentant le nombre de prix utilisés et les niveaux de calcul de déflation. Les pondérations de base pour le commerce de détail furent modifiées suite à l'incorporation d'informations plus récentes.

Monthly Measures

The monthly measures are changed to reflect revisions in the projectors, incorporation of the revised annual data and revisions to seasonal factors. For some industries, the methodology has been changed and some further refinements have been made to the 1971 base year unit values used to combine quantities of commodity outputs.

RDP in Constant Dollars

A table containing annual data has been added to this publication expressing RDP by industry in 1971 prices. The constant dollar data have been derived by projecting GDP in the base year using the output indexes for each industry from Table 1.

Estimates in Current and Constant Dollars

At the end of the report (Appendix II), there is a special section on selected manufacturing industries, showing annual estimates of gross output, intermediate inputs and value added in current and constant dollars as well as the resultant implicit price indexes. The industrial detail consists of total manufacturing, all major groups, and selected 3-digit S.I.C. industries.

The current price (i) gross output (ii) intermediate input and (iii) value added series have been derived as follows:

- (i) For each industry, the value of total production obtained from the census of manufacturers is adjusted, where necessary, to include estimates of additional income items such as rentals. In calculating the value of production, the physical change in inventories has been valued in prices of the current period. Some additional modifications were made to maintain continuity where there were changes in the basis of the reports during the period or to convert the Census data from a fiscal to a calendar year basis.
- (ii) Intermediate inputs are derived by adding an estimate of the cost of purchased service inputs and indirect taxes to the cost of material inputs, supplies, containers, fuel and electricity, etc., obtained from the census of manufacturers. The service inputs were estimated as a fixed proportion of value-added in both current and constant dollars.
- (iii) Value added is derived residually, that is, it is the difference between gross outputs and intermediate inputs.

The implicit price indexes are derived by dividing each current price series by the corresponding constant price series. Since the deflation process is carried out at a detailed commodity level, thereby capturing the current period commodity structure, the resultant implicit price indexes should be considered as Paasche or currently weighted price indexes.

Mesures mensuelles

Les changements dans les mesures mensuelles proviennent de révisions dans les indicateurs, de l'introduction de données annuelles révisées et de révisions dans les facteurs saisonniers. Pour certaines industries, on changea la méthodologie et certaines améliorations furent apportées aux valeurs unitaires de l'année de base 1971 utilisées pour pondérer les quantités dans les indicateurs de production de marchandises.

P.I.R. en dollars constants

Cette publication contient un autre tableau de données annuelles du P.I.R. par industrie aux prix de 1971. Les données en dollars constants furent obtenues en projetant le P.I.R. brut de l'année de base avec les indices de production de chaque industrie dans le tableau 1.

Estimations en dollars courants et constants

On trouve à la fin du rapport une section spéciale, l'appendice II, sur le groupe des industries manufacturières. Y sont présentées des estimations annuelles de la production brute, de la consommation intermédiaire et de la valeur ajoutée. Ces données sont disponibles pour l'ensemble des entreprises manufacturières, pour tous les agrégats principaux et pour certaines industries à 3 chiffres.

Les séries en prix courants (i) de la production brute, (ii) de la consommation intermédiaire et (iii) de la valeur ajoutée sont calculées comme suit:

- (i) Pour chaque industrie, l'estimation de la production totale, tirée du recensement manufacturier, est ajustée, si nécessaire, pour inclure certains revenus additionnels, par exemple, de location. Au moment du calcul, les variations matérielles des stocks ont été évaluées aux prix de la période courante. Certaines modifications additionnelles furent apportées en vue de conserver une continuité chronologiques là où il y a eu des changements dans les structures des comptes rendus durant la période ou pour ajuster les données du recensement de l'année fiscale à l'année de calendrier.
- (ii) La consommation intermédiaire est obtenue en additionnant le coût des services achetés et les taxes indirectes aux coûts des matériaux, des fournitures, des contenants, du combustible et de l'électricité, etc., fournis par le recensement manufacturier. Les intrants de services furent estimés comme une proportion fixe de la valeur ajoutée en dollars courants et constants.
- (iii) La valeur ajoutée est dérivée de façon résiduelle, c'est-à-dire, qu'elle est la différence entre la production brute et la consommation intermédiaire.

Les indices implicites de prix proviennent de la division de chaque série en prix courants par la série correspondante en prix constants. Comme le dégonflement des données s'effectue pour une désagrégation poussée des produits, reflétant ainsi leur structure courante, les indices implicites qui en résultent devraient être considérés comme des indices de Paasche ou des indices de prix à pondération courante.

The current dollar data (for years other than the base years) were subjected to critical appraisal and rigorous time series analysis only to the extent necessary to achieve the primary objective of producing reliable estimates of RDP.

Consequently, the current dollar data, and therefore the implicit price indexes for the 1972 to 1974 period inclusive, should, on the whole, be considered to be less reliable than the constant price measures.

Linking RDP on a 1971 base with RDP on a 1961 base

Subject to rounding errors, a linked series can be calculated between the 1961- and 1971-based RDP series which are identical under the 1960 and 1970 S.I.C.'s using the index values for 1971. For a 1971-based series, the 1961-based series should be multiplied by 100.0 and divided by the index value for 1971 for the series on the 1961 base. For a continuous series on a 1961 base, the 1971-based series should be multiplied by the index value for 1971 for the series on a 1961 base and divided by 100.0.

A table providing linkages between the 1961- and 1971-based series will be prepared and made available at a later date. The availability of this table will be announced in the *Statistics Canada Daily* and in the monthly publication (Catalogue 61-005).

The Revision to RDP

The revisions to the annual RDP indexes result from a number of different sources. In general, annual levels for an additional year have been calculated for all industries for which annual levels were previously prepared, revisions to the data on which the previously published annual levels were based have been incorporated, and annual levels have been prepared for some additional industries.

The revisions to year-to-year movements in certain aggregates are included in Table 1. As can be seen from this table only the 1972 and 1975 movements were significantly altered from the previously published data. In 1972, the revision occurs mainly in the service-producing industries. Goods-producing industries and service-producing industries have been revised upwards by approximately equal amounts in 1975.

The monthly data have been revised due to the incorporation of annual levels, revisions to the monthly data on which the output indexes are based, changes in the methodology for several industries and revisions to the seasonal factors.

Les données en dollars courants (pour les années autres que l'année de base) furent l'objet d'une évaluation critique et d'une analyse de série chronologique rigoureuse jusqu'au point nécessaire pour atteindre l'objectif primordial de produire des estimations solides du P.I.R.

En conséquence, les données en dollars courants et, par conséquent, les indices implicites de prix pour la période de 1972 à 1974 inclusivement devraient être considérés dans leur ensemble comme étant moins solides que les mesures en prix constants.

Raccordement du P.I.R. sur la base 1971 = 100 au P.I.R. sur la base 1961 = 100

Compte tenu des erreurs d'arrondissement, il est possible de calculer une série raccordée entre les séries du P.I.R. dont les années de référence sont 1961 et 1971 et qui ont la même définition dans la C.T.I. de 1960 et la C.A.E. de 1970 en utilisant la valeur des indices de 1971. Dans le cas d'une série 1971 = 100, il faut multiplier les séries 1961 = 100 par 100.0 et diviser le produit obtenu par la valeur de l'indice de 1971 pour la série dont l'année de référence est 1961. En ce qui concerne les séries continues dont l'année de référence est 1961, il faut multiplier la série 1971 = 100 par la valeur de l'indice de 1971 pour la série sur la base 1961 et diviser le produit obtenu par 100.0.

Un tableau présentant les raccordements entre les séries 1961 = 100 et 1971 = 100 sera préparé et publié à une date ultérieure qui sera annoncée dans le *Quotidien de Statistique Canada* et dans la publication mensuelle n° 61-005 au catalogue.

Revisions au P.I.R.

Les revisions aux indices annuels du P.I.R. proviennent de nombreuses sources différentes. En général, des niveaux annuels ont été calculés pour une année supplémentaire pour toutes les industries, dont on avait déjà préparé les niveaux annuels auparavant. Des revisions furent incorporées aux données servant au calcul des niveaux annuels publiés antérieurement et ces derniers furent calculés pour certaines industries additionnelles.

Le tableau 1 présente les revisions aux variations annuelles pour certains agrégats. Seulement les variations pour 1972 et 1975 connurent des modifications significatives par rapport aux données publiées antérieurement. En 1972, les revisions surviennent surtout dans les industries de services. Les industries de biens et celles de services connaissent des revisions à la hausse d'importance à peu près égale en 1975.

Les données mensuelles furent révisées, suite à l'incorporation des niveaux annuels, à des revisions aux données mensuelles elles-mêmes qui servent au calcul des indices de production, à des changements de méthodologie pour plusieurs industries et à des revisions aux facteurs saisonniers.

TABLE 1. Revisions to Year-to-year Percentage Changes in Real Domestic Product and Major Aggregates
TABLEAU 1. Revisions aux variations annuelles en pourcentage du produit intérieur réel et des principaux agrégats

	1972	1973	1974	1975	1976
Real Domestic Product – Produit intérieur réel:					
Revised – Révisé	5.5	7.1	4.1	0.9	4.6
Unrevised – Non révisé	5.2	7.0	4.2	0.3	4.7
Real Domestic Product excluding agriculture – Produit intérieur réel sans l'agriculture:					
Revised – Révisé	6.1	7.2	4.6	0.7	4.5
Unrevised – Non révisé	5.8	7.1	4.7	0.2	4.4
Index of industrial production – Indice de la production industrielle:					
Revised – Révisé	7.2	9.0	3.2	– 4.7	5.0
Unrevised – Non révisé	7.0	9.0	2.9	– 4.6	4.7
Goods-producing industries – Industries productrices de biens:					
Revised – Révisé	4.6	8.0	2.3	– 2.7	4.7
Unrevised – Non révisé	4.5	8.1	2.0	– 3.3	5.0

Revised – Révisé	3.5	3.6	2.9	3.1	1.9
Unrevised – Non révisé	3.1	3.4	3.6	3.5	2.4
Commercial industries – Industries commerciales:					
Revised – Révisé	5.9	7.9	4.4	0.4	5.3
Unrevised – Non révisé	5.6	7.9	4.4	– 0.3	5.2

Review of 1976

In 1976, the economy as measured by RDP grew by 4.6%, below the average rate of growth in the 1961 to 1974 period and well above the 1975 growth rate of 0.9%. Most of the strength in 1976 occurred in the commercial industries which were also the source of the weakness in 1975. Growth in the non-commercial industries declined to about 2% in 1976 from 3% the previous year.

Employment in the non-agricultural economy advanced by 2.5% compared with 4.5% for RDP excluding agriculture. A comparison of growth rates of labour input and output is included in Table 2 for selected industries. Most of these industries show in-

Revue de 1976

En 1976, l'économie telle que mesurée par le P.I.R. s'est accrue de 4.6 %, moins que le taux moyen de croissance de la période de 1961 à 1974 et largement plus élevé que celui de 0.9 % en 1975. Presque toute la hausse en 1976 provint des industries commerciales, desquelles origina la faiblesse en 1975. La croissance pour les industries non commerciales diminua de 3 % en 1975 à 2 % environ en 1976.

L'emploi dans l'économie excluant l'agriculture progressa de 2.5 % comparativement à 4.5 % pour le P.I.R. sans l'agriculture. Une comparaison des taux de croissance de l'emploi et de la production pour des industries choisies est incluse dans le tableau 2. Presque toutes

creases in both output and employment in 1976 following slow growth or declines in 1975. Over most of the period the year-to-year percentage changes in output were greater than those of employment. The notable exception was 1975 when output growth was less than employment growth for all industries. In the construction industry employment growth has exceeded that of output in every year but 1972.

ces industries montrent des hausses de la production et de l'emploi en 1976 suite à une croissance lente ou des baisses en 1975. Dans l'ensemble de la période, les variations annuelles en pourcentage pour la production furent plus fortes que celles de l'emploi. L'exception fut 1975, où la croissance de la production fut moindre que celle de l'emploi pour toutes les industries. La croissance de l'emploi dans le bâtiment et les travaux publics dépassa celle de la production pour toutes les années sauf en 1972.

TABLE 2. Year-to-year Percentage Changes in Output and Employment¹ for Selected Industries
TABLEAU 2. Variations annuelles en pourcentage de la production et de l'emploi¹ pour des industries choisies

	1972	1973	1974	1975	1976
Total economy excluding agriculture – Ensemble de l'économie sans l'agriculture:					
Output – Production	6.1	7.2	4.6	0.7	4.5
Employment – Emploi	3.7	5.7	4.5	1.9	2.5
Manufacturing – Industries manufacturières:					
Output – Production	6.9	8.6	3.4	– 4.9	5.1
Employment – Emploi	3.5	6.0	2.8	– 3.6	2.9
Construction – Bâtiment et travaux publics:					
Output – Production	2.3	4.9	4.5	3.7	0.3
Employment – Emploi	1.2	9.6	8.9	1.2	5.2
Transportation, storage and communication – Transports, entreposage et communications:

Employment – Emploi	6.0	6.2	5.1	3.7	0.5

¹ The Labour Force Survey. – L'enquête sur la population active.

Data on work-days lost due to work stoppages are contained in Table 3. Between 1975 and 1976 there was little change in the percentage of work-days lost due to strikes and lock-outs compared with total available work-days.

Le tableau 3 contient les données sur les jours de travail perdus à cause d'arrêts de travail. Entre 1975 et 1976, le pourcentage de jours de travail perdus dûs aux grèves et lock-out comparativement au total de jours de travail disponibles demeura stable.

TABLE 3. Work Days Lost Due to Work Stoppages
TABLEAU 3. Jours de travail perdus à cause d'arrêts de travail

Period — Période	Number begin- ning during year — Nombre com- mencé pendant l'année	Work stoppages in existence during year — Arrêts de travail en cours pendant l'année			Percentage of estimated working time — Pourcentage du temps ouvrable estimatif
		Number — Nombre	Workers involved — Travailleurs en cause	Duration in work days — Durée en jours de travail	
Year — Année:					
1971	547	569	239,631	2,866,590	0.16
1972	556	598	706,474	7,753,530	0.43
1973	677	724	348,470	5,776,080	0.30

1976	913	1,030	1,582,631	10,624,130	0.50

Source: Labour Canada. — Travail Canada.

Other factors in the RDP advance were an increase in residential construction activity and recovery in both Canada and the United States from the general economic slowdown in 1975.

Goods-producing and service-producing industries increased at about equal rates in 1976.

Among the goods-producing industries; agriculture, forestry, fishing and trapping and utilities all grew at rates exceeding 10%. Manufacturing increased at about the same rate as RDP; and construction and mining were little changed from 1976. The agriculture increase is attributable to the second consecutive large increase in the grain crop and to increases in most other farm products including livestock, poultry and eggs, vegetables and dairy products. The gain in forestry followed declines in 1974 and 1975. The increase in log production is due to increased demand in sawmills and veneer and plywood mills. Pulpwood production was down slightly in 1976. For the fishing and trapping industries, the increase is only the second increase since 1970. It results from increased landing of salmon and scallops.

Une augmentation de la construction résidentielle et la reprise économique au Canada et aux États-Unis suite au ralentissement de 1975 contribuèrent au progrès du P.I.R.

Les industries de biens et les industries de services s'accroissent à peu près au même taux en 1976.

Parmi les industries de biens, l'agriculture, les forêts, la chasse et la pêche et les utilités, toutes s'accroissent à des taux dépassant 10 %. Les industries manufacturières progressèrent à peu près au même taux que le P.I.R. Le bâtiment et les travaux publics et l'industrie minière ne s'accroissent que légèrement en 1976. La hausse de l'agriculture provient de la deuxième augmentation importante consécutive des récoltes de grain et d'augmentations dans l'ensemble des autres produits agricoles comme le bétail, la volaille et les oeufs, les légumes et les produits laitiers. La hausse dans les forêts fait suite à des baisses en 1974 et 1975. L'augmentation de la production de billes de bois est attribuable à la demande accrue des scieries et des fabriques de placages et de contre-plaqués. La production de bois à pâte diminua légèrement en 1976. Pour la chasse et la pêche, la hausse n'est que la seconde depuis 1970 et fait suite à des prises accrues de saumons et de coquilles.

Output of electric power, gas and water utilities increased strongly in 1976. Electric power utilities were responsible for the increase. Gas distribution advanced only slightly in 1976. Electric utilities output was affected by hydro strikes in 1975, and also by the economic slowdown.

In manufacturing, most of the advance in 1976 was the result of increases in pulp and paper mills, sawmills, motor vehicle manufacturers and manufacturers of motor vehicle parts and accessories. Pulp and paper mills recovered from strikes which depressed output levels in 1975. The recovery was moderated by the reduced demand for newsprint in 1975 and 1976 compared with 1974 as indicated by United States consumption of newsprint. Sawmills output increased strongly, as did that of veneer and plywood mills, reflecting the increased residential construction activity in the United States and Canada during 1976. Motor vehicle manufacturers output increased sharply in 1976 in spite of strikes in the United States and Canada. In 1974 and 1975 output grew slowly in motor vehicle manufacturing. For motor vehicle parts and accessories, the 1976 increase approximately equalled that of motor vehicle manufacturers. Output declined in both 1974 and 1975 for this industry.

Industrial chemicals output also grew in 1976. A factor in this growth was the recovery from the pulp and paper strike in 1975 and strikes in the United States in 1976 which led to increases in the rubber industry in Canada.

The most significant decline in manufacturing was in smelting and refining which was affected by strikes in 1976.

Mining output in 1976 and 1975 was below the 1973 and 1974 levels. This is the result of decreases in crude petroleum and natural gas output in each year since 1973. Production of the crude petroleum and natural gas industry decreased again in 1976 but increases in asbestos mining due to the end of a strike and in iron mining resulted in little change for total mining. Coal mining output declined in 1976 due to strikes.

Construction output increased only slightly in 1976, residential construction increased while non-residential construction declined. Residential construction decreased in both 1974 and 1975. The 1976 increase is the result of increases in all components of residential construction. Non residential construction increased in both 1974 and 1975.

Growth rates in the service industries were less varied than for the goods-producing industries, ranging from 3.4% for public administration and defence to

La production d'énergie électrique, de gaz et d'eau progressa fortement en 1976 surtout grâce à l'énergie électrique. La distribution de gaz s'accrut légèrement durant l'année. En 1975, la production de l'électricité se sentit des grèves des utilités publiques ainsi que du ralentissement économique.

Presque tous les progrès des industries manufacturières en 1976 proviennent des augmentations dans les moulins de pâtes et papiers, des scieries, des manufacturiers de véhicules automobiles et de ceux des pièces et d'accessoires d'automobile. Les moulins de pâtes et papiers se sont relevés des grèves qui ont abaissé les niveaux de production en 1975. La reprise fut toutefois ralentie par une demande plus faible pour le papier-journal en 1975 et 1976 comparativement à 1974, telle qu'indiquée par la consommation de papier-journal aux États-Unis. La production des scieries, comme celle des fabriques de placages et de contre-plaqués, s'est accrue fortement, reflétant la hausse de l'activité dans la construction résidentielle tant aux États-Unis qu'au Canada en 1976. La production manufacturière de véhicules automobiles augmenta vigoureusement en 1976 malgré des grèves aux États-Unis et au Canada. En 1974 et en 1975, la production de véhicules automobiles s'accrut légèrement. La hausse de production de pièces et d'accessoires d'automobile en 1976 se compara à celle des véhicules automobiles, tandis que la production a diminué en 1974 et en 1975.

La production de produits chimiques industriels s'accrut en 1976. Cette croissance provient de la reprise suite aux grèves des pâtes et papiers en 1975 et des grèves dans le caoutchouc en 1976 aux États-Unis qui amenèrent une hausse pour l'industrie du caoutchouc au Canada.

La baisse la plus importante pour les industries manufacturières provient de la fonte et de l'affinage, qui connut des grèves en 1976.

La production minière en 1976 et en 1975 demeurait encore à des niveaux inférieurs à 1973 et 1974, surtout à cause de diminutions de production de pétrole brut et du gaz naturel chaque année depuis 1973. La production de l'industrie du pétrole brut et du gaz naturel diminua encore en 1976, mais des hausse dans les mines d'amiante à cause de la fin des grèves et dans les mines de fer contribuèrent dans la légère variation pour l'ensemble de l'industrie minière. Des grèves causèrent la diminution de la production des mines de charbon en 1976.

La production du bâtiment et des travaux publics augmenta légèrement en 1976; la construction résidentielle s'accrut, tandis que la construction non domiciliaire diminua. La construction résidentielle diminua en 1974 et en 1975. Par contre, toutes les composantes contribuèrent à la hausse en 1976. La construction non domiciliaire s'était accrue en 1974 et en 1975.

L'écart dans les taux de croissance pour les industries des services était beaucoup plus restreint que pour les industries de biens; le taux de croissance passait de 3.4 %

5.7% for trade. Transportation, storage and communication, finance, insurance and real estate, and community business and personal service all advanced at rates approximating that of total RDP.

In transportation, storage and communication, most of the growth came from the communications industry where the increase is attributable to growth in all component industries. In the post office the increase follows strikes in 1975 that reduced output in that year. Transportation increased slowly in 1976 following a decline in 1975. Growth in air transport fell in 1975 and 1976 from the very high growth rates of 1972, 1973 and 1974. Strikes in June accounted for much of the slowdown in 1976. Rail transport output was up only about 1% in 1976. For rail transport, the movements in commodities carried reflects the movements of various industries. Transportation of iron ore and various forest and wood products increased. Grain and other agricultural and food products decreased. Most of the remaining manufacturing products also decreased in 1976. Truck transport is estimated to have increased by about the same amount as rail transport. The increases in both interurban bus transportation and urban transit were much lower than normal. There were several strikes during the year in both industries, and there were substantial price increases in both industries in 1976. Pipeline transport decreased due primarily to reduced exports of crude oil. The opening of the pipeline from Sarnia to Montreal minimized the effect of reduced exports. Storage output increased slightly in 1976. Grain elevators output in 1976 was virtually level with 1975.

Both wholesale and retail trade output grew in 1976 with the strongest increase in retail trade. The increase in wholesale trade in 1976 left it at its 1974 level. Wholesalers of construction materials and supplies were responsible for a large part of the increase with lesser contributions from a number of other industries including several food related components, commercial institutional and service equipment, farm machinery, and automobile and automotive parts and accessories. For automobiles and automotive parts and accessories a dock strike affected the 1975 level. In retail trade, the major contributors to the advance were food stores, department stores and to a lesser extent service stations and garages, clothing stores and sporting goods and accessory stores. Motor vehicle dealers output decreased in 1976. Two of the factors in this decline were the reintroduction of the sales tax on automobiles in Ontario in 1976 and the strikes in motor vehicle manufacturing in the United States which affected sales in September in Canada.

pour l'administration publique et la défense à 5.7 % pour le commerce. Les transports, entreposage et communications, les finances, assurances et affaires immobilières et les services socio-culturels commerciaux et personnels ont tous progressé à des taux similaires à celui du P.I.R.

Presque toute la croissance pour les transports, entreposage et communications provint de l'industrie des communications grâce à la contribution de toutes les industries composantes. La hausse pour les bureaux de poste fait suite à la baisse de production à cause des grèves en 1975. Les transports ne connurent qu'une faible augmentation en 1976 suite à une baisse en 1975. Le taux de croissance pour les transports aériens diminua en 1975 et en 1976, après avoir été très élevé durant les trois années précédentes. Des grèves en juin rendent compte pour une bonne partie du ralentissement en 1976. La production des transports ferroviaires augmenta seulement d'environ 1 % en 1976. Pour ces derniers, le transport des marchandises reflète les variations de diverses industries. Le transport du minerai de fer et de divers produits forestiers s'est accru. Le grain, les autres produits agricoles et les produits alimentaires ont connu une baisse. Presque tout le reste des produits manufacturiers a diminué en 1976. On a estimé que le transport par camion s'est accru d'à peu près la même manière que les transports ferroviaires. La hausse dans les transports interurbains et dans les réseaux de transports urbains fut beaucoup plus faible que d'habitude. Plusieurs grèves affectèrent ces deux industries durant l'année et les deux industries connurent des hausses de prix importantes. Des exportations plus faibles de pétrole brut contribuèrent principalement à la diminution des transports par pipe-line. L'ouverture du pipe-line entre Sarnia et Montréal minimisa quelque peu l'effet des réductions d'exportations. La production de l'entreposage augmenta légèrement en 1976. La production des silos à grain demeura sensiblement la même durant les deux années.

La production du commerce de gros et du commerce de détail augmenta, le commerce de détail enregistrant les gains les plus forts. La hausse dans le commerce de gros ramène celui-ci au niveau de 1974. Les grossistes de matériaux et de fournitures de construction contribuèrent le plus à l'augmentation; à un moindre degré, d'autres industries contribuèrent à la hausse: plusieurs composantes reliées à l'alimentation, les grossistes d'équipement et de fournitures pour commerces, institutions et services, les grossistes de machines agricoles et ceux d'automobiles, de pièces et d'accessoires d'automobile. Pour ces derniers, une grève de débardeurs affecta la production en 1975. Les magasins d'alimentation, les grands magasins et à un moindre degré les garages et postes d'essence, les magasins de vêtements et les magasins d'articles de sport contribuèrent à la hausse du commerce de détail. La production des détaillants en véhicules automobiles diminua en 1976, à cause de la réintroduction de la taxe de vente au détail sur les automobiles en Ontario en 1976 et à cause des grèves dans l'industrie manufacturière des véhicules automobiles aux États-Unis qui ont affecté les ventes de septembre au Canada.

The finance, insurance and real estate industry increased in 1976 as it has in each year since 1971. Banks and savings and credit institutions, investment companies and security dealers, and the insurance and real estate industry all increased in 1976.

The community, business and personal service industries increased in 1976 at about the same rate as total RDP. Among the component industries movements were varied in 1976. The strongest growth in 1976 was in amusement and recreation, services to business management and accommodation and food services

There was a slowdown in the growth rate of public administration and defence in 1976 compared with 1972 to 1975 period. Slower growth in the provincial component is mainly responsible for the slowdown although there was also a reduction in growth rates for local administration and the non defence portion of federal administration.

Les finances, assurances et affaires immobilières progressèrent en 1976, comme à chaque année depuis 1971. Les banques, les établissements d'épargne et de crédit, les sociétés de placement et agents de change, les assurances et les affaires immobilières ont tous progressé.

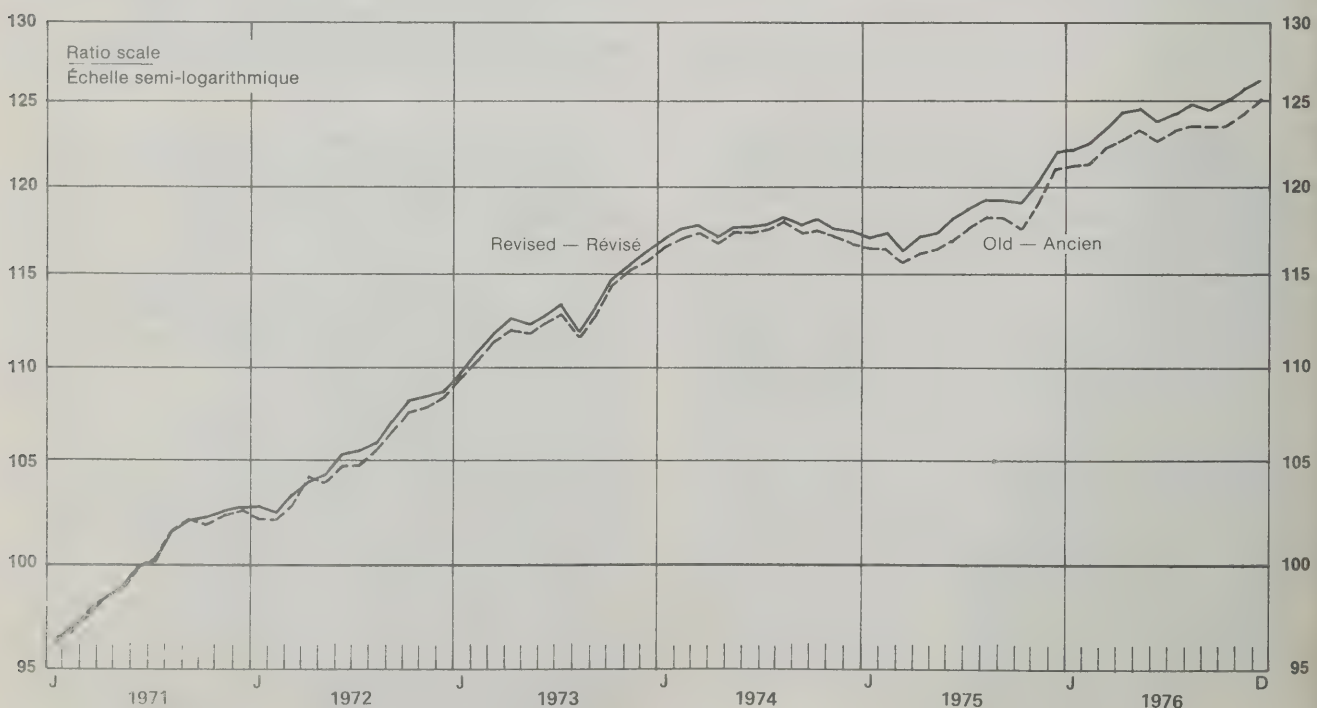

Les services socio-culturels, commerciaux et personnels ont augmenté en 1976 à peu près au même taux que le P.I.R. Les variations furent différentes pour les industries composantes. Les divertissements et loisirs, les services fournis aux entreprises et l'hébergement et la restauration connurent la plus forte croissance en 1976.

Il y eut un ralentissement dans le taux de croissance de l'administration publique et la défense en 1976 comparativement à la période de 1972 à 1975. Une diminution de la croissance de l'administration provinciale fut le principal facteur du ralentissement, bien qu'une réduction ait eu lieu dans le taux de croissance de l'administration locale et de l'administration fédérale excluant la défense.

A Note on CANSIM[®]

Data in this publication were retrieved from **CANSIM** (Canadian Socio-Economic Information Management System) and were manipulated and processed to create a photo-ready copy. All tabular data appearing in this publication, as well as many other data series, are available to the public from **CANSIM** via terminal, on computer printouts, or in machine readable form.

The pages 72 to 85 contain a list of Databank Numbers which can be used to access the series in **CANSIM**. For example, to retrieve Real Domestic Product, monthly, without seasonal adjustment, you must use "D 100215".

For further information write to **CANSIM**, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8, or call (613) 995-7406.

Note au sujet de CANSIM[®]

Les données figurant dans cette publication ont été extraites du **CANSIM** (Système canadien d'information socio-économique). Elles ont été traitées de façon à produire une copie destinée à la photocomposition. Toutes les données présentées dans cette publication et beaucoup d'autres données contenues dans le **CANSIM** peuvent être extraites par l'intermédiaire d'un terminal sous forme d'imprimés d'ordinateur ou sous une forme lisible par la machine.

Les pages 72 à 85 renferment une liste des numéros Databank qui peuvent être utilisés pour avoir accès aux séries du **CANSIM**. Ainsi, pour extraire le produit intérieur réel mensuel avant désaisonnalisation, il suffit d'utiliser "D 100215".

Pour plus de renseignements, écrivez à **CANSIM**, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphonez à (613) 995-7406.

Ottawa

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and on services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The indexes of Real Domestic Product by Industry (included the Catalogue Nos. carrying the prefix 61) provide "constant dollar" measures of the contribution of each industry to Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue Nos. with prefix 14).

Both the Input-Output Tables and Indexes of Real Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Also, provision is made in the System for incorporation of balance sheet (wealth) estimates when such data are sufficiently developed.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2 Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les indices du produit intérieur réel par industrie (compris dans les publications dont les numéros de catalogue commencent par 61) mesurent, en dollars constants, l'apport de chaque branche d'activité au produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le numéro de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les indices du produit intérieur réel. Les comptes de flux financiers (publications dont les numéros de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. En outre, le système a été conçu de façon à pouvoir incorporer les comptes de bilans (qui prennent pour objet le patrimoine) lorsque les données s'y rapportant seront suffisamment développées.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, n° 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

ERRATA

Page XVI, paragraph 3 (English) should read:

"The output of the wood industries depends mainly on the level of residential construction activity in the United States and Canada. Housing activity decreased in Canada in 1974 and began to decrease in the United States in 1973 with a resultant decrease in the output of the wood industries in 1974. In 1975, the output of the wood industries dropped to about their 1972 level as a result of a decline in housing starts in the United States (to about 60% of their 1973 level) and a drop in residential construction in Canada to its lowest level during the 1971-1977 period. In 1976 and 1977 output levels of the wood industries were higher reflecting increased United States housing starts and an advance in residential construction in Canada in 1976."

Page XVII, paragraph 2, last sentence should read:

La dernière phrase du deuxième paragraphe de la page XVII devrait se lire comme suit:

"A decline in Canada's share of world markets for nickel contributed to slow growth in smelting and refining. Strikes in aluminum refining in 1976 and in miscellaneous metal mining in 1975 also affected output levels."

"Les grèves qui se sont produites en 1976 dans le secteur de l'affinage de l'aluminium et en 1975 dans les mines métalliques diverses ont également eu une influence sur les niveaux de production."

NOTE RE: HISTORICAL CONTINUITY

On the 1971 base, a continuous record for 1971 of Real Domestic Product and the Index of Industrial Production and their components may be obtained from the following Statistics Canada publications:

61-213 *Real Domestic Product by Industry (1971 = 100)*, 1971-1977 issue, for the 1971-1977 period.

61-005 *Indexes of Real Domestic Product by Industry*, the May 1978 issue and current issues for the period beginning January 1978.

The same data are available in the following CANSIM matrices:

Real Domestic Product (including the Index of Industrial Production)

	Matrix numbers
Monthly	1122
Quarterly	1123
Annual	1124

For the period prior to 1971, selected annual data are available on a 1971 reference base. The data are available in CANSIM matrix 389 or can be made available upon request by contacting Mrs. M. Galea (613-995-0581), Industry Product Division, Statistics Canada, Ottawa, K1A 0T6.

To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically re-based to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Real Domestic Product and the Index of Industrial Production and the component indexes required for linkage to the 1971 based series may be obtained from the following Statistics Canada publications:

Indexes of Real Domestic Product by Industry - (1961 Base) Catalogue 61-506, for Real Domestic Product for the period from 1935-1960 and for the Index of Industrial Production for the period from 1919-1960.

Real Domestic Product by Industry, 1961-1971, 1961 = 100, Catalogue 61-516, for the period from 1961-1971.

REMARQUES SUR LA CONTINUITÉ CHRONOLOGIQUE

Les publications de Statistique Canada sous mentionnées peuvent servir à établir une continuité du produit intérieur réel et de l'indice de la production industrielle et de leurs composantes sur la base 1971 = 100 à partir de 1971:

61-213 *Produit intérieur réel par industrie (1971 = 100)*, publication consacrée à la période 1971-1977.

61-005 *Indices du produit intérieur réel par industrie*, l'édition de mai 1978 et les publications courantes présentent des données pour la période commençant en janvier 1978.

On peut obtenir les mêmes données des matrices suivantes de CANSIM:

Produit intérieur réel (y compris l'indice de la production industrielle)

	Numéros de matrice
Mensuel	1122
Trimestriel	1123
Annuel	1124

En ce qui concerne les années antérieures à 1971, certaines données par année sont disponibles sur la base 1971 = 100. On peut obtenir les données de la matrice 389 de CANSIM ou on peut se procurer ces données en s'adressant à Mme M. Galea (613-995-0581), Division du produit industriel, Statistique Canada, Ottawa, K1A 0T6.

Pour obtenir une continuité des données de ces années, les indices sur la base 1961 = 100 doivent être convertis arithmétiquement à l'année de référence 1971 en les multipliant par 100.0 et en divisant le produit obtenu par la valeur de l'indice de 1971 sur la base de 1961 = 100. Dans le cas de 1971 et des années antérieures, le produit intérieur réel et l'indice de la production industrielle et des composantes nécessaires au raccordement avec les séries dont l'année de référence est 1971 peuvent être tirés des publications suivantes:

Indexes of Real Domestic Product by Industry - (1961 Base) n° 61-506 au catalogue, produit intérieur réel pour la période 1935-1960 et indice de la production industrielle pour la période 1919-1960.

Produit intérieur réel par industrie, 1961-1971, 1961 = 100, n° 61-516 au catalogue, la période 1961-1971.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following CANSIM matrices:

	Matrix numbers
Real Domestic Product:	
Annual	383
Quarterly	15
Monthly	1421
Index of Industrial Production:	
Annual	384
Monthly	16

CONCEPTS, SOURCES AND METHODS

Catalogue 61-213 — Se rapporter à cette publication, qui contient les remarques techniques concernant les changements du produit intérieur réel qui ont entraîné l'introduction de la CAÉ de 1970 et l'adoption de l'année 1971 comme base de pondération et de référence.

SYMBOLS AND CODES

The interpretation of the symbols used in the table throughout this publication is as follows:

- .. figures not available.
- nil or zero.
- amount too small to be expressed.

S.I.C. code: The Standard Industrial Classification code appearing in the tables should be interpreted as follows:

An S.I.C. Division is indicated by one of the integers 1 to 11.

An S.I.C. Major group within the Division is indicated by two digits following the Division code and separated from it by a colon (:).

A 3- or 4 digit industry class is indicated by 3- or 4 digits respectively.

CONTENT OF SPECIAL INDUSTRY GROUPINGS

The industry content of these special groupings is defined as follows:

Real Domestic Product less agriculture: All industries less agriculture (S.I.C. 2 – 11).

Goods-producing industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); construction industry (S.I.C. 6); and electric power, gas and water utilities (S.I.C. 7:04).

Goods-producing industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; 7:04).

Service-producing industries: Transportation, storage and communication (S.I.C. 7:01-03); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); community, business and personal service industries (S.I.C. 10); and public administration and defence (S.I.C. 11).

Commercial industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); construction industry (S.I.C. 6); transportation, storage and communication (S.I.C. 7:01-03) less highway and bridge maintenance (S.I.C. 516); electric power (S.I.C. 572); gas distribution (S.I.C. 574); trade (S.I.C. 8); finance

SIGNES ET CODES CONVENTIONNELS

Voici la signification des signes et des codes conventionnels employés dans les tableaux:

- .. chiffre non disponible.
- néant ou zéro.
- chiffre infirme.

Code CAÉ: le code de la classification des activités économiques figurant aux tableaux doit être interprété comme suite:

Une branche de la CAÉ, est indiquée par un des nombres entiers de 1 à 11.

Un groupe de la CAÉ à l'intérieur d'une branche, est indiqué par deux chiffres qui suivent le code de la branche et sont séparés de celui-ci par deux points (:).

Une classe d'industrie à 3- ou 4 chiffres est indiquée par 3- ou 4 chiffres respectivement.

INDUSTRIES RÉUNIES DANS CHAQUE AGRÉGAT SPECIAL

Énumération des industries composant chaque groupe spécial ci-après:

Produit intérieur réel, moins l'agriculture: Toutes les industries, moins l'agriculture (CAÉ 2 – 11).

Industries productrices de biens: Agriculture (CAÉ 1); forêts (CAÉ 2); chasse et pêche (CAÉ 3); mines (y compris le broyage), carrières et puits de pétrole (CAÉ 4); industries manufacturières (CAÉ 5); bâtiment et travaux publics (CAÉ 6); et énergie électrique, gaz et eau (CAÉ 7:04).

Industries productrices de biens, moins l'agriculture: Le total du groupement précédent, moins l'agriculture (CAÉ 2-6; 7:04).

Industries productrices de services: Transports, entreposage et communications (CAÉ 7:01-03); commerce (CAÉ 8); finances, assurances et affaires immobilières (CAÉ 9); services socio-culturels, commerciaux et personnels (CAÉ 10); administration publique et défense (CAÉ 11).

Industries commerciales: Agriculture (CAÉ 1); forêts (CAÉ 2); chasse et pêche (CAÉ 3); mines (y compris broyage), carrières et puits de pétrole (CAÉ 4); industries manufacturières (CAÉ 5); bâtiment et travaux publics (CAÉ 6); transports, entreposage et communications (CAÉ 7:01-03); moins l'entretien des routes et des ponts (CAÉ 516); électricité (CAÉ 572); distribution de gaz (CAÉ 574); commerce (CAÉ 8);

insurance and real estate (S.I.C. 9); related health care institutions (S.I.C. 822); offices of physicians and surgeons (S.I.C. 823); offices of para-medical personnel (practitioners) (S.I.C. 824); offices of dentists (S.I.C. 825); diagnostic and therapeutic services n.e.s. (S.I.C. 826); miscellaneous health services (S.I.C. 827); amusement and recreation services (S.I.C. 10:04); services to business management (S.I.C. 10:05); personal services (S.I.C. 10:06) less private households (S.I.C. 873); accommodation and food services (S.I.C. 10:07); miscellaneous services (S.I.C. 10:08).

Commercial industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; part of 7; 8; 9 and part of 10).

Non-commercial industries: Highway and bridge maintenance (S.I.C. 516); water systems and other utilities (S.I.C. 576; 579); hospitals (S.I.C. 821); welfare organizations (S.I.C. 828); religious organizations (S.I.C. 831); private households (S.I.C. 873); education and related services (S.I.C. 10:01); and public administration and defence (S.I.C. 11).

Index of Industrial Production: Mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); and electric power, gas and water utilities (S.I.C. 7:04).

Note

1. Due to rounding, sub-annual detail may not average annual level.

2. For RDP purposes the content of S.I.C. Division 7 has been altered to include only transportation, storage and communication; electric power, gas, water and other utilities are excluded and measured separately, as a component of the Index of Industrial Production.

finances, assurances et affaires immobilières (CAÉ 9); établissements annexes de soins sanitaires (CAÉ 822); cabinets de médecin et de chirurgien (CAÉ 823); cabinets de praticiens paramédicaux (CAÉ 824); cabinets de dentiste (CAÉ 825); services de diagnostic et de soins n.c.a. (CAÉ 826); services de santé divers (CAÉ 827); divertissements et loisirs (CAÉ 10:04); services fournis aux entreprises (CAÉ 10:05); services personnels (CAÉ 10:06), moins ménages privés (CAÉ 873); hébergement et restauration (CAÉ 10:07); services divers (CAÉ 10:08).

Industries commerciales, moins l'agriculture: Le total du groupe précédent, moins l'agriculture (CAÉ 2-6; partie de 7; 8; 9 et partie de 10).

Industries non commerciales: Entretien des routes et des ponts (CAÉ 516); distribution d'eau et autres services d'utilité publique (CAÉ 576; 579); hôpitaux (CAÉ 821); organismes de bien-être (CAÉ 828); organisations culturelles (CAÉ 831); ménages (CAÉ 873); enseignement et services connexes (CAÉ 10:01); administration publique et défense (CAÉ 11).

Indice de la production industrielle: Mines (y compris le broyage), carrières et puits de pétrole (CAÉ 4); industries manufacturières (CAÉ 5); énergie électrique, gaz et eau (CAÉ 7:04).

Nota

1. En raison de l'arrondissement des chiffres, il se peut que la moyenne des données mensuelles et trimestrielles n'équivaille pas au niveau annuel.

2. Pour le calcul du PIR, la division 7 de la CAÉ a été modifiée de façon à inclure seulement les transports, l'entreposage et les communications. L'énergie électrique, le gaz, l'eau et les autres services d'utilité publique sont évalués séparément et font partie de l'indice de la production industrielle.

TECHNICAL NOTE

This report presents measures of Real Domestic Product (RDP) by industry for the 1971-1977 period on a 1971 time and weight base. It should also be noted that the 1970 Standard Industrial Classification is used in this publication. Underlying concepts and general methodology remain unchanged.

1971 Industry Weights

The estimates of 1971 Gross Domestic Product by industry have been revised for some industries since the previous annual publication. The revisions to the industry weights affect only the industrial distribution and not the aggregate value of the 1971 GDP and reflect the incorporation of the latest available data from Statistics Canada censuses and annual surveys. It continues to be necessary to exploit sources such as company annual reports and taxation records, as well as operating ratios from other sources. The currently-used 1971 GDP distributions are still subject to revision and can be finalized only after detailed reconciliation of all components of the System of National Accounts. It is expected, however, that the industrial distribution will not be substantially changed, particularly for the higher aggregates.

As shown by the table below, service-producing industries increased their share of total GDP in 1971 as compared with 1961. This represents a continuation of a trend apparent between 1949 to 1961, the two previous weight base periods.

	1949	1961	1971	
			Preliminary Préliminaire	Revised Révisé
Goods-producing industries — Industries de biens	53.080	44.233	40.754	40.572
Service-producing industries — Industries de services	46.920	55.767	59.246	59.428
Gross domestic product — Produit intérieur brut	100.000	100.000	100.000	100.000

Annual Measures

Annual measures as distinct from monthly projectors have been calculated for a number of additional industries. This includes a number of service-producing industries and in manufacturing, the industries for which annual levels have been prepared account for about 80% of total output compared to about 73% in the previous annual publication.

NOTE TECHNIQUE

Cette publication présente des mesures du produit intérieur réel (PIR) par industrie pour la période 1971-1977. Les bases de référence et de pondération de ces mesures sont celles de 1971. Il est à noter également que la Classification des activités économiques de 1970 est utilisée dans cette publication. Les concepts sous-jacents et la méthodologie générale n'ont pas changé.

Pondérations 1971 de l'industrie

Les estimations du produit intérieur réel par industrie pour 1971 furent révisées pour certaines industries depuis la dernière publication annuelle. Les révisions aux pondérations de l'industrie affectent seulement la distribution par industrie et non pas la valeur globale du PIB pour 1971 et reflètent l'incorporation des dernières données disponibles des recensements et des enquêtes annuelles de Statistique Canada. Il est encore nécessaire d'utiliser d'autres sources comme les rapports annuels des compagnies et les documents de l'impôt ainsi que des coefficients d'opération d'autres sources. La présente distribution du PIB de 1971 demeure sujette à révision et ne pourra être parachevée seulement qu'après une réconciliation détaillée de toutes les composantes du système de comptabilité nationale. Cependant, on s'attend à ce que la distribution industrielle ne changera pas tellement, surtout au niveau des agrégats majeurs.

Comme l'indique le tableau ci-dessous, comparative-ment à 1961, les industries de services tiennent une place plus importante dans le PIB total. Cette augmentation est la suite de la tendance apparue entre 1949 et 1961, les deux dernières années à servir de base aux pondérations.

Mesures annuelles

Des mesures annuelles différentes des projections mensuelles ont été calculées pour un plus grand nombre d'industries. Ceci concerne un certain nombre d'industries de service. Pour les industries manufacturières, le calcul se fit pour 80 % d'entre elles en termes de production comparativement à 73 % pour la dernière publication annuelle.

Monthly Measures

The monthly measures are changed to reflect revisions in the projectors, incorporation of the revised annual data and revisions to seasonal factors. For some industries, the methodology has been changed and some further refinements have been made to the 1971 base year unit values used to combine quantities of commodity outputs.

RDP in Constant Dollars

Appendix A of this publication contains constant dollars RDP by industry in 1971 prices. The constant dollar data have been derived by projecting GDP in the base year using the output indexes for each industry from Table 1.

Estimates in Current and Constant Dollars

At the end of the report (Appendix B), there is a special section on selected manufacturing industries, showing annual estimates of gross output, intermediate inputs and value added in current and constant dollars as well as the resultant implicit price indexes. The industrial detail consists of total manufacturing, all major groups, and selected 3-digit S.I.C. industries.

The current price (i) gross output (ii) intermediate input and (iii) value added series have been derived as follows:

- (i) For each industry, the value of total production obtained from the census of manufacturers is adjusted, where necessary, to include estimates of additional income items such as rentals. In calculating the value of production, the physical change in inventories has been valued in prices of the current period. Some additional modifications were made to maintain continuity where there were changes in the basis of the reports during the period or to convert the Census data from a fiscal to a calendar year basis.
- (ii) Intermediate inputs are derived by adding an estimate of the cost of purchased service inputs and indirect taxes to the cost of material inputs, supplies, containers, fuel and electricity, etc., obtained from the census of manufacturers. The service inputs were estimated as a fixed proportion of value-added in both current and constant dollars.
- (iii) Value added is derived residually, that is, it is the difference between gross outputs and intermediate inputs.

The implicit price indexes are derived by dividing each current price series by the corresponding constant price series. Since the deflation process is carried out at a detailed commodity level, thereby capturing the current period commodity structure, the resultant implicit price indexes should be considered as Paasche or currently weighted price indexes.

Mesures mensuelles

Les changements dans les mesures mensuelles proviennent de révisions dans les indicateurs, de l'introduction de données annuelles révisées et de révisions dans les facteurs saisonniers. Pour certaines industries, on changea la méthodologie et certaines améliorations furent apportées aux valeurs unitaires de l'année de base 1971 utilisées pour pondérer les quantités dans les indicateurs de production de marchandises.

PIR en dollars constants

L'appendice A de cette publication contient des données du PIR par industrie aux prix de 1971. Les données en dollars constants furent obtenues en projetant le PIR brut de l'année de base avec les indices de production de chaque industrie dans le tableau 1.

Estimations en dollars courants et constants

On trouve à la fin du rapport une section spéciale, l'appendice B, sur le groupe des industries manufacturières. Y sont présentées des estimations annuelles de la production brute, de la consommation intermédiaire et de la valeur ajoutée. Ces données sont disponibles pour l'ensemble des entreprises manufacturières, pour tous les agrégats principaux et pour certaines industries à 3 chiffres.

Les séries en prix courants (i) de la production brute, (ii) de la consommation intermédiaire et (iii) de la valeur ajoutée sont calculées comme suit:

- (i) Pour chaque industrie, l'estimation de la production totale, tirée du recensement manufacturier, est ajustée, si nécessaire, pour inclure certains revenus additionnels, par exemple, de location. Au moment du calcul, les variations matérielles des stocks ont été évaluées aux prix de la période courante. Certaines modifications additionnelles furent apportées en vue de conserver une continuité chronologique là où il y a eu des changements dans les structures des comptes rendus durant la période ou pour ajuster les données du recensement de l'année fiscale à l'année de calendrier.
- (ii) La consommation intermédiaire est obtenue en additionnant le coût des services achetés et les taxes indirectes aux coûts des matériaux, des fournitures, des contenants, du combustible et de l'électricité, etc., fournis par le recensement manufacturier. Les intrants de services furent estimés comme une proportion fixe de la valeur ajoutée en dollars courants et constants.
- (iii) La valeur ajoutée est dérivée de façon résiduelle, c'est-à-dire, qu'elle est la différence entre la production brute et la consommation intermédiaire.

Les indices implicites de prix proviennent de la division de chaque série en prix courants par la série correspondante en prix constants. Comme le dégonflement des données s'effectue pour une désagrégation poussée des produits, reflétant ainsi leur structure courante, les indices implicites qui en résultent devraient être considérés comme des indices de Paasche ou des indices de prix à pondération courante.

The current dollar data (for years other than the base years) were subjected to critical appraisal and rigorous time series analysis only to the extent necessary to achieve the primary objective of producing reliable estimates of RDP.

Consequently, the current dollar data, and therefore the implicit price indexes for the 1972-1975 period inclusive, should, on the whole, be considered to be less reliable than the constant price measures.

Linking RDP on a 1971 Base with RDP on a 1961 Base

Subject to rounding errors, a linked series can be calculated between the 1961- and 1971-based RDP series which are identical under the 1960 and 1970 S.I.C.'s using the index values for 1971. For a 1971-based series, the 1961-based series should be multiplied by 100.0 and divided by the index value for 1971 for the series on the 1961 base. For a continuous series on a 1961 base, the 1971-based series should be multiplied by the index value for 1971 for the series on a 1961 base and divided by 100.0.

The Revision to RDP

The revisions to the annual RDP indexes result from a number of different sources. In general, annual levels for an additional year have been calculated for all industries, for which annual levels were previously prepared, revisions to the data on which the previously published annual levels were based have been incorporated, and annual levels have been prepared for some additional industries.

The revisions to year-to-year movements in certain aggregates are included in following table. As can be seen from this table only the 1973 and 1976 movements were significantly altered from the previously published data. Goods-producing industries and service-producing industries have been revised upwards by approximately equal amounts in 1973. In 1976, the revision occurs mainly in the service-producing industries.

The monthly data have been revised due to the incorporation of annual levels, revisions to the monthly data on which the output indexes are based, changes in the methodology for several industries and revisions to the seasonal factors.

Les données en dollars courants (pour les années autres que l'année de base) furent l'objet d'une évaluation critique et d'une analyse de série chronologiques rigoureuse jusqu'au point nécessaire pour atteindre l'objectif primordial de produire des estimations solides du PIR.

En conséquence, les données en dollars courants et, par conséquent, les indices implicites de prix pour la période de 1972-1975 inclusivement devraient être considérés dans leur ensemble comme étant moins solides que les mesures en prix constants.

Raccordement du PIR sur la base 1971 = 100 au PIR sur la base 1961 = 100

Compte tenu des erreurs d'arrondissement, il est possible de calculer une série raccordée entre les séries du PIR dont les années de référence sont 1961 et 1971 et qui ont la même définition dans la CTI de 1961 et la CAÉ de 1970 en utilisant la valeur des indices de 1971. Dans le cas d'une série 1971 = 100, il faut multiplier les séries 1961 = 100 par 100.0 et diviser le produit obtenu par la valeur de l'indice de 1971 pour la série dont l'année de référence est 1961. En ce qui concerne les séries continues dont l'année de référence est 1961, il faut multiplier la série 1971 = 100 par la valeur de l'indice de 1971 pour la série sur la base 1961 et diviser le produit obtenu par 100.0.

Revisions au PIR

Les revisions aux indices annuels du PIR proviennent de nombreuses sources différentes. En général, des niveaux annuels ont été calculés pour une année supplémentaire pour toutes les industries, dont on avait déjà préparé les niveaux annuels auparavant. Des revisions furent incorporées aux données servant au calculs des niveaux annuels publiés antérieurement et ces derniers furent calculés pour certaines industries additionnelles.

Le tableau qui suit présente les revisions aux variations annuelles pour certains agrégats. Seulement les variations pour 1973 et 1976 connurent des modifications significatives par rapport aux données publiées antérieurement. Les industries de biens et celles de services connaissent des revisions à la hausse d'importance à peu près égale en 1973. En 1976, les revisions surviennent surtout dans les industries de services.

Les données mensuelles furent révisées, suite à l'incorporation des niveaux annuels, à des revisions aux données mensuelles elles-mêmes qui servent au calcul des indices de production, à des changements de méthodologie pour plusieurs industries et à des revisions aux facteurs saisonniers.

Revisions to Year-to-year Percentage Changes in Real Domestic Product and Major Aggregates

General Review 1971 - 1977

The Canadian Economy as measured by RDP grew in every year from 1971-1977. Growth rates were higher than the 1961-1971 average of 5.5% in 1973, about equal in 1972, slightly below in 1974 and 1976 and substantially lower in 1975 and 1977. The goods-producing industries were more volatile than the service producing industries with annual growth rates ranging from a decline of about 3% in 1975 to an increase of more than 8% in 1973 compared with an increase of about 3% in both 1975 and 1977 and more than 6½% in 1973 for the service-producing industries. The chart of the monthly indexes for goods-producing and service-producing industries demonstrates the difference in behaviour clearly. The service-producing industries have grown relatively steadily with only a slowdown in growth in 1974. The goods-producing industries have experienced two cyclical downturns of differing magnitude and duration. One downturn began in early 1974 and reached a trough 5% lower in early 1975. Another peak was reached in the second quarter

Revue générale de la période 1971 - 1977

L'économie canadienne, telle que la mesure le PIR, a progressé chaque année de 1971 - 1977. Par rapport à la moyenne de 5.5 % enregistrée pour la période 1961 - 1971, le taux de croissance a été supérieur en 1973, à peu près équivalent en 1972, légèrement inférieur en 1974 et 1976, et nettement inférieur en 1975 et 1977. Sur le plan de l'expansion, les industries productrices de biens ont évolué de façon beaucoup plus diverse que les industries productrices de services: l'activité des premières est passée d'une récession d'environ 3 % en 1975 à une expansion de plus de 8 % en 1973, tandis que les taux de croissance annuels des industries de services ont varié entre environ 3 % en 1975 et 1977 et plus de 6½ % en 1973. Le graphique indiquant les indices mensuels relatifs aux industries de biens et de services illustre clairement ces différences. Ainsi, les industries de services ont progressé d'une manière relativement régulière avec seulement un ralentissement de la croissance en 1974. Par contre, les industries de biens ont enregistré deux points de retournement conjoncturels d'une ampleur et d'une durée différentes: leur activité est

of 1976 and a trough (about 3% below the peak) about four months later. For 1977 output varied around a level of 121 throughout the year.

In the goods-producing industries, agriculture and fishing and trapping have shown little relationship to the growth rates of the total economy. For agriculture most of the variation was due to changes in crop production; the livestock component was more stable. Several factors have combined to produce this variation. Among them were growing conditions in Canada, poor crops in other countries and fertilizer shortages.

Changes in forestry output can be explained by changes in the production levels of pulp and paper mills and sawmills. In addition, there were strikes in the forestry industry in 1972 and in 1974 which tended to reduce output in those years.

Movements in the output of crude petroleum and natural gas have been the most significant single influence on total mining output. The crude petroleum and natural gas industry grew strongly in 1972 and 1973, declined from 1974-1976 and increased slightly in 1977. Reductions in the exports of crude oil and to a lesser extent moderation of demand by refineries were responsible for the decline. The decline in exports was the result of a change in Canadian Government policy designed to reduce exports of crude oil and increase the export price. The output of metal mines changed little from 1971-1977. Miscellaneous metal mines, the largest component of metal mining, increased strongly in 1973 and decreased sharply in 1975 (there was a strike in 1975). Output levels were little changed in 1976 and 1977 as world demand for nickel and copper was low. For the other main component, iron mines, more than three quarters of Canadian production is exported. The industry is therefore sensitive to the production levels of iron and steel mills in the United States. Strikes distorted the relationship in 1972, reducing the output of iron mines. In 1976 and 1977 the growth in iron mines was considerably higher than the growth in the output of United States mills. A shift towards the increasing use of Canadian ore which began in 1975 and a strike in United States iron mines during 1977 were responsible. In non-metal mines asbestos mines were affected by strikes in 1975 which reduced output about 30%. Most of the growth in non-metal mining was due to the increases in potash mining in 1973, 1974 and 1977.

Except for a levelling-off in 1974, foods and beverage manufacturers showed steady growth during the 1971-1977 period. The levelling-off is the result of widespread price increases during 1974.

entrée dans une phase descendante au début de 1974 et a atteint au début de 1975 un creux 5 % plus bas que le point de retournement; elle a atteint un autre sommet au deuxième trimestre de 1976 pour retomber dans un autre creux, approximativement 3 % en-dessous, environ quatre mois plus tard. La production a varié autour d'un niveau de 121 pendant toute l'année 1977.

Dans les industries productrices de biens, l'agriculture et la pêche et le piégeage ont peu suivi les taux de croissance de l'ensemble de l'économie. Dans le cas de l'agriculture, l'évolution a été due pour l'essentiel à des variations des récoltes, l'élevage restant plus stable, et a été le résultat de plusieurs facteurs, notamment les conditions de pousse au Canada, de mauvaises récoltes dans d'autres pays et des pénuries d'engrais.

Les fluctuations de la production forestière peuvent s'expliquer par les variations des niveaux de production atteints par les usines de pâtes et papiers et les scieries. De plus, des grèves dans ce secteur d'activité ont eu tendance à réduire la production forestière en 1972 et 1974.

Les variations de l'exploitation de pétrole brut et de gaz naturel ont été les facteurs les plus déterminants de la production minière totale: l'industrie du pétrole brut et du gaz naturel a progressé fortement en 1972 et 1973, régressé de 1974-1976 et légèrement remonté en 1977. La diminution de la production de pétrole brut a été due à une certaine modération de la demande des raffineries, mais surtout à la baisse des exportations, qui a résulté du fait que le gouvernement canadien a modifié sa politique en réduisant les contingents de ventes à l'étranger et en élevant le prix à l'exportation. La production des mines de métaux a peu varié de 1971-1977. Les mines de métaux divers, l'élément le plus important de cette branche d'activité, a enregistré une forte expansion en 1973 mais une brusque récession en 1975, à cause d'une grève cette année-là; les niveaux de production ont peu varié en 1976 et 1977, la demande mondiale de nickel et de cuivre étant restée faible. En ce qui concerne le principal autre élément des mines de métaux, les mines de fer, elles exportent plus des trois quarts de leur production et leur activité suit donc l'évolution de la sidérurgie aux États-Unis. La croissance des mines de fer a été réduite en 1972 par des grèves, et a été considérablement plus élevée en 1976 et 1977 que l'expansion de la production sidérurgique américaine, à cause d'un changement dans les approvisionnements qui a profité à partir de 1975 aux minerais canadiens et d'une grève qui a touché les mines de fer américaines en 1977. Dans le secteur des mines non métalliques, les mines d'amiante ont subi les contrecoups de grèves en 1975 qui ont réduit leur production d'environ 30 %; la croissance de ce secteur a été due pour l'essentiel à des augmentations de l'extraction de potasse en 1973, 1974 et 1977.

Mis à part un plafonnement en 1974, les industries des aliments et boissons ont enregistré une expansion stable au cours de la période 1971-1977. Le plafonnement a été causé par des hausses généralisées des prix en 1974.

The output of the meat and poultry sub-group declined in 1973, likely representing some resistance to the rapid price increases that occurred during the year. After 1973 when the rate of price increase slowed there was a return to more normal patterns of growth. In 1976 the slight price decline was accompanied by the largest output increase since 1971.

Output of the feed industry remained fairly low throughout the entire period. Output prices rose sharply in the latter part of 1973 as a result of reduced oilseed crops in the United States. These sharp increases in price resulted in little growth in the feed industry during the period.

The miscellaneous foods industry showed some weakness in 1974 and 1975. Much of this reflected the slowdown in the sugar and confectionery components. The demand for sugar moderated with the advent of steeply rising prices in November 1973. The price trend reached a peak in November 1974, more than 450% above the November 1973 level.

The miscellaneous food sector showed some recovery after 1975 but the group again slowed in 1977 due to declines in the miscellaneous food n.e.s., industry. Increases in coffee and tea prices were a factor in this decrease.

With the exception of 1974 and 1976 the beverage group showed reasonably strong growth during the period. There was a sharp strike related decline in 1974 in distilleries. Distilleries declined again in 1976 when exports fell by 8.8%. The output of the brewing industry increased strongly in 1972 and 1973 but slowed considerably in the years 1974-1977. Soft drink production was generally weak throughout the entire period. Increases in selling prices due to the sugar price increases reduced demand in 1974 and 1975. As price increases slowed in 1976 and 1977, output began to increase.

Production of Canadian wines grew slowly for the first three years of the period (due partly to a poor grape crop in 1972) and then entered a period of continuous decline as domestic wines met with increasingly stiff foreign competition. In 1971 imports of wine accounted for 32% of domestic sales, rising to 51% by 1977.

The rubber and plastic industries grew in each of the first four years of the period, declined in 1975 and increased in 1976 and 1977. The plastic fabricating industry was the fastest growing component of the major group more than doubling output by 1977. Output of plastic fabricators increased at a slower than

Dans le secteur de la viande et de la volaille, la production a décliné en 1973, vraisemblablement du fait d'une résistance à la hausse rapide des prix au cours de cette année-là, puis a retrouvé une croissance plus normale à la suite d'un ralentissement considérable du taux d'accroissement des prix. En 1976, une légère baisse des prix a été accompagnée de la plus forte expansion de la production depuis 1971.

Les quantités produites par l'industrie des aliments pour animaux sont restées assez faibles pendant toute la période. Une réduction des cultures oléagineuses aux États-Unis a provoqué de fortes hausses des prix à la production à la fin de 1973, qui ont elles-mêmes été responsables de la faible croissance enregistrée par l'industrie des aliments pour animaux au cours de la période.

Les industries alimentaires diverses ont manifesté certains signes de faiblesse en 1974 et 1975; cela a reflété en grande partie les ralentissements observés dans les domaines du sucre et de la confiserie, les prix du sucre ayant commencé à fortement augmenter en novembre 1973 et ayant atteint un sommet en novembre 1974, plus de 450 % par rapport à novembre 1973.

Le secteur a enregistré une certaine reprise après 1975, mais un nouveau ralentissement en 1977 dû à des baisses dans les industries alimentaires diverses n.c.a. Les hausses des prix du café et du thé ont joué un rôle important dans cette dernière baisse.

Sauf en 1974 et 1976, la croissance de l'industrie des boissons a été raisonnablement vigoureuse au cours de la période. Les distilleries ont subi une nette récession en 1974, à la suite d'une longue grève, puis un autre déclin en 1976 lorsque les exportations sont tombées de 8.8 %. La production des brasseries s'est fortement accrue en 1972 et 1973, mais a considérablement ralenti au cours des années 1974-1977. Quant à la production de boissons gazeuses, elle a été généralement faible pendant toute la période: en effet, la hausse des prix de vente, due à l'augmentation des prix du sucre, a réduit la demande en 1974 et 1975; lorsque l'accroissement des prix a fléchi en 1976 et 1977, la production a amorcé une reprise.

La production de vins canadiens a progressé lentement au cours des trois premières années de la période (en partie à cause d'une mauvaise récolte de raisins en 1972), puis est entrée dans une période de récession continue, les vins intérieurs devant faire face à une concurrence étrangère de plus en plus dure. En 1971, les importations de vins représentaient 32 % des ventes intérieures; cette proportion est montée à 51 % en 1977.

L'industrie du caoutchouc et des produits en matière plastique a crû pendant chacune des quatre premières années de la période, a fléchi en 1975 et remonté en 1976 et 1977. La fabrication d'articles en matière plastique, en doublant sa production en 1977, a été le secteur dont la croissance a été la plus rapide dans ce groupe; néanmoins,

normal rate in 1974 and decreased in 1975. The production of the rubber products industry fell in 1974 due to a number of strikes in the tire and tube manufacturing industry. In 1975, the general downturn in the economy reduced output in all components of the rubber products industry.

The pattern of growth of the textile industries is explained by movements in the synthetic textiles, carpet mat and rug, auto fabric and cloth accessories, and cotton yarn and cloth mills industries. Output in cotton yarn and cloth mills decreased in 1973, as prices increased sharply. Prices remained high and output low for the remainder of the period. Synthetic textiles prices began to increase in 1974, as petroleum prices increased, and output decreased. Output again decreased in 1975 and 1976 and increased in 1977. The carpet mat and rug industry has the same pattern of growth as residential construction although year-to-year changes are generally higher than residential construction (more than 20% in 1972 and 1973 compared with 10% and 7% for residential construction).

The output of the clothing industries kept pace with the output of clothing stores until 1974. In 1975 and 1976 rates of growth for clothing manufacturers were lower than clothing stores and imports of clothing increased strongly in both years. Output of clothing stores and clothing manufacturers declined slightly in 1977 and imports of clothing dropped about 10% due to restrictions introduced in 1976.

The output of the wood industries depends mainly on the level of residential construction activity in the United States and Canada. Housing activity decreased in Canada in 1974 and began to decrease in the United States in 1973 with a resultant decrease in the output of the wood industries in 1974. In 1975, the output of the wood industries dropped to about their 1972 level. As a result of a decline in housing starts in the United States (to about 60% of their 1973 level) and a drop in residential construction in Canada to its lowest level during the 1971-1977 period. In 1976 and 1977 output levels of the wood industries were higher reflecting increased United States housing starts and an advance in residential construction in Canada in 1976.

The movements in the furniture and fixtures industries correspond quite closely to movements in residential housing completions over the 1971-1976 period. Both furniture and fixtures and residential construction grew rapidly in 1972 and 1973 with real growth in furniture and fixtures averaging about 12% per year. In 1974 furniture and fixtures grew at a more

la production de ce secteur a progressé à un rythme inférieur à la normale en 1974 et a diminué en 1975. L'industrie des produits en caoutchouc a vu sa production tomber en 1974 à cause de plusieurs grèves dans la fabrication des pneus et chambre à air pour automobiles. En 1975, la conjoncture défavorable de l'ensemble de l'économie a réduit la production dans tous les secteurs de l'industrie des produits en caoutchouc.

L'allure de la croissance dans l'industrie textile s'explique par l'évolution des secteurs des textiles synthétiques, des tapis, des carpettes et de la moquette, des accessoires en tissus pour l'automobile, et de la filature et du tissage du coton. Dans l'industrie de la filature et du tissage du coton, la production a baissé en 1973 du fait d'une forte hausse des prix; les prix sont restés élevés et la production faible pendant tout le reste de la période. Les prix des textiles synthétiques ont commencé à s'accroître en 1974, sous l'effet de la hausse des prix du pétrole, et la production a baissé en 1974, 1975 et 1976 pour remonter en 1977. L'industrie des tapis, des carpettes et de la moquette a suivi l'évolution de la construction résidentielle, tout en amplifiant les fluctuations (une croissance de plus de 20 % en 1972 et 1973, contre 10 % et 7 % dans la construction résidentielle).

Dans l'industrie de l'habillement, la production a progressé au même rythme que l'activité des magasins de vêtements jusqu'en 1974. En 1975 et 1976, les taux de croissance réalisés par les fabricants de vêtements ont été inférieurs à ceux des ventes des magasins, et les importations de produits vestimentaires se sont fortement accrues au cours des deux années. La production des magasins et des fabricants a légèrement décliné en 1977 et, grâce aux restrictions introduites en 1976, les importations de vêtements sont tombées d'environ 10 %.

L'activité de l'industrie du bois dépend principalement des secteurs du bâtiment aux États-Unis et au Canada. L'activité du logement ayant diminué au Canada en 1974 et ayant commencé à décroître aux États-Unis en 1973, la production de l'industrie du bois a fléchi en 1974 pour ensuite tomber en 1975 à un niveau voisin de celui de 1972. Les mises en chantier aux États-Unis se situaient à environ 60 % de leur niveau de 1973, et la construction résidentielle au Canada avait atteint son plus bas niveau pour la période 1971-1977. En 1976 et 1977, les niveaux de production de l'industrie du bois ont augmenté, sous l'effet d'un accroissement des mises en chantier aux États-Unis et d'une reprise de la construction résidentielle au Canada en 1976.

Pour la période allant de 1971-1976, l'évolution de l'industrie du meuble et des articles d'ameublement a suivi de très près celle des logements terminés: la construction résidentielle et cette industrie ont rapidement progressé en 1972 et 1973, avec dans la dernière une croissance réelle moyenne d'environ 12 % par an. En 1974, l'industrie des meubles et des articles d'ameublement a crû

modest 1%. It was in this period of rapid growth, 1971 - 1973, that imports began to show significant gains. Most of the imports originated in the United States destined for Ontario. In 1975 and 1976 the industry continued to move with residential completions — declining in 1975 and increasing in 1976. The relationship is less evident in 1977, when residential completions increased almost 7% and furniture and fixtures recorded no growth.

The paper and allied industries grew steadily from 1971 - 1974 with newsprint mills operating near full capacity during 1974. In 1975 strikes severely depressed output in the industry. Increased capacity in the United States and a generally sluggish world market for pulp and paper had a moderating effect on the post-strike recovery. By 1977 newsprint mills were operating at 91% of capacity.

In the primary metal industries the two major components, iron and steel mills and smelting and refining, account for almost 80% of the output. Iron and steel mills which are primarily oriented to the domestic market recorded virtually the same year-to-year movements as durable manufacturing. The smelting and refining industry is export-oriented. A decline in Canada's share of world markets for nickel contributed to slow growth in smelting and refining. Strikes in aluminum refining in 1976 and in non-metal mining in 1975 also affected output levels.

In the metal fabricating industries and the machinery industries most of the components follow the general pattern of the goods-producing industries. Major exceptions are the fabricated structural metal and the ornamental and architectural metal industries which are construction-oriented.

The transportation equipment industries rose from 1971 - 1973, declined in 1974 and 1975 and then increased in 1976 and 1977. Motor vehicle parts and accessories exhibited the same pattern of growth but with higher peaks and lower troughs. In contrast, motor vehicle output advanced in every year over the period with a slowdown in the 1974 - 75 period.

Except for 1975 petroleum refineries grew in every year of the period. The substantial escalation in crude oil prices beginning in late 1973 were largely responsible for the decline in 1975 and the slow growth thereafter.

à un rythme plus modeste (1 %). C'est au cours de cette période de croissance rapide (1971 - 1973) que des gains importants ont été enregistrés par les importations, dont la plupart provenaient des États-Unis et se sont dirigées vers l'Ontario. En 1975 et 1976, l'industrie a continué à suivre l'évolution des logements terminés, déclinant en 1975 et croissant en 1976. La relation est moins évidente en 1977, lorsque l'expansion de l'industrie des meubles et des articles d'ameublement a été nulle et qu'il y a eu presque 7 % de plus de logements terminés.

L'industrie du papier et des activités connexes a crû de façon régulière de 1971 - 1974, les usines de papier journal fonctionnant presque à capacité au cours de 1974. En 1975, des grèves ont fait considérablement baisser la production de ce secteur. Un accroissement de la capacité de production aux États-Unis et un marché mondial généralement apathique dans le domaine des pâtes et papiers ont quelque peu modéré la reprise consécutive aux grèves; en 1977, les usines de papier journal travaillaient à 91 % de leur capacité.

Dans l'industrie de la première transformation des métaux, les deux principaux éléments, la sidérurgie et la fonte et l'affinage, ont été responsables de presque 80 % de la production. La sidérurgie, principalement orientée vers le marché intérieur, a enregistré pratiquement les mêmes variations annuelles que la fabrication des biens durables. L'industrie de la fonte et de l'affinage est, elle, orientée vers l'extérieur; une baisse de la part du Canada sur les marchés mondiaux du nickel a contribué à ralentir la croissance de cette branche d'activité. Les grèves qui se sont produites en 1976 dans le secteur de l'affinage de l'aluminium et en 1975 dans les mines non productrices de métaux ont également eu une influence sur les niveaux de production.

Dans les industries de fabrication de produits en métal et de machines, la plupart des branches ont suivi l'évolution générale des industries productrices de biens. Les principales exceptions ont été les industries de fabrication d'éléments de charpente métallique et de produits métalliques d'architecture et d'ornement, qui sont orientées vers le secteur du bâtiment.

Les industries d'équipement de transport ont progressé de 1971 - 1973, décliné en 1974 et 1975 et se sont redressées en 1976 et 1977. Les fabricants de pièces et accessoires d'automobiles ont suivi la même évolution, mais en amplifiant les écarts; par contre, la production de véhicules automobiles a progressé pendant chaque année de la période, avec un ralentissement en 1974 - 75.

À part en 1975, les raffineries de pétrole ont été en expansion pendant toutes les années de la période. La hausse considérable des prix du pétrole brut, amorcée à la fin de 1973, a été en grande partie responsable du déclin de 1975 et du ralentissement de la croissance par la suite.

Over the 1971 - 1977 the chemical and chemical products industries recorded a 4.2% growth rate compared with 3.1% for total manufacturing. The 1975 decline in the industry resulted from the general decrease in total manufacturing and in particular the strikes in pulp and paper manufacturing.

Growth in the construction industry was moderate but steady until 1977 when the industry declined by about 2%. During the first three years residential construction was very strong, offsetting the weakness in the other components. In 1974 and 1975, non-residential building construction and engineering construction were sources of considerable strength. Residential construction fell in both years declining close to 14% in total. In 1976 residential construction was the main source of growth — declines occurred in most other areas. The decline in 1977 came from a further weakening in non-residential building construction and a decline in residential construction.

Transportation output shows the same basic movement as the goods-producing industries. However, the industries mainly involved in transporting persons — air transport, interurban and rural bus transport, urban transit and taxicabs — show slowdowns in growth in 1975 but no declines. Air transport shows the greatest growth of the transportation industries. In 1972 and 1973 growth exceeded 16% and there was little increase in prices. Prices began to increase in the latter half of 1974 and output growth slowed with this trend continuing in 1975 and 1976. Urban transit output grew (with a slowdown in 1974 due to strikes in Montréal and Toronto) until about mid-1975. In the second half of the year output declined due to strikes followed by sharp price increases. Further price increases and strikes in 1976 and 1977 reduced output growth for both years.

Railway transport is the largest component of transportation and in year-to-year movement is similar to the goods-producing industries. Water transport output increased slowly over the period with a sharp decrease in 1974 due to strikes. Pipeline transport roughly followed the pattern of the crude petroleum and natural gas industries but with moderate declines in 1975 and 1976.

Most components of the communications group grew at a high rate over the 1971 - 1977 period. Growth in the post office was moderate with a strike related decline in 1975. For telephone systems, the growth was particularly strong. Long distance services was the fastest growing component in the industry.

Dans l'industrie chimique, le taux de croissance a été de 4.2 % de 1971 - 1977, contre 3.1 % pour l'ensemble des industries manufacturières. Le recul enregistré en 1975 par l'industrie chimique a été causé par une baisse générale des industries manufacturières et, de façon particulière, par des grèves dans les industries des pâtes et papiers.

La croissance du bâtiment et des travaux publics a été modérée mais stable jusqu'en 1977, année où ce secteur d'activité a baissé d'environ 2 %. Au cours des trois premières années, la construction résidentielle a été très forte et a compensé la faiblesse des autres branches. En 1974 et 1975, la construction de bâtiments non résidentiels et le génie ont été des sources de vigueur considérable, car la construction résidentielle est tombée au cours des deux années, déclinant de près de 14 % au total. En 1976, c'est la construction résidentielle qui a été la principale responsable de la croissance, des déclin ayant touché la plupart des autres branches. Le recul enregistré en 1977 a été dû à un nouvel affaiblissement de la construction de bâtiments non résidentiels et à une baisse de la construction résidentielle.

Dans les transports, l'activité a suivi fondamentalement la même évolution que les industries productrices de biens. Toutefois, les activités portant essentiellement sur le transport de personnes — transports aériens, interurbains et ruraux par autocar, urbains et par taxis — ont vu leur croissance ralentir en 1975 mais n'ont pas diminué. Ce sont les transports aériens qui ont enregistré la plus forte expansion; en 1972 et 1973, elle a dépassé 16 % et la hausse des tarifs a été faible; les prix ont commencé à monter au cours de la deuxième moitié de 1974 et l'expansion s'est ralentie, de même qu'en 1975 et 1976. Les transports urbains ont progressé (avec un ralentissement en 1974 à cause de grèves à Montréal et à Toronto) jusqu'à environ la mi-1975. Au cours de la seconde moitié de l'année, l'activité a décliné, des grèves ayant été suivies par de fortes hausses des prix; de nouvelles augmentations de prix et d'autres grèves en 1976 et 1977 ont réduit la croissance de ce secteur au cours de ces deux années.

Les transports ferroviaires constituent l'élément le plus important des transports, et leurs mouvements annuels correspondent à ceux des industries productrices de biens. Dans les transports par eau, l'expansion a été lente au cours de la période avec une brusque baisse due à des grèves en 1974. Quant aux transports par pipeline, ils ont suivi approximativement l'évolution des industries du pétrole brut et du gaz naturel, mais avec des fléchissements moins accentués en 1975 et 1976.

Dans les communications, la plupart des branches d'activité ont crû à un rythme élevé au cours de la période de 1971 - 1977. L'activité des postes a progressé à un rythme modéré, avec une baisse due à une grève en 1975. La croissance des réseaux de téléphonie a été particulièrement forte, du fait de l'accroissement très rapide des services interurbains.

Electric power, gas and water utilities increased strongly in the 1971 - 1974 period slowed down in 1975 and advanced again in 1976 and 1977. For electric power utilities the 1975 decline is the only decline in output in the 1961 - 1977 period. This was mainly the result of a decrease in the consumption of industrial users particularly pulp and paper. For gas distribution growth exceeded 30% from 1971 - 1974, compared with about 4% from 1974 - 1977. Growth rates for industrial and commercial consumers were higher than for residential consumers.

Trade output increased in every year with slow-downs in 1975 and 1977. Until 1975 retail and wholesale trade each showed roughly similar year-to-year increases. In 1975 retail trade increased and wholesale trade decreased and from 1975 - 1977 retail trade increased more quickly than wholesale trade. In retail trade most store types contributed to the growth in the 1972 - 1975 period including the two largest, motor vehicle dealers and department stores. The increase in output of motor vehicle dealers in 1975 was partly due to the removal of the retail sales tax in Ontario. Department stores' output continued to increase in 1976 and 1977 and motor vehicle dealers' output decreased. In 1976 food stores' output advanced almost 8%, by far its largest increase since 1971.

Finance, insurance and real estate increased in every year in the 1971 - 1977 period. This is a result of diverse movements in the component industries. Banks and other deposit accepting establishments increased at rates varying from 6% to more than 12% per year. Security brokers and dealers output varied widely from year to year decreasing in 1973, 1974 and 1976 and increasing in other years by amounts ranging from 10% to 30%. The insurance and real estate components increased in each year until 1977. Royalties increased from 1971 - 1973 declined from 1974 - 1976 and increased in 1977.

Community, business and personal services advanced in every year although growth rates were slightly lower beginning in 1975.

Education output increased slowly over the 1971 - 1977 period. Most of the growth occurred in universities and colleges and to a greater extent in non-university post-secondary education. There was little increase in primary and secondary education.

Le secteur de l'énergie électrique, du gaz et de l'eau a enregistré une forte expansion de 1971 - 1974, un ralentissement en 1975 et une reprise en 1976 et 1977. En ce qui concerne la production d'énergie électrique, la baisse de 1975 a été la seule de toute la période 1961 - 1977; elle a surtout été provoquée par une diminution de la consommation des utilisateurs industriels, particulièrement des industries de pâtes et papiers. Dans la distribution de gaz, la croissance a dépassé 30 % de 1971 - 1974, contre environ 4 % de 1974 - 1977. Les taux d'accroissement ont été plus élevés pour les utilisations industrielles et commerciales que pour la consommation résidentielle.

L'activité du commerce a progressé au cours de chaque année, avec des ralentissements en 1975 et 1977. Jusqu'en 1975, le commerce de gros et le commerce de détail ont enregistré des hausses annuelles à peu près semblables. En 1975, le commerce de détail a progressé et le commerce de gros a décliné, et de 1974 - 1977, l'expansion du premier a été plus rapide que celle du second. La plupart des éléments de la vente au détail ont contribué à la croissance de 1972 - 1975, y compris les deux plus importants, les détaillants en véhicules automobiles et les grands magasins; la progression des ventes d'automobiles au détail en 1975 a été en partie due à l'abolition de la taxe de vente en Ontario. L'activité des grands magasins a continué à s'accroître en 1976 et 1977, tandis que celle des détaillants en véhicules automobiles déclinait. En 1976, les magasins d'alimentation ont augmenté de près de 8 %, ce qui représente de loin leur plus forte croissance depuis 1971.

Les finances, assurances et affaires immobilières ont été en expansion pendant chaque année de la période de 1971 - 1977, à la suite de mouvements divers dans les branches qui composent ce secteur d'activité. Les banques et les autres établissements de dépôts ont progressé à des taux variant de 6 % à plus de 12 % par an. L'activité des agents de change et des courtiers en valeurs mobilières a été très variable d'une année à l'autre, diminuant en 1973, 1974 et 1976 et montant au cours des autres années à un rythme de 10 % à 30 %. Dans le domaine des agences d'assurances et des affaires immobilières, on a enregistré une expansion au cours de chaque année jusqu'en 1977. Les redevances ont augmenté de 1971 - 1973, diminué de 1974 - 1976, et se sont à nouveau accrues en 1977.

Les services socio-culturels, commerciaux et personnels ont progressé pendant toutes les années, à des taux de croissance toutefois légèrement inférieurs à partir de 1975.

Dans l'enseignement, l'activité a augmenté légèrement au cours de la période de 1971 - 1977. L'essentiel de la croissance a été observée dans les universités et collèges et, surtout, dans l'enseignement post secondaire non universitaire. Il y a eu peu d'augmentation dans l'enseignement primaire et secondaire.

In health and welfare most of the strength occurred in the welfare and the other components — hospital output advanced slowly from 1971-1977. Declines occurred in mental hospitals and federal, private and tuberculosis hospitals. Public general and allied hospitals increased at rates of 2% to 3% per year.

Amusement and recreation services and services to business management were among the fastest growing components of RDP. For amusement and recreation services the strength was widespread. Computer services account for most of the growth in services to business management.

Accommodation and food services output grew strongly in every year except 1975. The slowdown in 1975 resulted from a decrease in the output of hotels and motels and a reduction in the growth of restaurants, caterers and taverns.

Output of public administration and defence services increased in every year since 1971. The rate of increase slowed in the latter part of the period mainly due to a decline in provincial administration. Local administration was the fastest growing component over the entire period.

Dans le secteur des services médicaux et sociaux, la vigueur a été due pour l'essentiel aux services de bien-être et aux services divers, l'activité hospitalière n'ayant progressé que lentement de 1971-1977. L'activité a baissé dans les hôpitaux psychiatriques, fédéraux et privés et dans les centres pour tuberculeux, mais a augmenté dans les hôpitaux publics, généraux et spéciaux divers, à des taux variant de 2 % à 3 % par an.

Les divertissements et loisirs et les services fournis aux entreprises ont figuré parmi les branches du PIR qui ont le plus vite augmenté. Cette vigueur a été générale dans le cas des divertissements et loisirs, tandis que les services d'informatique ont été responsables de l'essentiel de la croissance des services fournis aux entreprises.

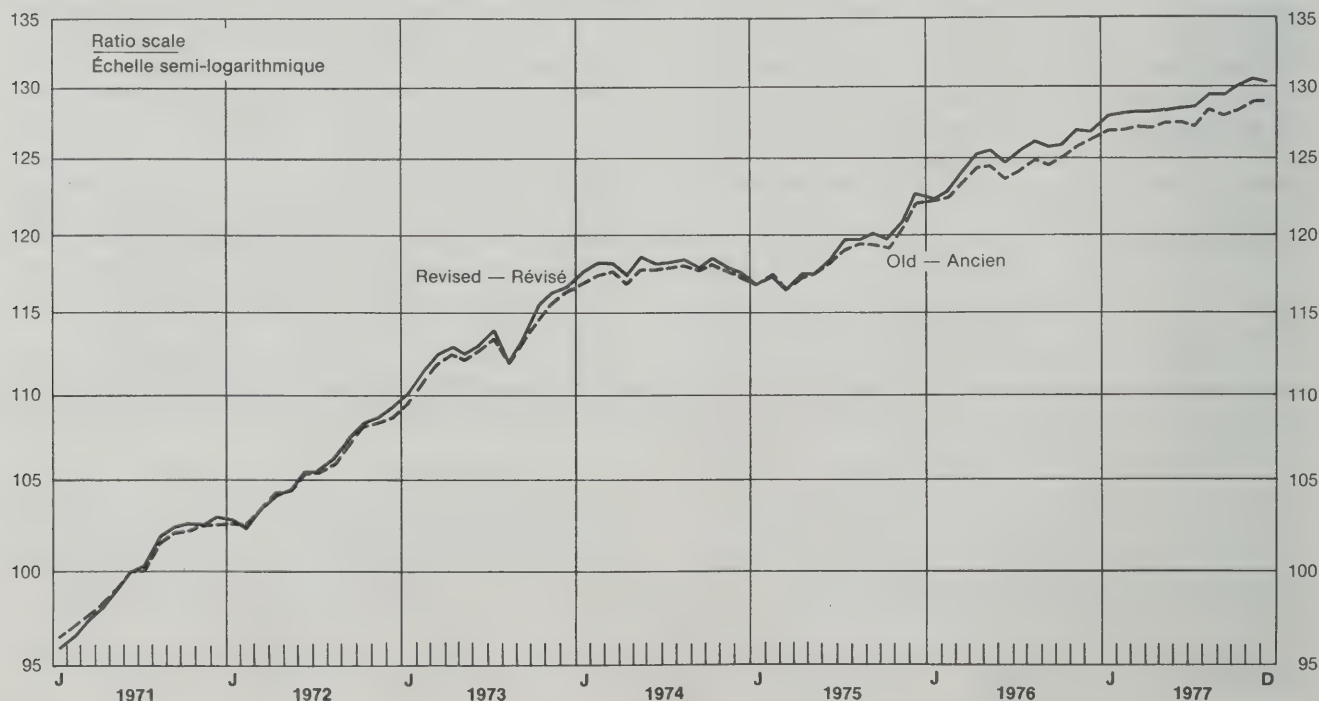

Le secteur de l'hébergement et de la restauration a progressé fortement au cours de chaque année, sauf en 1975. Le ralentissement de 1975 a été dû à une baisse de l'activité des hôtels et des motels et à une réduction de la croissance des restaurants, traiteurs et tavernes.

L'activité de l'administration publique et les services de défense ont progressé au cours de toutes les années depuis 1971. Le taux d'accroissement s'est ralenti au cours de la dernière partie de la période, principalement en raison d'un déclin dans les administrations provinciales. Ce sont les administrations locales qui ont crû le plus rapidement au cours de toute la période.

Comparison of Real Domestic Product Before and After Revision, by Months, 1971-1977

Comparaison du produit intérieur réel avant et après révision, par mois, 1971-1977

TABLEAU 1. Indices du produit intérieur réel, par industrie et par année (C.A.É. 1970) - suite

Indices: 1971 = 100

1976	1977	1978	1979	1980	1981	Industrie	C.A.É.	No
117.1	116.6					Industrie de l'habillement	5.07	42
115.3	113.4					Industrie des vêtements pour hommes	243	43
127.9	130.2					Industrie des vêtements pour, dames ..	244	44
107.4	101.7					Industrie des vêtements pour enfants ..	245	45
130.2	143.0					Industrie du bois	5.08	46
128.0	146.2					Scieries, ateliers de rabotage et usines de bardeaux.	251	47
116.2	125.8					Fabriques de placages et de contre-plaqués.	252	48
156.8	162.7					Industrie des portes, châssis et autres bois ouvrés.	254	49
123.3	123.3					Industrie du meuble et des articles d'ameublement.	5.09	50
						Industrie des meubles de maison	261	51
						Industrie des meubles de bureau	264	52
111.0	117.6					Industrie du papier et activités connexes.	5.10	53
108.1	116.8					Usines de pâtes et papiers	271	54
118.7	119.7					Fabricants de boîtes en carton et de sacs en papier.	273	55
113.5	116.4					Transformations diverses du papier...	274	56
125.3	127.6					Imprimerie, édition et activités connexes.	5.11	57
119.2	123.0					Imprimerie commerciale et industrie du clichage, de la composition et de la reliure commerciale.	286;287	58
130.9	131.9					Édition seulement et édition et impression.	288;289	59
108.0	116.7					Première transformation des métaux....	5.12	60
117.7	122.6					Sidérurgie	291	61
112.5	114.1					Fabriques de tubes et tuyaux d'acier ..	292	62
124.2	122.3					Fonderies de fer	294	63
84.9	105.9					Fonte et affinage	295	64
117.2	115.9					Fabrication de produits en métal (sauf machines et équipement de transport).	5.13	65
138.2	133.1					Industrie des produits métalliques d'architecture et d'ornement.	303	66
119.0	117.0					Industrie de l'emboutissage, du matriçage et du revêtement des métaux	304	67
107.9	118.5					Industrie du fil métallique et de ses produits.	305	68
145.8	144.3					Fabricants de quincaillerie, d'outillage et de coutellerie.	306	69
117.2	118.8					Fabrication de produits métalliques divers.	309	70
133.1	133.0					Fabrication de machines (sauf électriques).	5.14	71
119.7	123.1					Fabricants de machines et d'équipement divers.	315	72
129.9	138.6					Fabrication d'équipement de transport ..	5.15	73
97.8	112.6					Fabricants d'aéronefs et de pièces	321	74
152.3	165.6					Fabricants de véhicules automobiles et de carrosseries de camions et remorques.	323;324	75
124.7	136.4					Fabricants de pièces et accessoires d'automobiles.	325	76
122.4	91.5					Fabricants de matériel ferroviaire roulant.	326	77

TABLEAU 1. Indices du produit intérieur réel, par industrie et par année (C.A.É. 1970) — suite

Indices: 1971 = 100

1976	1977	1978	1979	1980	1981	Industrie	C.A.É.	No
133.2	134.9					COMMERCE	8	115
126.8	127.2					Commerce de gros	8:01	116
128.6	128.6					Grossistes	117
137.6	140.3					Commerce de détail	8:02	118
114.9	114.6					Magasins d'alimentation	119
142.1	144.4					Magasins de marchandises diverses	120
161.9	164.7					Grands magasins	121
108.5	110.1					Autres magasins de marchandises diverses	122
155.6	153.7					Détaillants en véhicules auto- mobiles	123
129.6	127.3					Magasins de vêtements	124
119.1	117.6					Quincailleries	125
147.3	145.7					Magasins de meubles, de téléviseurs, de radios et d'appareils ménagers	126
160.4	167.3					Pharmacies	127
134.0	142.6					FINANCES, ASSURANCES ET AFFAIRES IMMOBILIÈRES	9	128
148.2	161.2					Institutions financières	9:01	129
155.8	166.6					Banques et autres établissements de dépôts	701	130
104.5	139.1					Agents de change et courtiers en valeurs mobilières, (comprend la Bourse)	705	131
133.0	137.9					Assureurs	9:02	132
133.9	142.7					Agences d'assurances et affaires immo- bilières	9:03	133
129.8	137.0					Loyer imputé sur les logements habités par leur propriétaire	134
125.4	129.4					SERVICES SOCIO-CULTURELS, COMMERCIAUX ET PERSONNELS	10	135
108.6	109.9					Enseignement et services annexes	10:01	136
101.4	100.9					Ecoles primaires et secondaires	802	137
139.4	150.3					Centres de formation professionnelle, écoles de métier et collèges comme ciaux et établissements d'enseignement postsecondaire non universitaire	804;805	138
121.0	124.5					Universités et collèges	806	139
119.6	122.8					Services médicaux et sociaux	10:02	140
109.2	110.3					Hôpitaux	821	141
165.4	172.4					Divertissements et loisirs	10:04	142
166.8	175.4					Services fournis aux entreprises	10:05	143
411.5						Services d'informatique	853	144
128.4						Services de publicité	862	145
115.6						Etudes d'avocat et de notaire	866	146
113.1	114.6					Services personnels	10:06	147
109.2	109.5					Blanchisseries et établissements de nettoyage à sec (sauf en libre- service) et libre-service de blanchissage et de nettoyage à sec	874;876	148
106.1	107.7					Pompes funèbres	877	149
133.4	143.0					Hébergement et restauration	10:07	150
132.3						Hôtels et motels	881	151
134.1	148.5					Restaurants, traiteurs et tavernes	886	152

APPENDICES

APPENDIX A. Real Domestic Product by Industry, by Years, in Constant Dollars, (1970 S.I.C.)

No.	S.I.C.	Industry	1971 Weight = Pondé- ration 1971	1971	1972	1973	1974	1975
				\$'000,000				
1	1-11	REAL DOMESTIC PRODUCT	100.000	82,867.0	87,543.6	93,964.6	97,864.2	98,599.2
2	1	AGRICULTURE	3.371	2,793.4	2,463.8	2,500.1	2,290.6	2,561.5
3	2	FORESTRY802	664.9	680.9	823.8	783.3	648.9
4	3	FISHING AND TRAPPING178	147.9	141.2	148.5	133.1	127.2
5	4	MINES (including milling), QUARRIES AND OIL WELLS.	3.819	3,164.7	3,398.3	3,814.8	3,773.0	3,445.4
6	4-01	Metal mines	1.584	1,312.6	1,284.4	1,447.4	1,450.4	1,327.7
7	051;052	Placer gold and gold quartz mines ..	.059	48.9	44.5	39.7	34.2	34.8
8	058	Iron mines302	250.2	223.4	287.5	282.5	274.5
9	057;059	Other metal mines	1.223	1,013.5	1,016.5	1,120.2	1,133.7	1,018.4
10	059	Miscellaneous metal mines	1.168	967.9	962.1	1,070.5	1,080.2	960.2
11	4-02	Mineral fuels	1.492	1,236.4	1,465.6	1,660.0	1,584.8	1,467.6
12	061	Coal mines113	93.6	138.8	150.3	148.3	188.8
13	064	Crude petroleum and natural gas industry.	1.379	1,142.8	1,326.8	1,509.6	1,436.5	1,278.8
14	4-03	Non-metal mines (except coal mines) ..	.363	300.8	303.3	326.4	374.8	317.3
15	071	Asbestos mines169	140.1	142.9	146.5	154.7	106.3
16	5	MANUFACTURING INDUSTRIES	22.753	18,855.1	20,219.5	22,042.6	22,781.6	21,516.5
17	5-01	Food and beverage industries	3.107	2,574.4	2,675.0	2,740.9	2,741.7	2,767.1
18	101	Meat and poultry products indus- tries.	.476	394.4	402.5	398.0	428.8	431.8
19	1011	Slaughtering and meat processors ..	.410	339.7	342.8	336.6	371.6	375.0
20	1012	Poultry processors066	54.7	59.7	61.3	57.2	56.8
21	103	Fruit and vegetable processing industry.	.218	180.7	189.3	196.4	201.6	200.5
22	104	Dairy products industry387	321.0	319.7	314.3	334.8	338.3
23	105	Flour and breakfast cereal prod- ucts industry.	.064	53.2	52.8	49.0	50.6	51.9
24	106	Feed industry168	139.2	144.2	136.0	138.4	140.7
25	107	Bakery products industries345	285.9	300.8	298.5	289.2	280.5
26	108	Miscellaneous food industries562	465.7	483.8	502.0	493.4	490.3
27	1089	Miscellaneous food processors, n.e.s.	.351	290.9	301.7	311.0	323.5	326.4
28	109	Beverage industries727	602.5	651.0	712.0	694.9	727.9
29	1091	Soft drink manufacturers187	154.6	157.4	171.8	165.6	165.0
30	1092	Distilleries232	191.9	219.3	249.3	230.1	254.7
31	1093	Breweries283	234.5	251.6	267.8	274.1	284.4
32	5-02	Tobacco products industries212	175.7	180.6	186.1	198.9	198.7
33	5-03	Rubber and plastics products industries.	.650	538.6	613.3	704.2	717.0	663.5
34	162	Rubber products industries387	320.7	354.0	393.1	386.4	358.5
35	165	Plastics fabricating industry, n.e.s.	.263	217.9	259.3	311.2	330.6	305.1
36	5-04	Leather industries206	170.7	172.2	176.1	178.6	174.7
37	174	Shoe factories118	97.8	95.0	96.9	99.1	97.7
38	5-05	Textile industries769	637.3	721.9	769.4	749.6	719.0
39	181	Cotton yarn and cloth mills122	101.1	105.6	86.5	86.0	79.5
40	183	Man-made fibre, yarn and cloth mills.	.237	196.4	234.3	267.7	254.6	245.1
41	5-06	Knitting mills205	169.9	181.5	194.3	186.6	183.8

APPENDICE A. Produit intérieur réel, par industrie et par année, en dollars constants (C.A.É. 1970)

1976	1977	1978	1979	1980	1981	Industrie	C.A.É.	No
\$'000,000								
103,723.0	106,900.8					PRODUIT INTÉRIEUR RÉEL	1-11	1
2,910.7	2,829.7					AGRICULTURE	1	2
724.7	799.2					FORÊTS	2	3
149.9	131.3					CHASSE ET PÊCHE	3	4
3,487.2	3,616.5					MINES (y compris broyage) CARRIÈRES ET PUIITS DE PÉTROLE	4	5
1,396.5	1,435.9					Mines métalliques	4:01	6
36.5	36.0					Placers d'or et mines de quartz aurifère	051:052	7
339.3	328.5					Mines de fer	058	8
1,020.7	1,071.4					Autres mines métalliques	057:059	9
947.6	994.0					Mines métalliques diverses	059	10
1,379.1	1,408.5					Combustibles minéraux	4:02	11
181.4	196.0					Mines de charbon	061	12
1,197.7	1,212.5					Industrie du pétrole brut et du gaz naturel	064	13
354.6	390.8					Mines non métalliques (sauf mines de charbon)	4:03	14
146.3	151.0					Mines d'amiante	071	15
22,664.3	23,532.2					INDUSTRIES MANUFACTURIÈRES	5	16
2,853.7	2,891.8					Industrie des aliments et boissons	5:01	17
461.8	483.5					Industrie de la viande et de la volaille	101	18
						Abattage et conditionnement de la viande	1011	19
						Conditionnement de la volaille	1012	20
204.8	217.7					Préparation de fruits et de légumes	103	21
336.1	343.8					Industrie laitière	104	22
55.5	54.4					Meunerie et fabrication de céréales de table	105	23
143.4	151.2					Fabrication d'aliments pour les animaux	106	24
281.0	267.4					Boulangerie et pâtisserie (fabrication)	107	25
517.3	516.8					Industries alimentaires diverses	108	26
339.8	330.5					Traitement de produits alimentaires divers, n.c.a.	1089	27
726.3	744.3					Industrie des boissons	109	28
168.8	174.1					Fabricants de boissons gazeuses	1091	29
250.8	260.2					Distilleries	1092	30
285.2	288.7					Brasseries	1093	31
203.1	211.9					Industrie du tabac	5:02	32
783.1	888.7					Industrie du caoutchouc et des produits en matière plastique	5:03	33
421.0	425.9					Industrie des produits en caoutchouc	162	34
362.1	462.8					Fabrication d'articles en matière plastique, n.c.a.	165	35
175.6	158.3					Industrie du cuir	5:04	36
102.4	91.0					Fabriques de chaussures	174	37
730.0	749.3					Industrie textile	5:05	38
77.7	75.6					Filature et tissage du coton	181	39
241.0	276.5					Fabrication de fibres, filés et tissus artificiels et synthétiques	183	40
182.6	191.4					Bonneterie	5:06	41

APPENDICE A. Produit intérieur réel, par industrie et par année, en dollars constants (C.A.É. 1970) — suite

1976	1977	1978	1979	1980	1981	Industrie	C.A.É.	No
\$'000,000								
719.8	717.0					Industrie de l'habillement	5:07	42
295.3	290.4					Industrie des vêtements pour hommes	243	43
318.0	323.7					Industrie des vêtements pour dames ..	244	44
47.1	44.6					Industrie des vêtements pour enfants .	245	45
1,044.1	1,147.3					Industrie du bois	5:08	46
579.2	661.6					Scieries, ateliers de rabotage et usines de bardeaux.	251	47
139.7	151.2					Fabriques de placages et de contre-plaqués.	252	48
232.5	241.3					Industrie des portes, châssis et autres bois ouvrés.	254	49
429.1	429.1					Industrie du meuble et des articles d'ameublement.	5:09	50
						Industrie des meubles de maison	261	51
						Industrie des meubles de bureau	264	52
1,693.0	1,793.5					Industrie du papier et activités connexes.	5:10	53
1,186.0	1,281.4					Usines de pâtes et papiers	271	54
302.0	304.6					Fabricants de boîtes en carton et de sacs en papier.	273	55
174.9	179.4					Transformations diverses du papier...	274	56
1,165.7	1,187.6					Imprimerie, édition et activités connexes. _	5:11	57
534.4	551.4					Imprimerie commerciale et industrie du clichage, de la composition et de la reliure commerciale.	286;287	58
631.3	636.2					Édition seulement et édition et impression.	288;289	59
1,768.9	1,910.4					Première transformation des métaux....	5:12	60
916.8	954.9					Sidérurgie	291	61
83.9	85.1					Fabriques de tubes et tuyaux d'acier .	292	62
142.1	139.9					Fonderies de fer	294	63
432.7	539.7					Fonte et affinage	295	64
1,901.6	1,880.4					Fabrication de produits en métal (sauf machines et équipement de transport).	5:13	65
186.7	179.8					Industrie des produits métalliques d'architecture et d'ornement.	303	66
443.8	436.3					Industrie de l'emboutissage, du matriçage et du revêtement des métaux.	304	67
213.9	234.9					Industrie du fil métallique et de ses produits.	305	68
219.9	217.6					Fabricants de quincaillerie, d'outillage et de coutellerie.	306	69
267.1	270.7					Fabrication de produits métalliques divers.	309	70
1,104.5	1,103.3					Fabrication de machines (sauf électriques).	5:14	71
740.0	761.0					Fabricants de machines et d'équipement divers.	315	72
2,768.4	2,953.0					Fabrication d'équipement de transport ..	5:15	73
236.7	272.5					Fabricants d'aéronefs et de pièces	321	74
1,306.1	1,420.2					Fabricants de véhicules automobiles et de carrosseries de camions et remorques.	323;324	75
863.9	945.0					Fabricants de pièces et accessoires d'automobiles.	325	76
130.8	97.8					Fabricants de matériel ferroviaire roulant.	326	77

Real Domestic Product CANSIM Matrices
Matrices de CANSIM du produit intérieur réel

S.I.C. — CAÉ	Industry — Industrie	Matrix number – Numéro de matrice					
		1122		1123		Annual – Annuelles	
		Monthly — Mensuelle		Quarterly — Trimestrielle		1124	385
		Indexes without seasonal adjustment — Indices non désaison- nalisés	Seasonally adjusted indexes — Indices désaison- nalisés	Indexes without seasonal adjustment — Indices non désaison- nalisés	Seasonally adjusted indexes — Indices désaison- nalisés	Indexes — Indices	Constant dollars — Dollars constants
		databank numbers – numéros dans la banque de données					
1-11	REAL DOMESTIC PRODUCT – PRODUIT INTÉ- RIEUR RÉEL	D 100215	D 100554	D 100328	D 100441	D 100102	D 100700
1	AGRICULTURE – AGRICULTURE	D 100216	D 100555	D 100329	D 100442	D 100103	D 100701
2	FORESTRY – FORÊTS	D 100217	D 100556	D 100330	D 100443	D 100104	D 100702
3	FISHING AND TRAPPING – CHASSE ET PÊCHE	D 100218	D 100557	D 100331	D 100444	D 100105	D 100703
4	MINES (including milling), QUARRIES AND OIL WELLS – MINES (y compris broyage), CARRIÈRES ET PUITES DE PÉTROLE	D 100219	D 100558	D 100332	D 100445	D 100106	D 100704
4:01	Metal mines – Mines métalliques	D 100220	D 100559	D 100333	D 100446	D 100107	D 100705
051;052	Placer gold and gold quartz mines – Placers d'or et mines de quartz aurifère	D 100221	D 100560	D 100334	D 100447	D 100108	D 100706
058	Iron mines – Mines de fer	D 100222	D 100561	D 100335	D 100448	D 100109	D 100707
057;059	Other metal mines – Autres mines métalliques . .	D 100223	D 100562	D 100336	D 100449	D 100110	D 100708
059	Miscellaneous metal mines – Mines métalliques diverses	--	--	--	--	D 100667	D 100681
4:02	Mineral fuels – Combustibles minéraux	D 100224	D 100563	D 100337	D 100450	D 100111	D 100709
061	Coal mines – Mines de charbon	D 100225	D 100564	D 100338	D 100451	D 100112	D 100710
064	Crude petroleum and natural gas industry – In- dustrie du pétrole brut et du gaz naturel	D 100226	D 100565	D 100339	D 100452	D 100113	D 100711
4:03	Non-metal mines (except coal mines) – Mines non métalliques (sauf mines de charbon)	D 100227	D 100566	D 100340	D 100453	D 100114	D 100712
071	Asbestos mines – Mines d'amiante	D 100228	D 100567	D 100341	D 100454	D 100115	D 100713
5	MANUFACTURING INDUSTRIES – INDUSTRIES MANUFACTURIÈRES	D 100229	D 100568	D 100342	D 100455	D 100116	D 100714
5:01	Food and beverage industries – Industrie des ali- ments et boissons	D 100230	D 100569	D 100343	D 100456	D 100117	D 100715
101	Meat and poultry products industries – Industrie de la viande et de la volaille	D 100231	D 100570	D 100344	D 100457	D 100118	D 100716
1011	Slaughtering and meat processors – Abattage et conditionnement de la viande	--	--	--	--	D 100668	D 100682
1012	Poultry processors – Conditionnement de la volaille	--	--	--	--	D 100669	D 100683
103	Fruit and vegetable processing industry – Prépara- tion de fruits et de légumes	--	--	--	--	D 102300	D 102208
104	Dairy products industry – Industrie laitière	D 100232	D 100571	D 100345	D 100458	D 100119	D 100717
105	Flour and breakfast cereal products industry – Meunerie et fabrication de céréales de table	D 100233	D 100572	D 100346	D 100459	D 100120	D 100718
106	Feed industry – Fabrication d'aliments pour les animaux	D 100234	D 100573	D 100347	D 100460	D 100121	D 100719
107	Bakery products industries – Boulangerie et pâti- serie (fabrication)	D 100235	D 100574	D 100348	D 100461	D 100122	D 100720
108	Miscellaneous food industries – Industries alimen- taires diverses	--	--	--	--	D 102301	D 102209
1089	Miscellaneous food processors, n.e.s. – Traite- ment de produits alimentaires divers, n.c.a.	--	--	--	--	D 102302	D 102210
109	Beverage industries – Industrie des boissons	D 100236	D 100575	D 100349	D 100462	D 100123	D 100721
1091	Soft drink manufactures – Fabricants de boi- ssons gazeuses	--	--	--	--	D 100670	D 100684
1092	Distilleries – Distilleries	D 100237	D 100576	D 100350	D 100463	D 100124	D 100722
1093	Breweries – Brasseries	D 100238	D 100577	D 100351	D 100464	D 100125	D 100723

		Indexes without seasonal adjustment — Indices non désaisonnalisés	Seasonally adjusted indexes — Indices désaisonnalisés	Indexes without seasonal adjustment — Indices non désaisonnalisés	Seasonally adjusted indexes — Indices désaisonnalisés	1124	385
						Indexes — Indices	Constant dollars — Dollars constants
databank numbers – numéros dans la banque de données							
5:02	Tobacco products industries – Industrie du tabac	D 100239	D 100578	D 100352	D 100465	D 100126	D 100724
5:03	Rubber and plastics products industries – Industrie du caoutchouc et des produits en matière plastique	D 100240	D 100579	D 100353	D 100466	D 100127	D 100725
162	Rubber products industries – Industrie des produits en caoutchouc	D 100241	D 100580	D 100354	D 100467	D 100128	D 100726
165	Plastics fabricating industry, n.e.s. – Fabrication d'articles en matière plastique, n.c.a.	--	--	--	--	D 100672	D 100685
5:04	Leather industries – Industrie du cuir	D 100242	D 100581	D 100355	D 100468	D 100129	D 100727
174	Shoe factories – Fabriques de chaussures	--	--	--	--	D 102303	D 102211
5:05	Textile industries – Industrie textile	D 100243	D 100582	D 100456	D 100469	D 100130	D 100728
181	Cotton yarn and cloth mills – Filature et tissage du coton	--	--	--	--	D 100673	D 100686
183	Man-made fibre, yarn and cloth mills – Fabrication de fibres, filés et tissus artificiels et synthétiques	--	--	--	--	D 100674	D 100693
5:06	Knitting mills – Bonneterie	D 100244	D 100583	D 100357	D 100470	D 100131	D 100729
5:07	Clothing industries – Industrie de l'habillement	D 100245	D 100584	D 100358	D 100471	D 100132	D 100730
243	Men's clothing industries – Industries des vêtements pour hommes	--	--	--	--	D 100675	D 100687
244	Women's clothing industries – Industrie des vêtements pour dames	--	--	--	--	D 100676	D 100688
245	Children's clothing industry – Industrie des vêtements pour enfants	--	--	--	--	D 100677	D 100689
5:08	Wood industries – Industrie du bois	D 100246	D 100585	D 100359	D 100472	D 100133	D 100731
251	Sawmills, planing mills and shingle mills – Scieries, ateliers de rabotage et usines de bardeaux	D 100247	D 100586	D 100360	D 100473	D 100134	D 100732
252	Veneer and plywood mills – Fabriques de placages et de contre-plaques	D 100248	D 100587	D 100361	D 100474	D 100135	D 100733
254	Sash, door and other millwork plants – Industrie des portes, châssis et autres bois ouvrés	--	--	--	--	D 102342	D 102250
5:09	Furniture and fixture industries – Industrie du meuble et des articles d'ameublement	D 100249	D 100588	D 100362	D 100475	D 100136	D 100734
261	Household furniture manufacturers – Industrie des meubles de maison	--	--	--	--	D 100678	D 100690
264	Office furniture manufacturers – Industrie des meubles de bureau	--	--	--	--	D 100679	D 100691
5:10	Paper and allied industries – Industrie du papier et activités connexes	D 100250	D 100589	D 100363	D 100476	D 100137	D 100735
271	Pulp and paper mills – Usines de pâtes et papiers	D 100251	D 100590	D 100364	D 100477	D 100138	D 100736
273	Paper box and bag manufacturers – Fabricants de boîtes en carton et de sacs en papier	--	--	--	--	D 102304	D 102212
274	Miscellaneous paper converters – Transformations diverses du papier	--	--	--	--	D 102305	D 102213
5:11	Printing, publishing and allied industries – Imprimerie, édition et activités connexes	D 100252	D 100591	D 100365	D 100478	D 100139	D 100737
286;287	Commercial printing, platemaking typesetting and trade bindery – Imprimerie commerciale et industrie du clichage, de la composition et de la reliure commerciale	--	--	--	--	D 102306	D 102214
288;289	Publishing only, publishing and printing – Édition seulement, édition et impression	--	--	--	--	D 102307	D 102215
5:12	Primary metal industries – Première transformation des métaux	D 100253	D 100592	D 100366	D 100479	D 100140	D 100738
291	Iron and steel mills – Sidérurgie	D 100254	D 100593	D 100367	D 100480	D 100141	D 100739
292	Steel pipe and tube mills – Fabriques de tubes et tuyaux d'acier	D 100255	D 100594	D 100368	D 100481	D 100142	D 100740
294	Iron foundries – Fonderies de fer	D 100256	D 100595	D 100369	D 100482	D 100143	D 100741
295	Smelting and refining – Fonte et affinage	D 100257	D 100596	D 100370	D 100483	D 100144	D 100742

A Note on CANSIM[®]

Data in this publication were retrieved from **CANSIM** (Canadian Socio-Economic Information Management System) and were manipulated and processed to create a photo-ready copy. All tabular data appearing in this publication, as well as many other data series, are available to the public from **CANSIM** via terminal, on computer printouts, or in machine readable form.

The pages 109 to 126 contain a list of Databank Numbers which can be used to access the series in **CANSIM**. For example, to retrieve Real Domestic Product, monthly, without seasonal adjustment, you must use "D 100215".

For further information write to **CANSIM**, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8, or call (613) 995-7406.

Note au sujet de CANSIM[®]

Les données figurant dans cette publication ont été extraites du **CANSIM** (Système canadien d'information socio-économique). Elles ont été traitées de façon à produire une copie destinée à la photocomposition. Toutes les données présentées dans cette publication et beaucoup d'autres données contenues dans le **CANSIM** peuvent être extraites par l'intermédiaire d'un terminal sous forme d'imprimés d'ordinateur ou sous une forme lisible par la machine.

Les pages 109 à 126 renferment une liste des numéros Databank qui peuvent être utilisés pour avoir accès aux séries du **CANSIM**. Ainsi, pour extraire le produit intérieur réel mensuel avant désaisonnalisation, il suffit d'utiliser "D 100215".

Pour plus de renseignements, écrivez à **CANSIM**, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphones à (613) 995-7406.

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and on services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The indexes of Real Domestic Product by Industry (included the Catalogue Nos. carrying the prefix 61) provide "constant dollar" measures of the contribution of each industry to Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue Nos. with prefix 14).

Both the Input-Output Tables and Indexes of Real Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Also, provision is made in the System for incorporation of balance sheet (wealth) estimates when such data are sufficiently developed.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2 Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les indices du produit intérieur réel par industrie (compris dans les publications dont les numéros de catalogue commencent par 61) mesurent, en dollars constants, l'apport de chaque branche d'activité au produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le numéro de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les indices du produit intérieur réel. Les comptes de flux financiers (publications dont les numéros de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. En outre, le système a été conçu de façon à pouvoir incorporer les comptes de bilans (qui prennent pour objet le patrimoine) lorsque les données s'y rapportant seront suffisamment développées.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, n° 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE RE: HISTORICAL CONTINUITY

On the 1971 base, a continuous record from 1971 of Real Domestic Product and the Index of Industrial Production and their components may be obtained from the following Statistics Canada publications:

61-213 *Real Domestic Product by Industry (1971 = 100)*, 1971-1978 issue, for the 1971-1978 period.

61-005 *Indexes of Real Domestic Product by Industry*, the April 1979 issue and current issues for the period beginning January 1979.

The same data are available in the following CANSIM matrices:

Real Domestic Product (including the Index of Industrial Production)

	Matrix numbers
Monthly	1122
Quarterly	1123
Annual	1124

For the period prior to 1971, selected annual data are available on a 1971 reference base. The data are available in CANSIM matrix 389 or can be made available upon request by contacting Mrs. M. Galea (613-995-0581), Industry Product Division, Statistics Canada, Ottawa, K1A 0T6.

To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically re-based to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Real Domestic Product and the Index of Industrial Production and the component indexes required for linkage to the 1971 based series may be obtained from the following Statistics Canada publications:

Indexes of Real Domestic Product by Industry - (1961 Base) Catalogue 61-506, for Real Domestic Product for the period from 1935-1960 and for the Index of Industrial Production for the period from 1919-1960.

Real Domestic Product by Industry, 1961-1971, 1961 = 100, Catalogue 61-516, for the period from 1961-1971.

REMARQUES SUR LA CONTINUITÉ CHRONOLOGIQUE

Les publications de Statistique Canada sous mentionnées peuvent servir à établir une continuité du produit intérieur réel et de l'indice de la production industrielle et de leurs composantes sur la base 1971 = 100 à partir de 1971:

61-213 *Produit intérieur réel par industrie (1971 = 100)*, publication consacrée à la période 1971-1978.

61-005 *Indices du produit intérieur réel par industrie*, l'édition d'avril 1979 et les publications courantes présentent des données pour la période commençant en janvier 1979.

On peut obtenir les mêmes données des matrices suivantes de CANSIM:

Produit intérieur réel (y compris l'indice de la production industrielle)

	Numéros de matrice
Mensuel	1122
Trimestriel	1123
Annuel	1124

En ce qui concerne les années antérieures à 1971, certaines données par année sont disponibles sur la base 1971 = 100. On peut obtenir les données de la matrice 389 de CANSIM ou on peut se procurer ces données en s'adressant à Mme M. Galea (613-995-0581), Division du produit industriel, Statistique Canada, Ottawa, K1A 0T6.

Pour obtenir une continuité des données de ces années, les indices sur la base 1961 = 100 doivent être convertis arithmétiquement à l'année de référence 1971 en les multipliant par 100.0 et en divisant le produit obtenu par la valeur de l'indice de 1971 sur la base de 1961 = 100. Dans le cas de 1971 et des années antérieures, le produit intérieur réel et l'indice de la production industrielle et des composantes nécessaires au raccordement avec les séries dont l'année de référence est 1971 peuvent être tirés des publications suivantes:

Indexes of Real Domestic Product by Industry - (1961 Base) n° 61-506 au catalogue, produit intérieur réel pour la période 1935-1960 et indice de la production industrielle pour la période 1919-1960.

Produit intérieur réel par industrie, 1961-1971, 1961 = 100, n° 61-516 au catalogue, la période 1961-1971.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following CANSIM matrices:

	Matrix numbers
Real Domestic Product:	
Annual	383
Quarterly	15
Monthly	1421
Index of Industrial Production:	
Annual	384
Monthly	16

CONCEPTS, SOURCES AND METHODS

Catalogue 61-506 — Se reporter à cette publication, qui présente les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'ont entraîné l'application de la Classification type des industries de 1960 et l'adoption de l'année 1961 comme base de pondération et de référence.

Catalogue 61-510F — Se reporter à cette publication, qui contient les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'a entraîné l'introduction du concept "d'activité totale".

Catalogue 61-516 — Se rapporter à cette publication qui contient les remarques techniques concernant l'introduction d'estimations annuelles du produit intérieur réel par industrie exprimées en dollars constants, l'incorporation des résultats du recensement du commerce et de services de 1971 pour plusieurs industries de services, l'introduction de données annuelles pour certaines industries manufacturières concernant la production brute, nette et la consommation intermédiaire aux prix courants et constants (de 1961) et les indices implicites de prix correspondants et l'adoption du régime de pondération finale de 1961.

Catalogue 61-213 — Se rapporter à cette publication, qui contient les remarques techniques concernant les changements du produit intérieur réel qui ont entraîné l'introduction de la CAÉ de 1970 et l'adoption de l'année 1971 comme base de pondération et de référence.

SYMBOLS AND CODES

The interpretation of the symbols used in the table throughout this publication is as follows:

- .. figures not available.
- nil or zero.
- amount too small to be expressed.

S.I.C. code: The Standard Industrial Classification code appearing in the tables should be interpreted as follows:

An S.I.C. Division is indicated by one of the integers 1 to 11.

An S.I.C. Major group within the Division is indicated by two digits following the Division code and separated from it by a colon (:).

A 3- or -4 digit industry class is indicated by 3- or -4 digits respectively.

CONTENT OF SPECIAL INDUSTRY GROUPINGS

The industry content of these special groupings is defined as follows:

Real Domestic Product less agriculture: All industries less agriculture (S.I.C. 2 — 11).

Goods-producing industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); construction industry (S.I.C. 6); and electric power, gas and water utilities (S.I.C. 7:04).

Goods-producing industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; 7:04).

Service-producing industries: Transportation, storage and communication (S.I.C. 7:01-03); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); community, business and personal service industries (S.I.C. 10); and public administration and defence (S.I.C. 11).

Commercial industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); construction industry (S.I.C. 6); transportation, storage and communication (S.I.C. 7:01-03) less highway and bridge maintenance (S.I.C. 516); electric power (S.I.C. 572); gas distribution (S.I.C. 574); trade (S.I.C. 8); finance

SIGNES ET CODES CONVENTIONNELS

Voici la signification des signes et des codes conventionnels employés dans les tableaux:

- .. chiffre non disponible.
- néant ou zéro.
- chiffre infirme.

Code CAÉ: le code de la classification des activités économiques figurant aux tableaux doit être interprété comme suite:

Une branche de la CAÉ, est indiquée par un des nombres entiers de 1 à 11.

Un groupe de la CAÉ à l'intérieur d'une branche, est indiqué par deux chiffres qui suivent le code de la branche et sont séparés de celui-ci par deux points (:).

Une classe d'industrie à 3- ou -4 chiffres est indiquée par 3- ou -4 chiffres respectivement.

INDUSTRIES RÉUNIES DANS CHAQUE AGRÉGAT SPECIAL

Énumération des industries composant chaque groupe spécial ci-après:

Produit intérieur réel, moins l'agriculture: Toutes les industries, moins l'agriculture (CAÉ 2 — 11).

Industries productrices de biens: Agriculture (CAÉ 1); forêts (CAÉ 2); chasse et pêche (CAÉ 3); mines (y compris le broyage), carrières et puits de pétrole (CAÉ 4); industries manufacturières (CAÉ 5); bâtiment et travaux publics (CAÉ 6); et énergie électrique, gaz et eau (CAÉ 7:04).

Industries productrices de biens, moins l'agriculture: Le total du groupement précédent, moins l'agriculture (CAÉ 2-6; 7:04).

Industries productrices de services: Transports, entreposage et communications (CAÉ 7:01-03); commerce (CAÉ 8); finances, assurances et affaires immobilières (CAÉ 9); services socio-culturels, commerciaux et personnels (CAÉ 10); administration publique et défense (CAÉ 11).

Industries commerciales: Agriculture (CAÉ 1); forêts (CAÉ 2); chasse et pêche (CAÉ 3); mines (y compris broyage), carrières et puits de pétrole (CAÉ 4); industries manufacturières (CAÉ 5); bâtiment et travaux publics (CAÉ 6); transports, entreposage et communications (CAÉ 7:01-03); moins l'entretien des routes et des ponts (CAÉ 516); électricité (CAÉ 572); distribution de gaz (CAÉ 574); commerce (CAÉ 8);

insurance and real estate (S.I.C. 9); related health care institutions (S.I.C. 822); offices of physicians and surgeons (S.I.C. 823); offices of para-medical personnel (practitioners) (S.I.C. 824); offices of dentists (S.I.C. 825); diagnostic and therapeutic services n.e.s. (S.I.C. 826); miscellaneous health services (S.I.C. 827); amusement and recreation services (S.I.C. 10:04); services to business management (S.I.C. 10:05); personal services (S.I.C. 10:06) less private households (S.I.C. 873); accommodation and food services (S.I.C. 10:07); miscellaneous services (S.I.C. 10:08).

Commercial industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; part of 7; 8; 9 and part of 10).

Non-commercial industries: Highway and bridge maintenance (S.I.C. 516); water systems and other utilities (S.I.C. 576; 579); hospitals (S.I.C. 821); welfare organizations (S.I.C. 828); religious organizations (S.I.C. 831); private households (S.I.C. 873); education and related services (S.I.C. 10:01); and public administration and defence (S.I.C. 11).

Index of Industrial Production: Mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); and electric power, gas and water utilities (S.I.C. 7:04).

Note

1. Due to rounding, sub-annual detail may not average annual level.

2. For RDP purposes the content of S.I.C. Division 7 has been altered to include only transportation, storage and communication; electric power, gas, water and other utilities are excluded and measured separately, as a component of the Index of Industrial Production.

finances, assurances et affaires immobilières (CAÉ 9); établissements annexes de soins sanitaires (CAÉ 822); cabinets de médecin et de chirurgien (CAÉ 823); cabinets de praticiens paramédicaux (CAÉ 824); cabinets de dentiste (CAÉ 825); services de diagnostic et de soins n.c.a. (CAÉ 826); services de santé divers (CAÉ 827); divertissements et loisirs (CAÉ 10:04); services fournis aux entreprises (CAÉ 10:05); services personnels (CAÉ 10:06), moins ménages privés (CAÉ 873); hébergement et restauration (CAÉ 10:07); services divers (CAÉ 10:08).

Industries commerciales, moins l'agriculture: Le total du groupe précédent, moins l'agriculture (CAÉ 2-6; partie de 7; 8; 9 et partie de 10).

Industries non commerciales: Entretien des routes et des ponts (CAÉ 516); distribution d'eau et autres services d'utilité publique (CAÉ 576; 579); hôpitaux (CAÉ 821); organismes de bien-être (CAÉ 828); organisations culturelles (CAÉ 831); ménages (CAÉ 873); enseignement et services connexes (CAÉ 10:01); administration publique et défense (CAÉ 11).

Indice de la production industrielle: Mines (y compris le broyage), carrières et puits de pétrole (CAÉ 4); industries manufacturières (CAÉ 5); énergie électrique, gaz et eau (CAÉ 7:04).

Nota

1. En raison de l'arrondissement des chiffres, il se peut que la moyenne des données mensuelles et trimestrielles n'équivaille pas au niveau annuel.

2. Pour le calcul du PIR, la division 7 de la CAÉ a été modifiée de façon à inclure seulement les transports, l'entreposage et les communications. L'énergie électrique, le gaz, l'eau et les autres services d'utilité publique sont évalués séparément et font partie de l'indice de la production industrielle.

TECHNICAL NOTE

This report presents measures of Real Domestic Product (RDP) by industry for the 1971-1978 period on a 1971 time and weight base. It should also be noted that the 1970 Standard Industrial Classification is used in this publication. Underlying concepts and general methodology remain unchanged.

1971 Industry Weights

The estimates of 1971 Gross Domestic Product by industry are unchanged from the previous annual publication. In deriving the industry weights, the latest available data from Statistics Canada censuses and annual surveys were used. It was also necessary to exploit sources such as company annual reports and taxation records, as well as operating ratios from other sources. The currently-used 1971 GDP distributions are still subject to revision and can be finalized only after detailed reconciliation of all components of the System of National Accounts. It is expected, however, that the industrial distribution will not be substantially changed, particularly for the higher aggregates.

As shown by the table below, service-producing industries increased their share of total GDP in 1971 as compared with 1961. This represents a continuation of a trend apparent between 1949 to 1961, the two previous weight base periods.

NOTE TECHNIQUE

Cette publication présente des mesures du produit intérieur réel (PIR) par industrie pour la période 1971-1978. Les bases de référence et de pondération de ces mesures sont celles de 1971. Il est à noter également que la Classification des activités économiques de 1970 est utilisée dans cette publication. Les concepts sous-jacents et la méthodologie générale n'ont pas changé.

Pondérations 1971 de l'industrie

Les estimations du produit intérieur réel par industrie pour 1971 sont les mêmes que celles utilisées dans la publication annuelle précédente. Les dernières données disponibles des recensements et des enquêtes annuelles de Statistique Canada ont été utilisées pour établir ces pondérations. On s'est également servi d'autres données, comme les déclarations annuelles et les dossiers fiscaux des entreprises, et aussi des ratios d'exploitation provenant d'autres sources. La présente distribution du PIB de 1971 demeure sujette à révision et ne pourra être parachevée seulement qu'après une réconciliation détaillée de toutes les composantes du système de comptabilité nationale. Cependant, on s'attend à ce que la distribution industrielle ne changera pas tellement, surtout au niveau des agrégats majeurs.

Comme l'indique le tableau ci-dessous, comparativement à 1961, les industries de services tiennent une place plus importante dans le PIB total. Cette augmentation est la suite de la tendance apparue entre 1949 et 1961, les deux dernières années à servir de base aux pondérations.

	1949	1961	1971	
			Preliminary — Préliminaire	Revised — Revisé
Goods-producing industries — Industries de biens	53.080	44.233	40.754	40.572
Service-producing industries — Industries de services	46.920	55.767	59.246	59.428
Gross domestic product — Produit intérieur brut	100.000	100.000	100.000	100.000

Annual Measures

Annual measures as distinct from monthly projectors have been calculated for a number of additional industries. This includes a number of service-producing industries and in manufacturing, the industries for which annual levels have been prepared account for about 87% of total output compared to about 80% in the previous annual publication.

Mesures annuelles

Des mesures annuelles différentes des projections mensuelles ont été calculées pour un plus grand nombre d'industries. Ceci concerne un certain nombre d'industries de service. Pour les industries manufacturières, le calcul se fit pour 87 % d'entre elles en termes de production comparativement à 80 % pour la dernière publication annuelle.

Monthly Measures

The monthly measures are changed to reflect revisions in the projectors, incorporation of the revised annual data and revisions to seasonal factors. For some industries, the methodology has been changed and some further refinements have been made to the 1971 base year unit values used to combine quantities of commodity outputs.

RDP in Constant Dollars

Appendix A of this publication contains constant dollars RDP by industry in 1971 prices. The constant dollar data have been derived by projecting GDP in the base year using the output indexes for each industry from Table 1.

Estimates in Current and Constant Dollars

At the end of the report (Appendix B), there is a special section on selected manufacturing industries, showing annual estimates of gross output, intermediate inputs and value added in current and constant dollars as well as the resultant implicit price indexes. The industrial detail consists of total manufacturing, all major groups, and selected 3-digit S.I.C. industries.

The current price (i) gross output (ii) intermediate input and (iii) value added series have been derived as follows:

- (i) For each industry, the value of total production obtained from the census of manufacturers is adjusted, where necessary, to include estimates of additional income items such as rentals. In calculating the value of production, the physical change in inventories has been valued in prices of the current period. Some additional modifications were made to maintain continuity where there were changes in the basis of the reports during the period or to convert the Census data from a fiscal to a calendar year basis.
- (ii) Intermediate inputs are derived by adding an estimate of the cost of purchased service inputs and indirect taxes to the cost of material inputs, supplies, containers, fuel and electricity, etc., obtained from the census of manufacturers. The service inputs were estimated as a fixed proportion of value-added in both current and constant dollars.
- (iii) Value added is derived residually, that is, it is the difference between gross outputs and intermediate inputs.

The implicit price indexes are derived by dividing each current price series by the corresponding constant price series. Since the deflation process is carried out at a detailed commodity level, thereby capturing the current period commodity structure, the resultant implicit price indexes should be considered as Paasche or currently weighted price indexes.

Mesures mensuelles

Les changements dans les mesures mensuelles proviennent de révisions dans les indicateurs, de l'introduction de données annuelles révisées et de révisions dans les facteurs saisonniers. Pour certaines industries, on changea la méthodologie et certaines améliorations furent apportées aux valeurs unitaires de l'année de base 1971 utilisées pour pondérer les quantités dans les indicateurs de production de marchandises.

PIR en dollars constants

L'appendice A de cette publication contient des données du PIR par industrie aux prix de 1971. Les données en dollars constants furent obtenues en projetant le PIR brut de l'année de base avec les indices de production de chaque industrie dans le tableau 1.

Estimations en dollars courants et constants

On trouve à la fin du rapport une section spéciale, l'appendice B, sur le groupe des industries manufacturières. Y sont présentées des estimations annuelles de la production brute, de la consommation intermédiaire et de la valeur ajoutée. Ces données sont disponibles pour l'ensemble des entreprises manufacturières, pour tous les agrégats principaux et pour certaines industries à 3 chiffres.

Les séries en prix courants (i) de la production brute, (ii) de la consommation intermédiaire et (iii) de la valeur ajoutée sont calculées comme suit:

- (i) Pour chaque industrie, l'estimation de la production totale, tirée du recensement manufacturier, est ajustée, si nécessaire, pour inclure certains revenus additionnels, par exemple, de location. Au moment du calcul, les variations matérielles des stocks ont été évaluées aux prix de la période courante. Certaines modifications additionnelles furent apportées en vue de conserver une continuité chronologique là où il y a eu des changements dans les structures des comptes rendus durant la période ou pour ajuster les données du recensement de l'année fiscale à l'année de calendrier.
- (ii) La consommation intermédiaire est obtenue en additionnant le coût des services achetés et les taxes indirectes aux coûts des matériaux, des fournitures, des contenants, du combustible et de l'électricité, etc., fournis par le recensement manufacturier. Les intrants de services furent estimés comme une proportion fixe de la valeur ajoutée en dollars courants et constants.
- (iii) La valeur ajoutée est dérivée de façon résiduelle, c'est-à-dire, qu'elle est la différence entre la production brute et la consommation intermédiaire.

Les indices implicites de prix proviennent de la division de chaque série en prix courants par la série correspondante en prix constants. Comme le dégonflement des données s'effectue pour une désagrégation poussée des produits, reflétant ainsi leur structure courante, les indices implicites qui en résultent devraient être considérés comme des indices de Paasche ou des indices de prix à pondération courante.

The current dollar data (for years other than the base years) were subjected to critical appraisal and rigorous time series analysis only to the extent necessary to achieve the primary objective of producing reliable estimates of RDP.

Consequently, the current dollar data, and therefore the implicit price indexes for the 1972-1976 period inclusive, should, on the whole, be considered to be less reliable than the constant price measures.

Linking RDP on a 1971 Base with RDP on a 1961 Base

Subject to rounding errors, a linked series can be calculated between the 1961- and 1971-based RDP series which are identical under the 1960 and 1970 S.I.C.'s using the index values for 1971. For a 1971-based series, the 1961-based series should be multiplied by 100.0 and divided by the index value for 1971 for the series on the 1961 base. For a continuous series on a 1961 base, the 1971-based series should be multiplied by the index value for 1971 for the series on a 1961 base and divided by 100.0.

The Revision to RDP

The revisions to the annual RDP indexes result from a number of different sources. In general, annual levels for an additional year have been calculated for all industries, for which annual levels were previously prepared, revisions to the data on which the previously published annual levels were based have been incorporated, and annual levels have been prepared for some additional industries.

The revisions to year-to-year movements in certain aggregates are included in the following table. As can be seen from this table only the 1974 and 1978 movements were significantly altered from the previously published data. Goods-producing industries have been revised upwards in 1974. In 1978, the revision occurs mainly in the goods-producing industries.

The monthly data have been revised due to the incorporation of annual levels, revisions to the monthly data on which the output indexes are based, changes in the methodology for several industries and revisions to the seasonal factors.

Les données en dollars courants (pour les années autres que l'année de base) furent l'objet d'une évaluation critique et d'une analyse de série chronologiques rigoureuse jusqu'au point nécessaire pour atteindre l'objectif primordial de produire des estimations solides du PIR.

En conséquence, les données en dollars courants et, par conséquent, les indices implicites de prix pour la période de 1972-1976 inclusivement devraient être considérés dans leur ensemble comme étant moins solides que les mesures en prix constants.

Raccordement du PIR sur la base 1971 = 100 au PIR sur la base 1961 = 100

Compte tenu des erreurs d'arrondissement, il est possible de calculer une série raccordée entre les séries du PIR dont les années de référence sont 1961 et 1971 et qui ont la même définition dans la CTI de 1961 et la CAE de 1970 en utilisant la valeur des indices de 1971. Dans le cas d'une série 1971 = 100, il faut multiplier les séries 1961 = 100 par 100.0 et diviser le produit obtenu par la valeur de l'indice de 1971 pour la série dont l'année de référence est 1961. En ce qui concerne les séries continues dont l'année de référence est 1961, il faut multiplier la série 1971 = 100 par la valeur de l'indice de 1971 pour la série sur la base 1961 et diviser le produit obtenu par 100.0.

Revisions au PIR

Les revisions aux indices annuels du PIR proviennent de nombreuses sources différentes. En général, des niveaux annuels ont été calculés pour une année supplémentaire pour toutes les industries, dont on avait déjà préparé les niveaux annuels auparavant. Des revisions furent incorporées aux données servant au calculs des niveaux annuels publiés antérieurement et ces derniers furent calculés pour certaines industries additionnelles.

Le tableau qui suit présente les revisions aux variations annuelles pour certains agrégats. Seulement les variations pour 1974 et 1978 connurent des modifications significatives par rapport aux données publiées antérieurement. Les industries de biens connaissent des revisions à la hausse d'importance à peu près égale en 1974. En 1978, les revisions surviennent surtout dans les industries de biens.

Les données mensuelles furent révisées, suite à l'incorporation des niveaux annuels, à des revisions aux données mensuelles elles-mêmes qui servent au calcul des indices de production, à des changements de méthodologie pour plusieurs industries et à des revisions aux facteurs saisonniers.

Real Domestic Product, 1978

During the period 1971 to 1978 total economic activity in the Canadian economy as measured by Real Domestic Product (RDP) achieved an annual growth rate of 4.2%. This compares with an annual growth rate of 5.5% for the period 1961 to 1971.

Within the 1971 to 1978 period output grew fastest in the 1971 to 1973 period (6.6%), slowed down from 1973 to 1975 (2.7%) and increased to 4.0% during the post-1975 recovery – still below the long term rate of growth. Most of the slowdown occurred in the goods-producing industries: 6.9% from 1971 to 1973, no growth from 1973 to 1975 and 4.2% in the period 1975 to 1978. The rates of growth in the service-producing industries declined steadily: 6.4% in the period 1971 to 1973, 4.8% from 1973 to 1975 and 3.9% from 1975 to 1978. The chart of the monthly indexes of goods-producing and service-producing industries illustrates the different growth patterns of the two series. Output in the goods-producing industries was marked

Produit intérieur réel, 1978

De 1971 à 1978, l'activité économique totale du Canada mesurée par le produit intérieur réel (PIR) a progressé à un taux annuel de 4.2 %, comparativement à 5.5 % entre 1961 et 1971.

Entre 1971 et 1978, le taux de croissance de la production a été le plus élevé de 1971 à 1973 (6.6 %), a ralenti de 1973 à 1975 (2.7 %) et est ensuite remonté jusqu'à 4.0 % pendant la reprise qui a suivi 1975, ce qui reste inférieur à sa tendance à long terme. Le ralentissement a touché surtout les industries productrices de biens: 6.9 % de 1971 à 1973, croissance nulle de 1973 à 1975, et 4.2 % de 1975 à 1978. Les taux d'expansion des industries de services ont régulièrement diminué: 6.4 % de 1971 à 1973, 4.8 % de 1973 à 1975 et 3.9 % de 1975 à 1978. Le graphique des indices mensuels des industries de biens et de services illustre les évolutions différentes des deux séries. La production des industries de biens a été marquée par un revirement de conjoncture au début de 1974, moment

by a cyclical downturn which began in early 1974 and reached a trough 5% lower in March 1975. By early 1976 output had recovered to its previous peak level. Service-producing industries did not have this pronounced cyclical pattern.

According to the Labour Force Survey employment in the non-agricultural industries increased by 3.4% in 1978. This is about equal to the average rate of increase experienced over the 1971 to 1978 period but does, however, represent a substantial improvement over 1977 as well as the highest rate of increase since 1974. Wage settlements averaged 7.0%, a decline from 7.7% in 1977 and below the average for the period. Over the year the low in terms of wage settlements was reached during the second quarter with a slight acceleration becoming apparent in the third and fourth quarters.

The Consumer Price Index rose 9% in 1978. A large part of the increase derived from the 15% increase in the food component a rate exceeded only in 1974 though approached in 1973. The Industry Selling Price Index rose 9%. Larger than average increases occurred in slaughtering and meat processors, wood industries, cement manufacturers and petroleum refineries.

Agriculture increased 8% in 1978. Year-to-date changes ranged from a decline of 12% in 1972 to an increase of 9% in 1975. The level of output in 1978 stood 18% above the 1971 level.

Output in forestry operations advanced 6% in 1978. Exports of wood and paper products increased about 10% over the previous year. See Table A for a summary of the forest products industries.

où elle a commencé à baisser; en mars 1975, elle était tombée à 5 % au-dessous de son niveau initial, mais elle est ensuite revenue à son sommet antérieur vers la fin de 1975. Pour leur part, les industries de services n'ont pas subi de mouvements cycliques aussi prononcés.

D'après l'enquête sur la population active, l'emploi dans les secteurs autres que l'agriculture s'est accru de 3.4 % en 1978; ceci représente à peu près son taux moyen d'augmentation pour la période 1971 à 1978, mais son plus fort taux de croissance depuis 1974 et une nette amélioration sur 1977. La rémunération a progressé en moyenne de 7.0 %, en baisse par rapport à 7.7 % en 1977 et à la moyenne de la période. Sur l'ensemble de l'année, un creux a été atteint pendant le second trimestre et une légère accélération s'est manifestée au cours des troisième et quatrième trimestres.

L'indice des prix à la consommation a augmenté de 9 % en 1978, surtout à cause de la hausse de 15 % de l'indice des prix des aliments, taux qui n'a été dépassé qu'en 1974 bien que presque atteint en 1973. L'indice des prix de vente dans l'industrie a progressé de 9 %. L'abattage et la préparation de la viande, les industries du bois, les fabricants de ciment et les raffineries de pétrole ont enregistré des augmentations supérieures à la moyenne.

La production agricole a crû de 8 % en 1978. Les variations annuelles se sont échelonnées entre une diminution de 12 % en 1972 et un accroissement de 9 % en 1975. La production de 1978 a été supérieure de 18 % à celle de 1971.

La production du secteur de l'exploitation forestière a progressé de 6 % en 1978. Les exportations de bois et de produits du papier ont augmenté d'environ 10 % par rapport à l'année précédente. Le tableau A résume l'activité des industries forestières.

TABLE A. Forest Products Industries and Related Series
TABLEAU A. Industrie forestière et activités connexes

	Annual percentage changes – Variations annuelles en pourcentage						
	1972	1973	1974	1975	1976	1977	1978
Forestry – Forêts	2.4	21.0	– 4.9	– 17.1	15.1	3.7	6.4
Manufacturing – Industries manufacturières:

Forest products exports – Exportations produits forestiers . .	8.2	4.3	1.1	– 22.0	24.2	10.5	9.7

Mining output declined substantially during 1978. Within metal mines both iron ore and nickel production were severely curtailed. The decline in iron ore was largely strike related. Weak demand for nickel which resulted in virtually no growth in 1976 and 1977 continued into 1978. Permanent lay-offs were announced early in 1978 and in July and a protracted strike began in September. Mineral fuels experienced rapid growth from 1971 to 1973, followed by a period of decline from 1973 to 1976, with little or no growth during the remainder of the period. Non-metal mines declined significantly in 1975 and 1978 as a result of strikes in asbestos mines.

Food and beverage products moved up about 3% in 1978. The growth originated with fruit and vegetable processors, bakeries, miscellaneous food and fish products. For the first three industries the increases followed declines in 1977; only the fish products industry increased in both years. Output of the distilleries industry was affected by strikes in 1978. Distilleries was one of the fastest growing components of this group from 1971 to 1977 contributing almost one quarter of the growth in constant dollars although it comprises less than 10% of the total group. See Table B for a summary of the food and beverage Industries.

La production minière a beaucoup diminué en 1978. Dans les mines de métaux, les productions de minerai de fer et de nickel ont subi de fortes réductions, à cause surtout de grèves dans le premier cas et de la faiblesse de la demande, qui a pratiquement réduit à néant la croissance en 1976 et en 1977, et s'est poursuivie en 1978 dans le cas du nickel. Des mises à pied permanentes ont été annoncées au début et en juillet de 1978, tandis qu'une longue grève s'est déclenchée en septembre. La production de combustibles minéraux a crû rapidement de 1971 à 1973 pour ensuite diminuer de 1973 à 1976 puis enregistrer une croissance faible ou nulle pendant le reste de la période. Les mines non métalliques ont vu leur production décliner sensiblement en 1975 et en 1978, en raison de grèves dans les mines d'amiante.

Les produits alimentaires et les boissons ont augmenté de 3 % en 1978. Cette croissance provenait des industries de la préparation de fruits et légumes, de la boulangerie et de la pâtisserie, des industries alimentaires diverses et de la transformation du poisson. Dans le cas des trois premières industries, les augmentations suivaient des baisses en 1977; seule l'industrie de la transformation du poisson a affiché des progressions pendant les deux années. La production des distilleries a été touchée par des grèves en 1978, tout en constituant l'un des éléments qui ont crû le plus rapidement entre 1971 et 1977; en effet, les distilleries ont été responsables de près d'un quart de la croissance en dollars constants, bien qu'elles représentent moins de 10 % de l'ensemble du groupe. Le tableau B donne un résumé des industries des aliments et boissons.

TABLE B. Food and Beverage Industries and Related Series

The paper and allied products group advanced by 10% in 1978. Exports increased about 8% and the rate of capacity utilization improved in 1978. Over the period 1971 to 1978 the annual growth rate averaged

Le groupe du papier et des activités connexes a progressé de 10 % en 1978; les exportations se sont accrues d'environ 8 % et le taux d'utilisation de la capacité s'est amélioré en 1978. Pendant la période 1971 à 1978, le

2.3%, considerably below the 3.4% for total manufacturing. The industry grew strongly from 1971 to 1974 followed by a sharp strike-related decline of 20% in 1975. Weak demand after 1975 slowed the recovery and it was not until 1978 that the industry surpassed its 1974 level.

The petroleum and coal products industry rose just over 1% in 1978. Total growth for the 1974 to 1978 period was just 3%. This contrasts sharply with increases of 13% in 1972 and 14% in 1973. Refer to Table C for summary statistics on crude petroleum, natural gas and related series.

taux de croissance annuel moyen s'est établi à 2.3 %, un rythme de beaucoup inférieur à celui de 3.4 % pour l'ensemble des industries manufacturières. Cette industrie a enregistré une forte expansion de 1971 à 1974, qui a été suivie d'une baisse considérable de 20 % en 1975 attribuable à des grèves. La faiblesse de la demande après 1975 a ralenti la reprise, et ce n'est qu'en 1978 que l'industrie a dépassé son niveau de 1974.

Le secteur des produits du pétrole et du charbon n'a progressé que de 1 % en 1978. La croissance totale pour la période 1974 à 1978 n'a été que de 3 %, alors que des augmentations de 13 % et 14 % avaient été enregistrées en 1972 et en 1973 respectivement. Le tableau C présente des statistiques sommaires sur l'industrie du pétrole brut et du gaz naturel et sur les activités connexes.

TABLE C. Crude Petroleum and Natural Gas and Related Series

TABLEAU C. Pétrole brut et gaz naturel et activités connexes

	Annual percentage changes – Variations annuelles en pourcentage						
	1972	1973	1974	1975	1976	1977	1978
Crude petroleum and natural gas mining industry – Industrie du pétrole brut et du gaz naturel	16.1	13.8	- 4.8	- 11.0	- 6.3	1.4	- 1.9
Petroleum and coal products manufacturing industries – Fabrication de produits du pétrole et du charbon	12.8	14.2	2.9	- 1.3	- 1.2	4.5	1.3

Wholesalers of petroleum products – Grossistes en produits pétroliers	5.3	5.2	2.0	- 1.7	3.3	- 0.4	1.7
Gas distribution – Distributions du gaz	15.3	4.6	8.6	1.0	4.2	0.8	2.7
Service stations and garages – Stations-services et garages	8.1	6.0	6.8	- 0.2	3.4	2.1	2.7
Consumer price index for gasoline – Indice des prix à la consommation de l'essence	0.8	6.7	16.6	13.1	12.4	8.6	5.6

Over the period the chemical group has consistently out-performed the manufacturing sector as a whole, achieving an annual growth rate of 5.5% compared with 3.4% for manufacturing. This trend continued into 1978: the strong increase was the largest since 1971 and was considerably higher than the 8% for manufacturing. Manufacturers of pharmaceuticals, industrial chemicals and plastics and synthetic resins were among the major contributors to the increase. Expansion of existing facilities, startup of new plants and the availability of petro-chemical feedstocks and other raw materials were some of the factors contributing to the group's performance.

Although there were increases in the primary metals industry in 1977 and 1978 the level of production in 1978 was only slightly higher than that of 1974. Most of the increase in 1978 can be attributed to iron and steel mills which were reported to be operating at high rates due to renewed foreign demand for specialty

Sur toute la période, la production de l'industrie chimique a régulièrement dépassé celle de l'ensemble des industries manufacturières, avec des taux de croissance respectifs de 5.5 % et 3.4 %. Cette tendance s'est poursuivie jusqu'en 1978: l'expansion a été la plus forte depuis 1971 et a dépassé de beaucoup la progression de 8 % de l'ensemble des industries manufacturières. Les fabricants de produits pharmaceutiques, de produits chimiques industriels et de matières plastiques et de résines synthétiques ont été les principaux responsables de la croissance. L'amélioration des installations existantes, l'entrée en opération de nouvelles usines et la disponibilité de charges d'alimentation et de matières premières pour l'industrie pétro-chimique ont été quelques-uns des facteurs qui ont été à l'origine de la bonne tenue de ce groupe industriel.

Bien que les industries de première transformation des métaux aient enregistré des augmentations en 1977 et 1978, le niveau de la production de 1978 n'a été que légèrement supérieur à celui de 1974. La majeure partie de la hausse de 1978 peut être attribuée à la sidérurgie dont l'activité a été élevée en raison du renouveau observé dans

products. Rolling mills also recorded major gains in output in 1978. Smelting and refining output decreased in 1978. Nickel smelting was affected by the same factors that reduced output in nickel mines. In addition there were strikes in the aluminum industry.

Growth in output of the transportation equipment industries slowed in 1978. An increase of 1% in motor vehicle manufacturing compared with an average growth rate of almost 9% for the 1971 to 1978 period was mainly responsible for the slowdown in the group (see Table D).

la demande étrangère de produits spéciaux. L'industrie du laminage a également affiché des gains importants au chapitre de la production en 1978. Par contre, l'affinage du nickel a été influencé par les mêmes facteurs que ceux qui ont réduit la production des mines de nickel, et l'industrie de l'aluminium a été touchée par des grèves.

L'augmentation de la production de matériel de transport a fléchi en 1978. Une hausse de 1 % de la fabrication de véhicules automobiles, comparativement à un taux de croissance moyen de presque 9 % pour la période 1971 à 1978, a été la principale cause du ralentissement (voir le tableau D).

TABLE D. Motor Vehicles and Associated Series
TABLÉAU D. Industrie automobile et activités connexes

	Annual percentage changes – Variations annuelles en pourcentage						
	1972	1973	1974	1975	1976	1977	1978
Motor vehicle and truck body and trailer manufacturers – Fabrication de véhicules automobiles et de carrosseries de camions et remorques	8.1	26.5	6.9	– 9.6	17.2	6.2	1.0
Motor vehicle parts and accessories – Pièces et accessoires de véhicules automobiles	14.2	21.3	– 10.5	– 16.7	29.5	9.1	5.5
Motor vehicle dealers – Détaillants de véhicules automobiles	16.5	20.3	8.6	11.5	– 0.8	– 0.7	4.7

Output growth of motor vehicle parts manufacturers also slowed in 1978. Aircraft and parts manufacturers increased their output by about 20% in 1978 following a 10% increase in 1977. In 1976 the industry operated below its 1971 level. Increased demand for railway hopper cars resulted in output growth in the railway rolling stock industry in the latter half of 1978; strikes depressed output in the first part of the year.

Following a decline in 1977 the electrical products industry advanced about 5% in 1978. Most industries within the group increased with strong gains recorded in the two largest industries, communications equipment and electrical industrial equipment. In addition there were increases in electric wire and cable and household radio and television. For the latter the 1978 increase of 5% followed a series of sharp declines that began in 1974; by 1978 the level of output was some 25% below that of 1971.

The construction industry declined about 1% in 1978 due almost entirely to a 7% decline in residential construction. The decline in 1977 was due to decreases

La croissance de la production de pièces de véhicules automobiles a également décliné en 1978. La production d'aéronefs et de pièces d'aéronefs a augmenté d'environ 20 %, contre 10 % en 1977. En 1976, la production de cette industrie a été inférieure à son niveau de 1971. Une demande accrue de wagons-trémies a provoqué un relèvement de la production des industries de matériel roulant ferroviaire pendant la dernière moitié de 1978; des grèves avaient fait diminuer la production pendant la première partie de l'année.

Après une baisse en 1977, le secteur de la fabrication de produits électriques a progressé de 5 % en 1978. La plupart des industries de ce groupe ont enregistré de fortes hausses, les plus notables ayant été observées dans les deux plus importantes, celle de la fabrication d'équipement de télécommunication et celle de la fabrication d'équipement électrique industriel. Les fils et câbles électriques et les radiorécepteurs et téléviseurs ménagers ont eux aussi été produits en plus grand nombre; en ce qui concerne ces derniers, le relèvement de 5 % de la production en 1978 suivait une série de fortes réductions amorcées en 1974; le niveau de la production en 1978 était inférieur de quelque 25 % à celui de 1971.

Le secteur du bâtiment et des travaux publics a reculé d'environ 1 % en 1978, presque entièrement à cause d'un déclin de 7 % de la construction résidentielle. La

in both the residential and non-residential sectors. Over the period from 1971 to 1976 the main areas of strength were residential construction in 1972 and 1976 and non-residential construction in 1974 and 1975.

In 1978 the transportation, storage and communications group rose about 4%. In aggregate the group of industries involved mainly in the transport of persons increased almost 5% in 1978. While this group increased substantially in the 1971 to 1978 period there was a marked slowdown after 1974 due mainly to a slowdown in air transport, the largest single component.

The group of industries involved in the transport of goods advanced about 2% in total in 1978. Growth in the rail freight sector was relatively slow due to reduced demand for services resulting from problems in the grain handling system and strikes at several iron mines. The group rose about 5% per year until 1975 when a decline of almost 2% occurred. During the remaining years the growth was slower, averaging about 2% per year.

The communications group advanced about 7% in 1978, slightly below the 8% average rate for the 1971 to 1977 period. For telephone systems, the growth was particularly strong with long distance service being the fastest growing component.

The over-all rise of 3% in trade in 1978 resulted from increases in both wholesale and retail trade. The annual increase was significantly greater than that for the preceding period but was lower than the average annual increase of around 9% recorded for the 1971 to 1974 period. Increases in 1978 were reported by wholesalers of industrial equipment, transportation equipment, commercial and institutional equipment and supplies, and newsprint, paper and paper products. The annual increase of 3% in retail trade in 1978 was higher than that recorded in 1977. This increase is slightly below the average annual increase for the period 1974 to 1977 and significantly below the annual average of 8% recorded for the period 1971 to 1974. Increases in 1978 were reported in department stores, motor vehicle dealers, clothing stores, drug stores, and furniture, television and radio and appliance stores. In 1978 food stores declined by just over 1% while food prices rose by over 15%.

Output of the finance, insurance and real estate industry advanced at a rate of just under 5% compared with an average growth rate of 6.1% for 1971 to 1978. Growth in 1978 in constant dollar terms was distributed

baisse observée en 1977 était due à des diminutions dans les deux secteurs, résidentiel et non résidentiel. De 1971 à 1976, les éléments de vigueur ont été enregistrés dans la construction résidentielle en 1972 et en 1976 et dans la construction non résidentielle en 1974 et en 1975.

En 1978, le secteur des transports, de l'entreposage et des communications a crû d'environ 4 %. Globalement, le groupe des industries assurant surtout le transport de personnes a progressé de presque 5 % au cours de cette année-là. Bien que ce groupe se soit beaucoup développé de 1971 à 1978, il a été affecté par un ralentissement prononcé après 1974 en raison surtout d'une baisse d'activité des transports aériens, qui en sont le plus important élément.

Dans le transport des marchandises, l'activité s'est accrue d'environ 2 % au total en 1978. La croissance a été relativement lente dans le transport ferroviaire, la demande de services ayant fléchi à la suite de problèmes de manutention des céréales et de grèves dans plusieurs mines de fer. Ce groupe a progressé d'environ 5 % par année jusqu'à 1975, année où il a subi une baisse de presque 2 %; pendant le reste de la période, l'augmentation a été plus faible et s'est située à environ 2 % en moyenne par année.

Le groupe des communications a enregistré une hausse d'environ 7 % en 1978, légèrement inférieure à la moyenne de 8 % observée sur l'ensemble de la période. En ce qui concerne les systèmes téléphoniques, la croissance a été particulièrement forte; le service d'appels longue distance en a été l'élément le plus vigoureux.

En 1978, la croissance globale de 3 % du commerce a résulté d'augmentations du commerce de gros et du commerce de détail. Cette progression annuelle a été de beaucoup supérieure à celle de l'année précédente, mais a été inférieure à l'accroissement annuel moyen d'environ 9 % observé pour la période 1971 à 1974. En 1978, des hausses ont été déclarées par les grossistes de matériel industriel, d'équipement de transport, de matériel et de fournitures pour commerces et institutions, de papier journal, de papier et de produits de papier. La croissance de 3 % du commerce de détail en 1978 a été supérieure à celle de 1977, légèrement inférieure à la moyenne annuelle pour la période 1974 à 1977 et sensiblement moindre que la moyenne annuelle de 8 % de la période 1971 à 1974. Les grands magasins, les concessionnaires d'automobiles, les magasins de vêtements, les pharmacies et les magasins de meubles, de téléviseurs, de radios et d'appareils ménagers ont enregistré des hausses en 1978. Par contre, les magasins d'alimentation ont subi une baisse d'un peu plus de 1 % (les prix des produits alimentaires ont crû de plus de 15 %).

Le secteur des finances et des affaires immobilières a crû à un taux d'un peu moins de 5 %, comparativement à une moyenne annuelle de 6.1 % pour la période de 1971 à 1978. En dollars constants, la hausse de 1978 était répartie

about equally among the finance industries, the insurance agencies and real estate industries and imputed rent in owner-occupied dwellings.

Output of community, business and personal service—which is the second largest component of RDP — increased by slightly more than 3% in 1978. The growth originated in services to business management and to a lesser extent in health and welfare services and accommodation and food services. Education services which is one third of the community, business and personal services was almost unchanged in 1978 and 1977.

In 1978 public administration and defence services grew by just over 2%, the smallest annual increase since 1971.

à peu près uniformément entre les institutions financières, les agences d'assurances et d'affaires immobilières et les loyers imputés des logements occupés par leur propriétaire.

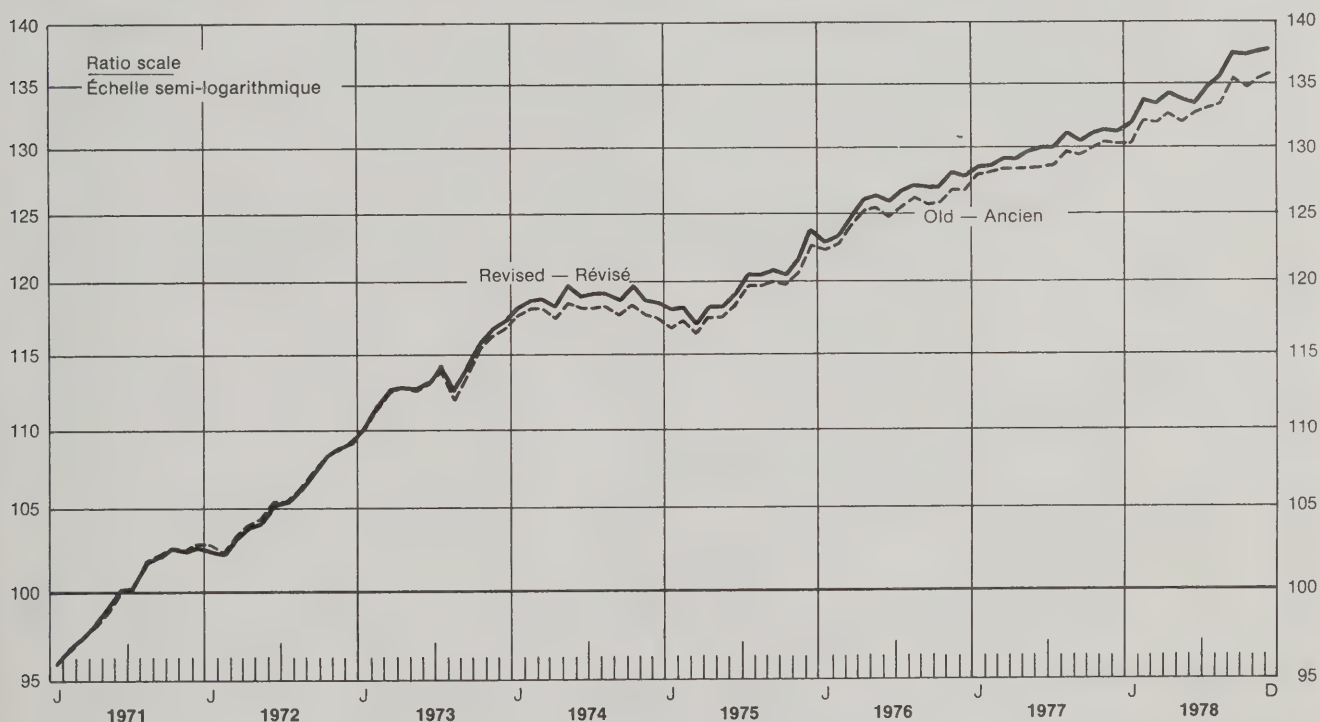

Les services socio-culturels, commerciaux et personnels, qui constituent le deuxième élément en importance du PIR, ont connu une expansion d'un peu plus de 3 % en 1978, en raison surtout des services fournis aux entreprises et, dans une moindre mesure, des services médicaux et sociaux et des services d'hébergement et des restauration. L'enseignement, qui représente environ un tiers du secteur des services socio-culturels, commerciaux et personnels, n'a pratiquement pas varié en 1977 et 1978.

En 1978, l'administration publique et la défense ont enregistré une progression d'un peu plus de 2 %, leur plus faible augmentation annuelle depuis 1971.

149.9	140.8	147.8				Industrie des portes, châssis et autres bois ouvrés.	254	48
117.4	109.5	123.9				Industrie du meuble et des articles d'ameublement.	5-09	49
122.1						Industrie des meubles de maison	261	50
133.4						Industrie des meubles de bureau	264	51
113.2	117.1	129.3				Industrie du papier et activités connexes.	5-10	52
110.7	116.2	129.3				Usines de pâtes et papiers	271	53
121.4	122.1	136.0				Fabricants de boîtes en carton et de sacs en papier.	273	54
112.9	112.2	114.6				Transformations diverses du papier...	274	55
127.6	129.2	137.2				Imprimerie, édition et activités connexes.	5-11	56
124.1	126.1	139.2				Imprimerie commerciale et industrie du clichage, de la composition et de la reliure commerciale.	286;287	57
130.8	132.0	135.3				Édition seulement et édition et impression.	288;289	58
107.7	116.1	123.7				Première transformation des métaux....	5-12	59
116.2	121.0	136.5				Sidérurgie	291	60
104.8	111.8	130.8				Fabriques de tubes et tuyaux d'acier ..	292	61
123.1	119.3	133.0				Fonderies de fer	294	62
86.7	106.2	100.9				Fonte et affinage	295	63
119.3	119.5	127.0				Fabrication de produits en métal (sauf machines et équipement de transport).	5-13	64
134.9	125.8	133.5				Industrie des produits métalliques d'architecture et d'ornement.	303	65
121.3	125.4	138.1				Industrie de l'emboutissage, du matriçage et du revêtement des métaux.	304	66
107.7	118.2	131.6				Industrie du fil métallique et de ses produits.	305	67
151.2	148.8	176.3				Fabricants de quincaillerie, d'outillage et de coutellerie.	306	68
120.0	119.7	137.8				Fabrication de produits métalliques divers.	309	69
138.9	147.2	155.4				Fabrication de machines (sauf électriques).	5-14	70
122.1	134.5	140.6				Fabricants de machines et d'équipement divers.	315	71
133.2	139.1	146.2				Fabrication d'équipement de transport ..	5-15	72
93.2	103.9	126.6				Fabricants d'aéronefs et de pièces	321	73
155.1	164.7	166.3				Fabricants de véhicules automobiles et de carrosseries de camions et remorques.	323;324	74
157.9						Fabricants de véhicules automobiles ..	323	75
137.9						Fabricants de carrosseries de camions et remorques.	324	76
133.8	146.0	154.1				Fabricants de pièces et accessoires d'automobiles.	325	77
120.6	88.9	116.2				Fabricants de matériel ferroviaire roulant.	326	78

TABLE 1. Indexes of Real Domestic Product by Industry, by Years (1970 S.I.C.) - Continued

Indexes 1971 = 100

No.	S.I.C.	Industry	1971 Weight = Pondé- ration 1971	1971	1972	1973	1974	1975
79	327	Shipbuilding and repair167	100.0	115.3	119.7	115.3	127.9
80	5:16	Electrical products industries	1.631	100.0	108.0	121.0	128.4	118.5
81	332	Manufacturers of major appliances (electric and non-electric).	.171	100.0	117.4	131.6	132.7	104.3
82	334	Manufacturers of household radio and television receivers.	.121	100.0	132.2	145.8	136.9	115.2
83	335	Communications equipment manu- facturers.	.515	100.0	99.8	116.2	131.8	128.4
84	336	Manufacturers of electrical in- dustrial equipment.	.324	100.0	105.2	117.9	121.9	115.8
85	338	Manufacturers of electric wire and cable.	.198	100.0	106.9	115.3	120.1	111.5
86	339	Manufacturers of miscellaneous electrical products.	.186	100.0	108.1	111.8	110.2	105.5

TABLEAU 1. Indices du produit intérieur réel, par industrie et par année (C.A.É. 1970) — suite

Indices: 1971 = 100

1976	1977	1978	1979	1980	1981	Industrie	C.A.É.	No
119.2	106.1	98.5				Construction et réparation de navires .	327	79
120.0	114.1	119.6				Fabrication de produits électriques	5:16	80
116.5	105.6	109.4				Fabricants de gros appareils (élec- triques ou non).	332	81
115.3	69.4	75.2				Fabricants de radiorécepteurs et de téléviseurs ménagers.	334	82
121.3	116.8	122.4				Fabricants d'équipement de télé- communication.	335	83
133.8	133.7	142.9				Fabricants d'équipement électrique industriel.	336	84
107.9						Fabricants de fils et de câbles électriques.	338	85
99.7						Fabricants de produits électriques divers.	339	86
118.5	121.5	133.7				Fabrication de produits minéraux non métalliques.	5:17	87
123.5	124.0	129.6				Fabricants de ciment	352	88
104.5	99.1	110.0				Fabricants de produits en béton	354	89
113.7	111.0	109.4				Fabricants de béton préparé	355	90
129.2	135.0	136.7				Fabrication de produits du pétrole et du charbon.	5:18	91
128.5						Raffineries de pétrole	365	92
124.9	135.6	158.1				Industrie chimique	5:19	93
128.8	136.2	159.2				Fabricants de produits pharmaceu- tiques et de médicaments.	374	94
124.6	121.7	163.3				Fabricants de peintures et vernis	375	95
133.0	163.4	191.5				Fabricants de savon et de produits de nettoyage.	376	96
118.7	132.8	143.0				Fabricants de produits chimiques industriels.	378	97
120.9	122.3	149.0				Fabricants de produits chimiques divers.	379	98
126.4	123.2	133.3				Industries manufacturières diverses	5:20	99
151.6						Fabrication de matériel scientifique et professionnel.	391	100
122.8	121.8	120.7				BÂTIMENT ET TRAVAUX PUBLICS . .	6	101
133.7	139.5	145.2				TRANSPORTS, ENTREPOSAGE ET COMMUNICATIONS.	7:01-03	102
122.1	125.7	128.8				Transports	7:01	103
168.7	180.8	193.7				Transports aériens et services auxiliaires des transports aériens.	501:502	104
117.3	118.7	121.5				Transports ferroviaires	503	105
129.7	131.0	127.5				Transports interurbains et ruraux par autocar.	508	106
118.9	117.7	118.4				Réseaux de transports urbains	509	107
124.4	124.6	120.1				Transports par pipe-line	515	108
103.0	106.7	112.7				Entreposage	7:02	109
88.9	93.6	98.5				Silos à grain	524	110
161.3	172.2	183.4				Communications	7:03	111
170.1	183.7	198.6				Réseaux de téléphone	544	112
142.9	151.0	159.7				ÉNERGIE ÉLECTRIQUE, GAZ ET EAU	7:04	113
145.0	154.4	164.2				Energie électrique	572	114
137.9	139.0	142.7				Distribution de gaz	574	115

APPENDICES

APPENDIX A. Real Domestic Product by Industry, by Years, in Constant Dollars, (1970 S.I.C.)

No.	S.I.C.	Industry	1971 Weight — Pondé- ration 1971	1971	1972	1973	1974	1975
				\$'000,000				
1	1-11	REAL DOMESTIC PRODUCT.....	100.000	82,867.0	87,441.4	94,176.7	98,580.1	99,297.8
2	1	AGRICULTURE.....	3.371	2,793.4	2,472.2	2,617.4	2,508.5	2,737.5
3	2	FORESTRY.....	.802	664.9	680.9	823.8	783.3	648.9
4	3	FISHING AND TRAPPING.....	.178	147.9	141.2	148.5	132.1	130.7
5	4	MINES (including milling), QUARRIES AND OIL WELLS.	3.819	3,164.7	3,371.6	3,774.7	3,712.0	3,390.6
6	4:01	Metal mines.....	1.584	1,312.6	1,262.0	1,410.8	1,391.7	1,282.0
7	051;052	Placer gold and gold quartz mines..	.059	48.9	44.0	38.5	32.7	32.9
8	058	Iron mines.....	.302	250.2	208.4	256.7	230.4	221.4
9	057;059	Other metal mines.....	1.223	1,013.5	1,009.5	1,115.6	1,128.6	1,027.7
10	4:02	Mineral fuels.....	1.492	1,236.4	1,465.5	1,658.1	1,585.4	1,466.6
11	061	Coal mines.....	.113	93.6	138.7	148.4	148.9	187.8
12	064	Crude petroleum and natural gas industry.	1.379	1,142.8	1,326.8	1,509.6	1,436.5	1,278.8
13	4:03	Non-metal mines (except coal mines) ..	.363	300.8	299.1	324.7	371.7	309.2
14	071	Asbestos mines.....	.169	140.1	138.7	144.9	151.6	98.2
15	5	MANUFACTURING INDUSTRIES	22.753	18,855.1	20,202.7	22,175.8	23,009.7	21,551.1
16	5:01	Food and beverage industries.....	3.107	2,574.4	2,677.4	2,748.1	2,742.8	2,764.2
17	101	Meat and poultry products indus- tries.	.476	394.4	400.4	398.2	431.8	433.1
18	1011	Slaughtering and meat processors ..	.410	339.7	340.0	336.3	374.0	375.7
19	1012	Poultry processors.....	.066	54.7	60.3	61.9	57.8	57.4
20	103	Fruit and vegetable processing industry.	.218	180.7	192.1	199.2	204.5	203.2
21	104	Dairy products industry.....	.387	321.0	318.8	315.9	330.6	333.8
22	105	Flour and breakfast cereal prod- ucts industry.	.064	53.2	52.7	48.9	50.5	51.8
23	106	Feed industry.....	.168	139.2	144.2	136.0	138.4	140.9
24	107	Bakery products industries.....	.345	285.9	300.6	298.8	289.5	280.8
25	108	Miscellaneous food industries.....	.562	465.7	486.0	503.5	491.6	486.9
26	1089	Miscellaneous food processors, n.e.s.	.351	290.9	303.4	311.8	320.9	322.3
27	109	Beverage industries.....	.727	602.5	651.8	712.8	695.8	728.8
28	1091	Soft drink manufacturers.....	.187	154.6	157.8	172.2	166.2	165.4
29	1092	Distilleries.....	.232	191.9	219.3	249.3	230.1	254.7
30	1093	Breweries.....	.283	234.5	251.9	268.0	274.4	284.7
31	5:02	Tobacco products industries.....	.212	175.7	181.1	186.8	199.6	199.4
32	5:03	Rubber and plastics products industries.	.650	538.6	614.7	705.5	718.2	664.5
33	162	Rubber products industries.....	.387	320.7	355.8	395.0	388.1	360.1
34	165	Plastics fabricating industry, n.e.s.	.263	217.9	258.9	310.5	330.1	304.4
35	5:04	Leather industries.....	.206	170.7	164.9	170.9	174.1	172.4
36	174	Shoe factories.....	.118	97.8	95.4	97.1	98.9	98.0
37	5:05	Textile industries.....	.769	637.3	714.1	761.3	745.7	713.2
38	181	Cotton yarn and cloth mills.....	.122	101.1	106.1	86.8	86.7	81.1
39	183	Man-made fibre, yarn and cloth mills.	.237	196.4	227.5	259.9	249.6	239.3
40	5:06	Knitting mills.....	.205	169.9	178.2	189.2	181.7	180.0

APPENDICE A. Produit intérieur réel, par industrie et par année, en dollars constants (C.A.É. 1970)

1976	1977	1978	1979	1980	1981	Industrie	C.A.É.	No
\$'000,000								
104,511.6	107,805.4	112,145.8				PRODUIT INTÉRIEUR RÉEL	1-11	1

Indices chronologiques du produit intérieur réel, par industrie, par année, 1971 = 100

S.I.C. 1970 CAE	Industry — Industrie	Annual 000389 Annuel
1-11	REAL DOMESTIC PRODUCT – PRODUIT INTÉRIEUR RÉEL	D 102198
1	AGRICULTURE – AGRICULTURE	D 102199
2	FORESTRY – FORÊTS	D 102200
3	FISHING AND TRAPPING – CHASSE ET PÊCHE	D 102201
4	MINES (including milling), QUARRIES AND OIL WELLS – MINES (y compris broyage), CARRIÈRES ET Puits DE PÉTROLE	D 102202
4:01	Metal mines – Mines métalliques	D 102203
057;059	Other metal mines – Autres mines métalliques	D 102204
059	Miscellaneous metal mines – Mines métalliques diverses	D 102195
4:02	Mineral fuels – Combustibles minéraux	D 102205
064	Crude petroleum and natural gas industry – Industrie du pétrole brut et du gaz naturel	D 102206
4:03	Non-metal mines (except coal mines) – Mines non métalliques (sauf mines de charbon)	D 102207
4:04	Quarries and sand pits – Carrières et sablières	D 102194
5	MANUFACTURING INDUSTRIES – INDUSTRIES MANUFACTURIÈRES	D 102196
5:01	Food and beverage industries – Industrie des aliments et boissons	D 102197
101	Meat and poultry products industries – Industrie de la viande et de la volaille	D 102094
104	Dairy products industry – Industrie laitière	D 102095
108	Miscellaneous food industries – Industries alimentaires diverses	D 102096
109	Beverage industries – Industrie des boissons	D 102097
5:02	Tobacco products industries – Industrie du tabac	D 102098
5:03	Rubber and plastics products industries – Industrie du caoutchouc et des produits en matière plastique	D 102099
162	Rubber products industries – Industrie des produits en caoutchouc	D 102100
5:04	Leather industries – Industrie du cuir	D 102101
5:05	Textile industries – Industrie textile	D 102102
5:06	Knitting mills – Bonneterie	D 102103
5:07	Clothing industries – Industrie de l'habillement	D 102104
5:08	Wood industries – Industrie du bois	D 102105
251	Sawmills, planing mills and shingle mills – Scieries, ateliers de rabotage et usines de bardeaux Furniture and fixture industries – Industrie du meuble et des articles d'ameublement	D 102106
5:09	Furniture and fixture industries – Industrie du meuble et des articles d'ameublement	D 102107
5:10	Paper and allied industries – Industrie du papier et activités connexes	D 102108
271	Pulp and paper mills – Usines de pâtes et papiers	D 102109
5:11	Printing, publishing and allied industries – Imprimerie, édition et activités connexes	D 102110
286;287	Commercial printing and platemaking industries – Imprimerie commerciale et industrie du clichage, de la composition et de la reliure commerciale	D 102111
288;289	Publishing and publishing and printing – Édition seulement et édition et impression	D 102112
5:12	Primary metal industries – Première transformation des métaux	D 102113
291	Iron and steel mills – Sidérurgie	D 102114
295	Smelting and refining – Fonte et affinage	D 102115
5:13	Metal fabricating industries (except machinery and transportation equipment industries) – Fabri- cation de produits en métal (sauf machines et équipement de transport)	D 102116
304	Metal stamping, pressing and coating industry – Industrie de l'emboutissage, du matriçage et du revêtement des métaux	D 102117
5:14	Machinery industries (except electrical machinery) – Fabrication de machines (sauf électriques)	D 102118
315	Miscellaneous machinery and equipment manufacturers – Fabricants de machines et d'équipe- ment divers	D 102119
5:15	Transportation equipment industries – Fabrication d'équipement de transport	D 102120
323;324	Motor vehicle and truck body and trailer manufacturers – Fabricants de véhicules automobiles et de carrosseries de camions et remorques	D 102121

A Note on CANSIM[®]

Data in this publication were retrieved from **CANSIM** (Canadian Socio-Economic Information Management System) and were manipulated and processed to create a photo-ready copy. All tabular data appearing in this publication, as well as many other data series, are available to the public from **CANSIM** via terminal, on computer printouts, or in machine readable form.

The pages 109 to 126 contain a list of Databank Numbers which can be used to access the series in **CANSIM**. For example, to retrieve Real Domestic Product, monthly, without seasonal adjustment, you must use "D 100215".

For further information write to **CANSIM**, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8, or call (613) 995-7406.

Note au sujet de CANSIM[®]

Les données figurant dans cette publication ont été extraites du **CANSIM** (Système canadien d'information socio-économique). Elles ont été traitées de façon à produire une copie destinée à la photocomposition. Toutes les données présentées dans cette publication et beaucoup d'autres données contenues dans le **CANSIM** peuvent être extraites par l'intermédiaire d'un terminal sous forme d'imprimés d'ordinateur ou sous une forme lisible par la machine.

Les pages 109 à 126 renferment une liste des numéros Databank qui peuvent être utilisés pour avoir accès aux séries du **CANSIM**. Ainsi, pour extraire le produit intérieur réel mensuel avant désaisonnalisation, il suffit d'utiliser "D 100215".

Pour plus de renseignements, écrivez à **CANSIM**, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphones à (613) 995-7406.

DEPOSITORY LIBRARY MATERIAL

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publications Distribution, Statistics Canada, Ottawa, K1A 0T6, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Industry Product Division,

Statistics Canada, Ottawa, K1A 0T6 (telephone: 995-0579) or to a local office of the bureau's User Advisory Services Division:

St. John's (Nfld.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1-800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Distribution des publications, Statistique Canada, Ottawa, K1A 0T6, ou à Imprimerie et édition, Approvisionnements et services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Division du produit industriel,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0579) ou à un bureau local de la Division de l'assistance-utilisateurs situé aux endroits suivants:

St. John's (T.-N.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1-800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and on services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The indexes of Real Domestic Product by Industry (included the Catalogue Nos. carrying the prefix 61) provide "constant dollar" measures of the contribution of each industry to Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue Nos. with prefix 14).

Both the Input-Output Tables and Indexes of Real Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2 Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les indices du produit intérieur réel par industrie (compris dans les publications dont les numéros de catalogue commencent par 61) mesurent, en dollars constants, l'apport de chaque branche d'activité au produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le numéro de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les indices du produit intérieur réel. Les comptes de flux financiers (publications dont les numéros de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, n° 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE RE: HISTORICAL CONTINUITY

On the 1971 base, a continuous record from 1971 of Real Domestic Product and the Index of Industrial Production and their components may be obtained from the following Statistics Canada publications:

61-213 *Real Domestic Product by Industry (1971 = 100)*, 1971-1979 issue, for the 1971-1979 period.

61-005 *Indexes of Real Domestic Product by Industry*, the April 1980 issue and current issues for the reference period beginning January 1980.

The same data are available in the following CANSIM matrices:

Real Domestic Product (including the Index of Industrial Production)

	Matrix numbers
Monthly	1122
Quarterly	1123
Annual	1124

For the period prior to 1971, selected annual data are available on a 1971 reference base. The data are available in CANSIM matrix 389 or can be made available upon request by contacting Mrs. M. Galea (613-995-0581), Industry Product Division, Statistics Canada, Ottawa, K1A 0T6.

To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically re-based to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Real Domestic Product and the Index of Industrial Production and the component indexes required for linkage to the 1971 based series may be obtained from the following Statistics Canada publications:

Indexes of Real Domestic Product by Industry - (1961 Base) Catalogue 61-506, for Real Domestic Product for the period from 1935-1960 and for the Index of Industrial Production for the period from 1919-1960.

Real Domestic Product by Industry, 1961-1971, 1961 = 100, Catalogue 61-516, for the period from 1961-1971.

REMARQUES SUR LA CONTINUITÉ CHRONOLOGIQUE

Les publications de Statistique Canada sous mentionnées peuvent servir à établir une continuité du produit intérieur réel et de l'indice de la production industrielle et de leurs composantes sur la base 1971 = 100 à partir de 1971:

61-213 *Produit intérieur réel par industrie (1971 = 100)*, publication consacrée à la période 1971-1979.

61-005 *Indices du produit intérieur réel par industrie*, l'édition d'avril 1980 et les publications courantes présentent des données pour la période de référence commençant en janvier 1980.

On peut obtenir les mêmes données des matrices suivantes de CANSIM:

Produit intérieur réel (y compris l'indice de la production industrielle)

	Numéros de matrice
Mensuel	1122
Trimestriel	1123
Annuel	1124

En ce qui concerne les années antérieures à 1971, certaines données par année sont disponibles sur la base 1971 = 100. On peut obtenir les données de la matrice 389 de CANSIM ou on peut se procurer ces données en s'adressant à Mme M. Galea (613-995-0581), Division du produit industriel, Statistique Canada, Ottawa, K1A 0T6.

Pour obtenir une continuité des données de ces années, les indices sur la base 1961 = 100 doivent être convertis arithmétiquement à l'année de référence 1971 en les multipliant par 100.0 et en divisant le produit obtenu par la valeur de l'indice de 1971 sur la base de 1961 = 100. Dans le cas de 1971 et des années antérieures, le produit intérieur réel et l'indice de la production industrielle et des composantes nécessaires au raccordement avec les séries dont l'année de référence est 1971 peuvent être tirés des publications suivantes:

Indexes of Real Domestic Product by Industry - (1961 Base) n° 61-506 au catalogue, produit intérieur réel pour la période 1935-1960 et indice de la production industrielle pour la période 1919-1960.

Produit intérieur réel par industrie, 1961-1971, 1961 = 100, n° 61-516 au catalogue, la période 1961-1971.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following CANSIM matrices:

	Matrix numbers
Real Domestic Product:	
Annual	383
Quarterly	15
Monthly	1421
Index of Industrial Production:	
Annual	384
Monthly	16

SYMBOLS AND CODES

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- nil or zero.
- amount too small to be expressed.

S.I.C. code: The Standard Industrial Classification code appearing in the tables should be interpreted as follows:

An S.I.C. Division is indicated by one of the integers 1 to 11.

An S.I.C. Major group within the Division is indicated by two digits following the Division code and separated from it by a colon (:).

A 3- or -4 digit industry class is indicated by 3- or -4 digits respectively.

CONTENT OF SPECIAL INDUSTRY GROUPINGS

The industry content of these special groupings is defined as follows:

Real Domestic Product less agriculture: All industries less agriculture (S.I.C. 2 — 11).

Goods-producing industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); construction industry (S.I.C. 6); and electric power, gas and water utilities (S.I.C. 7:04).

Goods-producing industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; 7:04).

Service-producing industries: Transportation, storage and communication (S.I.C. 7:01-03); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); community, business and personal service industries (S.I.C. 10); and public administration and defence (S.I.C. 11).

Commercial industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); construction industry (S.I.C. 6); transportation, storage and communication (S.I.C. 7:01-03) less highway and bridge maintenance (S.I.C. 516); electric power (S.I.C. 572); gas distribution (S.I.C. 574); trade (S.I.C. 8); finance

SIGNES ET CODES CONVENTIONNELS

Voici la signification des signes et des codes conventionnels employés dans les tableaux:

- .. chiffre non disponible.
- néant ou zéro.
- chiffre infirme.

Code CAÉ: le code de la classification des activités économiques figurant aux tableaux doit être interprété comme suite:

Une branche de la CAÉ, est indiquée par un des nombres entiers de 1 à 11.

Un groupe de la CAÉ à l'intérieur d'une branche, est indiqué par deux chiffres qui suivent le code de la branche et sont séparés de celui-ci par deux points (:).

Une classe d'industrie à 3- ou -4 chiffres est indiquée par 3- ou -4 chiffres respectivement.

INDUSTRIES RÉUNIES DANS CHAQUE AGRÉGAT SPECIAL

Énumération des industries composant chaque groupe spécial ci-après:

Produit intérieur réel, moins l'agriculture: Toutes les industries, moins l'agriculture (CAÉ 2 — 11).

Industries productrices de biens: Agriculture (CAÉ 1); forêts (CAÉ 2); chasse et pêche (CAÉ 3); mines (y compris le broyage), carrières et puits de pétrole (CAÉ 4); industries manufacturières (CAÉ 5); bâtiment et travaux publics (CAÉ 6); et énergie électrique, gaz et eau (CAÉ 7:04).

Industries productrices de biens, moins l'agriculture: Le total du groupement précédent, moins l'agriculture (CAÉ 2-6; 7:04).

Industries productrices de services: Transports, entreposage et communications (CAÉ 7:01-03); commerce (CAÉ 8); finances, assurances et affaires immobilières (CAÉ 9); services socio-culturels, commerciaux et personnels (CAÉ 10); administration publique et défense (CAÉ 11).

Industries commerciales: Agriculture (CAÉ 1); forêts (CAÉ 2); chasse et pêche (CAÉ 3); mines (y compris broyage), carrières et puits de pétrole (CAÉ 4); industries manufacturières (CAÉ 5); bâtiment et travaux publics (CAÉ 6); transports, entreposage et communications (CAÉ 7:01-03); moins l'entretien des routes et des ponts (CAÉ 516); électricité (CAÉ 572); distribution de gaz (CAÉ 574); commerce (CAÉ 8);

insurance and real estate (S.I.C. 9); related health care institutions (S.I.C. 822); offices of physicians and surgeons (S.I.C. 823); offices of para-medical personnel (practitioners) (S.I.C. 824); offices of dentists (S.I.C. 825); diagnostic and therapeutic services n.e.s. (S.I.C. 826); miscellaneous health services (S.I.C. 827); amusement and recreation services (S.I.C. 10:04); services to business management (S.I.C. 10:05); personal services (S.I.C. 10:06) less private households (S.I.C. 873); accommodation and food services (S.I.C. 10:07); miscellaneous services (S.I.C. 10:08).

Commercial industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; part of 7; 8; 9 and part of 10).

Non-commercial industries: Highway and bridge maintenance (S.I.C. 516); water systems and other utilities (S.I.C. 576; 579); hospitals (S.I.C. 821); welfare organizations (S.I.C. 828); religious organizations (S.I.C. 831); private households (S.I.C. 873); education and related services (S.I.C. 10:01); and public administration and defence (S.I.C. 11).

Index of Industrial Production: Mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing industries (S.I.C. 5); and electric power, gas and water utilities (S.I.C. 7:04).

Note

1. Due to rounding, sub-annual detail may not average annual level.

2. For RDP purposes the content of S.I.C. Division 7 has been altered to include only transportation, storage and communication; electric power, gas, water and other utilities are excluded and measured separately, as a component of the Index of Industrial Production.

finances, assurances et affaires immobilières (CAÉ 9); établissements annexes de soins sanitaires (CAÉ 822); cabinets de médecin et de chirurgien (CAÉ 823); cabinets de praticiens paramédicaux (CAÉ 824); cabinets de dentiste (CAÉ 825); services de diagnostic et de soins n.c.a. (CAÉ 826); services de santé divers (CAÉ 827); divertissements et loisirs (CAÉ 10:04); services fournis aux entreprises (CAÉ 10:05); services personnels (CAÉ 10:06), moins ménages privés (CAÉ 873); hébergement et restauration (CAÉ 10:07); services divers (CAÉ 10:08).

Industries commerciales, moins l'agriculture: Le total du groupe précédent, moins l'agriculture (CAÉ 2-6; partie de 7; 8; 9 et partie de 10).

Industries non commerciales: Entretien des routes et des ponts (CAÉ 516); distribution d'eau et autres services d'utilité publique (CAÉ 576; 579); hôpitaux (CAÉ 821); organismes de bien-être (CAÉ 828); organisations culturelles (CAÉ 831); ménages (CAÉ 873); enseignement et services connexes (CAÉ 10:01); administration publique et défense (CAÉ 11).

Indice de la production industrielle: Mines (y compris le broyage), carrières et puits de pétrole (CAÉ 4); industries manufacturières (CAÉ 5); énergie électrique, gaz et eau (CAÉ 7:04).

Nota

1. En raison de l'arrondissement des chiffres, il se peut que la moyenne des données mensuelles et trimestrielles n'équivaille pas au niveau annuel.

2. Pour le calcul du PIR, la division 7 de la CAÉ a été modifiée de façon à inclure seulement les transports, l'entreposage et les communications. L'énergie électrique, le gaz, l'eau et les autres services d'utilité publique sont évalués séparément et font partie de l'indice de la production industrielle.

TECHNICAL NOTE

This report presents measures of Real Domestic Product (RDP) by industry for the 1971-1979 period on a 1971 time and weight base. It should also be noted that the 1970 Standard Industrial Classification is used in this publication. Underlying concepts and general methodology remain unchanged.

1971 Industry Weights

The estimates of 1971 Gross Domestic Product by industry are unchanged from the previous annual publication. In deriving the industry weights, the latest available data from Statistics Canada censuses and annual surveys were used. It was also necessary to exploit sources such as company annual reports and taxation records, as well as operating ratios from other sources. The currently-used 1971 GDP distributions are still subject to revision and can be finalized only after detailed reconciliation of all components of the System of National Accounts. It is expected, however, that the industrial distribution will not be substantially changed, particularly for the higher aggregates.

As shown by the table below, service-producing industries increased their share of total GDP in 1971 as compared with 1961. This represents a continuation of a trend apparent between 1949 to 1961, the two previous weight base periods.

NOTE TECHNIQUE

Cette publication présente des mesures du produit intérieur réel (PIR) par industrie pour la période 1971-1979. Les bases de référence et de pondération de ces mesures sont celles de 1971. Il est à noter également que la Classification des activités économiques de 1970 est utilisée dans cette publication. Les concepts sous-jacents et la méthodologie générale n'ont pas changé.

Pondérations 1971 de l'industrie

Les estimations du produit intérieur réel par industrie pour 1971 sont les mêmes que celles utilisées dans la publication annuelle précédente. Les dernières données disponibles des recensements et des enquêtes annuelles de Statistique Canada ont été utilisées pour établir ces pondérations. On s'est également servi d'autres données, comme les déclarations annuelles et les dossiers fiscaux des entreprises, et aussi des ratios d'exploitation provenant d'autres sources. La présente distribution du PIB de 1971 demeure sujette à révision et ne pourra être parachevée seulement qu'après une réconciliation détaillée de toutes les composantes du système de comptabilité nationale. Cependant, on s'attend à ce que la distribution industrielle ne changera pas tellement, surtout au niveau des agrégats majeurs.

Comme l'indique le tableau ci-dessous, comparative-ment à 1961, les industries de services tiennent une place plus importante dans le PIB total. Cette augmentation est la suite de la tendance apparue entre 1949 et 1961, les deux dernières années à servir de base aux pondérations.

	1949	1961	1971
Goods-producing industries — Industries de biens	53.080	44.233	40.572
Service-producing industries — Industries de services	46.920	55.767	59.428
Gross domestic product — Produit intérieur brut	100.000	100.000	100.000

RDP in Constant Dollars

Table 1 of this publication contains constant dollar RDP by industry in 1971 prices. The constant dollar data have been derived by projecting GDP in the base year using the output indexes for each industry from Table 2.

Estimates in Current and Constant Dollars

At the end of the report (Appendix A), there is a special section on selected manufacturing industries, showing annual estimates of gross output, intermediate inputs and value added in current and constant dollars as well as the resultant implicit price indexes. The industrial detail consists of total manufacturing, all major groups, and selected 3-digit S.I.C. industries.

The current price (i) gross output (ii) intermediate input and (iii) value added series have been derived as follows:

- (i) For each industry, the value of total production obtained from the census of manufacturers is adjusted, where necessary, to include estimates of additional income items such as rentals. In calculating the value of production, the physical change in inventories has been valued in prices of the current period. Some additional modifications were made to maintain continuity where there were changes in the basis of the reports during the period or to convert the Census data from a fiscal to a calendar year basis.
- (ii) Intermediate inputs are derived by adding an estimate of the cost of purchased service inputs and indirect taxes to the cost of material inputs, supplies, containers, fuel and electricity, etc., obtained from the census of manufacturers. The service inputs were estimated as a fixed proportion of value-added in both current and constant dollars.
- (iii) Value added is derived residually, that is, it is the difference between gross outputs and intermediate inputs.

The implicit price indexes are derived by dividing each current price series by the corresponding constant price series. Since the deflation process is carried out at a detailed commodity level, thereby capturing the current period commodity structure, the resultant implicit price indexes should be considered as Paasche or currently weighted price indexes.

PIR en dollars constants

Le tableau 1 de cette publication contient des données du PIR par industrie aux prix de 1971. Les données en dollars constants furent obtenues en projetant le PIR brut de l'année de base avec les indices de production de chaque industrie dans le tableau 2.

Estimations en dollars courants et constants

On trouve à la fin du rapport une section spéciale, l'appendice A, sur le groupe des industries manufacturières. Y sont présentées des estimations annuelles de la production brute, de la consommation intermédiaire et de la valeur ajoutée. Ces données sont disponibles pour l'ensemble des entreprises manufacturières, pour tous les agrégats principaux et pour certaines industries à 3 chiffres.

Les séries en prix courants (i) de la production brute, (ii) de la consommation intermédiaire et (iii) de la valeur ajoutée sont calculées comme suit:

- (i) Pour chaque industrie, l'estimation de la production totale, tirée du recensement manufacturier, est ajustée, si nécessaire, pour inclure certains revenus additionnels, par exemple, de location. Au moment du calcul, les variations matérielles des stocks ont été évaluées aux prix de la période courante. Certaines modifications additionnelles furent apportées en vue de conserver une continuité chronologiques là où il y a eu des changements dans les structures des comptes rendus durant la période ou pour ajuster les données du recensement de l'année fiscale à l'année de calendrier.
- (ii) La consommation intermédiaire est obtenue en additionnant le coût des services achetés et les taxes indirectes aux coûts des matériaux, des fournitures, des contenants, du combustible et de l'électricité, etc., fournis par le recensement manufacturier. Les intrants de services furent estimés comme une proportion fixe de la valeur ajoutée en dollars courants et constants.
- (iii) La valeur ajoutée est dérivée de façon résiduelle, c'est-à-dire, qu'elle est la différence entre la production brute et la consommation intermédiaire.

Les indices implicites de prix proviennent de la division de chaque série en prix courants par la série correspondante en prix constants. Comme le dégonflement des données s'effectue pour une désagrégation poussée des produits, reflétant ainsi leur structure courante, les indices implicites qui en résultent devraient être considérés comme des indices de Paasche ou des indices de prix à pondération courante.

The current dollar data (for years other than the base years) were subjected to critical appraisal and rigorous time series analysis only to the extent necessary to achieve the primary objective of producing reliable estimates of RDP.

Consequently, the current dollar data, and therefore the implicit price indexes for the 1972-1977 period inclusive, should, on the whole, be considered to be less reliable than the constant price measures.

Linking RDP on a 1971 Base with RDP on a 1961 Base

Subject to rounding errors, a linked series can be calculated between the 1961- and 1971- based RDP series which are identical under the 1960 and 1970 S.I.C.'s using the index values for 1971. For a 1971-based series, the 1961-based series should be multiplied by 100.0 and divided by the index value for 1971 for the series on the 1961 base. For a continuous series on a 1961 base, the 1971-based series should be multiplied by the index value for 1971 for the series on a 1961 base and divided by 100.0.

Revisions to RDP

The revisions to RDP apply to the period 1976 to date.

The existing data for wholesale trade for the 1971 to 1975 period have been reaggregated to conform to the definition of wholesale merchants used after 1975. This resulted in a small revision to the data.

Annual measures of RDP have been calculated for an additional year, revisions to source data have been incorporated and methodology has been changed for some industries.

The monthly data have been revised due to the incorporation of the latest annual levels, revisions to the monthly data on which the output indexes are based, changes in the methodology for several industries and revisions to the seasonal factors.

Les données en dollars courants (pour les années autres que l'année de base) furent l'objet d'une évaluation critique et d'une analyse de série chronologiques rigoureuse jusqu'au point nécessaire pour atteindre l'objectif primordial de produire des estimations solides du PIR.

En conséquence, les données en dollars courants et, par conséquent, les indices implicites de prix pour la période de 1972-1977 inclusivement devraient être considérés dans leur ensemble comme étant moins solides que les mesures en prix constants.

Raccordement du PIR sur la base 1971 = 100 au PIR sur la base 1961 = 100

Compte tenu des erreurs d'arrondissement, il est possible de calculer une série raccordée entre les séries du PIR dont les années de référence sont 1961 et 1971 et qui ont la même définition dans la CTI de 1961 et la CAÉ de 1970 en utilisant la valeur des indices de 1971. Dans le cas d'une série 1971 = 100, il faut multiplier les séries 1961 = 100 par 100.0 et diviser le produit obtenu par la valeur de l'indice de 1971 pour la série dont l'année de référence est 1961. En ce qui concerne les séries continues dont l'année de référence est 1961, il faut multiplier la série 1971 = 100 par la valeur de l'indice de 1971 pour la série sur la base 1961 et diviser le produit obtenu par 100.0.

Révisions du PIR

Les révisions au PIR concernent la période allant de 1976 à 1979.

Les données existantes sur le commerce de gros pour la période entre 1971 et 1975 ont été remaniées et, par le fait même, un peu modifiées, afin de correspondre à la définition des grossistes utilisée à partir de 1975.

Pour un certain nombre d'activités économiques, on a calculé les chiffres annuels du PIR pour une année supplémentaire, puis incorporé des révisions aux données de référence et changé la méthodologie.

Les données mensuelles ont été révisées en vue de prendre en compte l'incorporation des niveaux annuels les plus récents, les modifications apportées aux données mensuelles servant au calcul des indices de production, les changements méthodologiques pour plusieurs branches d'activité et les révisions des facteurs saisonniers.

The revisions to year-to-year movements in certain aggregates are included in the following table. As can be seen only the 1977 and 1978 movements were significantly altered from the previously published data. The changes result from a downward revision in the goods-producing industries.

Le tableau suivant présente les révisions apportées aux variations annuelles de certains agrégats. Ainsi, seules celles de 1977 et 1978 ont sensiblement varié par rapport aux données déjà publiées. Les changements résultent d'une révision en baisse survenue dans les industries de biens.

Revisions to Year-to-year Percentage Changes in Real Domestic Product and Major Aggregates

Révisions aux variations annuelles en pourcentage du produit intérieur réel et des principaux agrégats

	1976	1977	1978	1979
Real Domestic Product – Produit intérieur réel:				
Revised – Révisé	5.3	2.8	3.5	3.1
Unrevised – Non révisé	5.3	3.2	4.0	3.1
Real Domestic Product excluding agriculture – Produit intérieur réel sans l'agriculture:				
Revised – Révisé	5.2	2.9	3.4	3.3
Unrevised – Non révisé	5.2	3.1	3.9	3.2
Index of industrial production – Indice de la production industrielle:				
Revised – Révisé	5.5	2.2	4.1	4.7
Unrevised – Non révisé	5.6	3.2	5.8	4.0
Goods-producing industries – Industries productrices de biens:				
Revised – Révisé	5.6	1.8	3.3	3.7
Unrevised – Non révisé	5.8	2.6	4.9	3.3
Service-producing industries – Industries productrices de services:				
Revised – Révisé	5.1	3.5	3.6	2.8
Unrevised – Non révisé	4.9	3.5	3.6	2.9
Non-commercial industries – Industries non commerciales:				
Revised – Révisé	2.8	1.7	1.5	0.3
Unrevised – Non révisé	2.3	1.7	1.4	- 0.4
Commercial industries – Industries commerciales:				
Revised – Révisé	5.8	3.0	3.9	3.6
Unrevised – Non révisé	5.9	3.4	4.6	3.7

During the period 1971 to 1979 Canadian economic activity as measured by Real Domestic Product (RDP) increased at an annual average rate of 4.0%. This compares with an annual growth rate of 5.5% for the period 1961 to 1971. Growth in the service-producing industries exceeded that for the economy and averaged 4.7% over the 1971 to 1979 period. However, the growth rate in services was uneven throughout the 1970's: the average rate of 6.3% from 1971 to 1974 decreased to 3.7% from 1975 to 1979. For the cyclically sensitive goods-producing industries the annual data indicate a slowdown in 1974 and a 4% decline in 1975. The economic downturn in 1975 was widespread among the goods-producing industries and also affected some of the service-producing industries, such as transportation and wholesale trade. After the 1976 upturn, growth rates generally remained below those for the 1971 to 1974 period.

This pattern of growth is graphically displayed in Chart 1 which is based on seasonally adjusted monthly data. These data indicate a further levelling off in 1977 and again in the last quarter of 1979, particularly in the goods-producing industries.

The 3.1% increase in aggregate RDP for the year 1979 continued the trend of lower growth rates experienced in recent years. The goods-producing industries rose 3.7% and services increased 2.8%.

Final demand as measured by Gross National Expenditure (GNE) increased by less than 3% in 1979, resulting from an increase of only 2% in consumer expenditure on goods and services, a decline in government expenditure of about 1% and growth in merchandise exports of only 2%. The areas of strength in final demand were business investment in machinery and equipment (up 9%) and non-residential construction (up almost 10%). Inventory accumulation was also substantial, amounting to 1½% of total GNE.

Government expenditures on goods and services were weak in 1979. The fractional declines in public administration and defence services and in education were factors contributing to the slow rate of growth for the economy in 1979. For public administration and defence the previous low rate of growth was a 2% increase in 1978. The decrease in 1979 was the result of a decline in federal administration and very slow growth in local administration. In education, declining enrollment in primary and secondary schools has been reducing growth since 1972. In 1979, this was accompanied by a marked slowdown in the rate of growth of post-secondary education.

De 1971 à 1979, l'activité économique totale du Canada mesurée par le produit intérieur réel (PIR) a progressé à un taux annuel moyen de 4.0 %, comparativement à 5.5 % entre 1961 et 1971. La croissance des industries de services a été plus rapide que celle de l'économie, atteignant 4.7 % durant la période 1971 à 1979. Cependant, le taux de croissance des services a été inégal au cours des années 70: le taux moyen est passé de 6.3 % entre 1971 et 1974 à 3.7 % de 1975 à 1979. Pour les industries de biens sensibles aux variations cycliques, on constate un ralentissement en 1974 et un fléchissement de 4 % en 1975. La baisse de l'activité économique en 1975 a été ressentie généralement parmi les autres industries de biens et a aussi touché certaines industries de services, notamment les transports et le commerce de gros. Après la recrudescence observée en 1976, les taux sont généralement demeurés inférieurs à ceux de la période 1971 à 1974.

Ce profil de croissance est illustré au graphique 1, qui est fondé sur des données mensuelles désaisonnalisées. Celles-ci laissent voir un plafonnement en 1977 et également au dernier trimestre de 1979, particulièrement dans les industries de biens.

L'accroissement de 3.1 % du PIR global en 1979 suivait le courant des faibles taux de croissance observés au cours des dernières années. Les industries de biens ont progressé de 3.7 % et celles de services, de 2.8 %.

La demande finale mesurée par la dépense nationale brute (DNB) s'est accrue de moins de 3 % en 1979, par suite d'une augmentation de seulement 2 % des dépenses de consommation en biens et en services, d'un fléchissement de près de 1 % des dépenses gouvernementales et d'une croissance de seulement 2 % des exportations de marchandises. En revanche, les investissements des entreprises en machines et en équipement (en hausse de 9 %) et la construction non résidentielle (presque 10 %) ont été les secteurs forts de la demande finale. Les stocks ont également augmenté de façon appréciable, totalisant 1½ % de la DNB totale.

Les dépenses gouvernementales en biens et en services ont été peu élevées en 1979. Les légères baisses dans l'administration publique et la défense, ainsi que dans l'enseignement, ont contribué à la faiblesse du taux de croissance de l'économie. On avait enregistré un accroissement de seulement 2 % en 1978 dans l'administration publique et la défense. La baisse observée en 1979 est attribuable à un fléchissement dans l'administration fédérale et à une très faible croissance dans les administrations locales. Dans le domaine de l'enseignement, la baisse des effectifs des écoles primaires et secondaires a freiné la croissance depuis 1972. En 1979, on a aussi constaté un net ralentissement du taux de croissance dans l'enseignement postsecondaire.

The weakness of consumer demand for goods is reflected in the 2% increase in retail trade in 1979. This was the third consecutive year of relatively slow growth for retail trade. During 1978, when sales taxes were reduced to stimulate consumer purchases, there had been an acceleration in retail sales. For a number of commodities, in 1979, there was a shift away from general merchandise stores towards stores specializing in a limited range of products. For example, sales of clothing by clothing stores increased by 4½% compared to the 2% overall increase in clothing sales at the retail level. Similarly, sales of major household appliances by furniture and appliance stores increased by almost 6% compared with an overall increase of about 3½%.

In 1979, most of the strength in retail trade originated with durable goods. The largest contribution to the increase came from new motor vehicle sales although their advance was just over 2%. A 10% increase in imports of vehicles from the United States accounted for the gain; purchases from domestic production declined and sales of overseas-manufactured cars decreased by almost 20%. Output of wholesalers of motor vehicles and parts also decreased due to the weakness related to reduced sales of overseas-manufactured motor vehicles in the year. The next largest contribution to the increase in durables goods came from sales of radios and sound systems and television sets. This was accompanied by a 7% advance in the output of manufacturers of household radios and television receivers. Other major contributors to the increase in retail trade were sporting goods, bicycles and motorcycles, cameras and accessories, automotive parts and accessories and household appliances.

Among semi-durables, clothing sales increased by only 2% in 1979 — about one-half the rate of increase in 1978. The same pattern was exhibited by clothing industries in manufacturing where the growth in 1979 was about one-half that of the previous year. The output of the knitting mills industries grew strongly in 1979, mainly due to an increase in production from hosiery mills. This again was paralleled by a 5% growth in retail sales.

Purchases of food are the most important component of consumer expenditure on non-durable goods. In real terms, retail sales of food have been at virtually the same level since 1976. The cumulative increase in food prices over the three-year period was 42%. The output of wholesalers of food products and those food and beverage manufacturers who are primarily oriented to the domestic market also showed some weakness in 1979. Most of the component industries increased slightly or decreased in the year. The increase in brewery production was partly attributable to

La progression de seulement 2% du commerce de détail en 1979 traduit la faiblesse des dépenses de consommation pour les biens. D'ailleurs, le commerce de détail connaît une croissance relativement faible pour une troisième année consécutive. Les ventes au détail avaient connu un essor en 1978, lorsque la taxe de vente a été réduite pour encourager les achats des consommateurs. En 1979, de nombreux produits sont passés des magasins de marchandises générales à des magasins spécialisés ayant une gamme de produits réduite. Ainsi, les ventes de vêtements par les magasins de vêtements ont augmenté de 4½ %, contre 2 % pour l'ensemble des ventes de vêtements au détail. De même, les magasins de meubles et d'appareils ménagers ont augmenté leurs ventes de gros appareils ménagers de presque 6 %, contre une hausse globale d'environ 3½ % dans ce secteur.

Les biens durables expliquent en grande partie la croissance du commerce de détail en 1979. Les ventes de véhicules automobiles neufs ont été le facteur le plus important de la hausse, malgré une progression tout juste supérieure à 2 %. Cette progression est attribuable à une augmentation de 10 % des importations de véhicules en provenance des États-Unis; les achats de véhicules fabriqués au pays ont fléchi et les ventes de voitures fabriquées outre-mer ont chuté de près de 20 %. Les grossistes de véhicules automobiles et de pièces ont également accusé un recul en raison de la faiblesse des ventes de véhicules automobiles fabriqués outre-mer au cours de l'année. Les ventes de radios, de chaînes stéréophoniques et de téléviseurs viennent au deuxième rang dans la hausse des biens durables. Les fabricants de radios et de téléviseurs ont ainsi vu leur production grimper de 7 %. Ont aussi contribué à la hausse du commerce de détail les articles de sport, les bicyclettes et motocyclettes, les appareils de photographie et accessoires, les pièces d'automobiles et accessoires et les appareils ménagers.

Au chapitre des biens semi-durables, les ventes de vêtements ont augmenté de seulement 2 % en 1979, soit la moitié du taux observé en 1978. Les fabricants de vêtements ont aussi connu une croissance de moitié inférieure à celle de l'année précédente. La bonneterie a réalisé une performance remarquable en 1979, en raison surtout de l'augmentation de la production des fabricants de bas et de chaussettes. En retour, les ventes au détail de ces produits ont crû de 5 %.

Les aliments constituent la principale composante des dépenses de consommation en biens non durables. En termes réels, les ventes au détail d'aliments sont à peu près stables depuis 1976. L'accroissement cumulé des prix des aliments au cours de cette période de trois années a été de 42 %. La production des grossistes en produits alimentaires et celle des fabricants d'aliments et de boissons destinés à la consommation intérieure ont également manifesté des signes de faiblesse en 1979. Au cours de l'année, la plupart des industries de ce secteur ont soit légèrement augmenté ou ont diminué. La hausse de la

a one-third increase in the volume of exports. Distilleries' output increased substantially from the strike-affected level of 1978. Exports increased slightly.

In the area of transport, the group of industries involved mainly in passenger transport advanced by about 8%, largely on the strength of a 13% increase in air transport. The average growth rate in the industry since 1971 was 10%. Both urban and interurban bus transport declined, by 7% and 6% respectively. Strike activity was responsible for some of the decline in both industries. In urban transit, the Consumer Price Index indicated a 15% increase in fares for the year 1979.

The output of the amusement and recreation services group decreased slightly in 1979. The industry has grown little in the last three years. In contrast, growth rates in the early 1970's exceeded 10%. Personal services increased by less than 1% in the year. Accommodation and food services' output slowed in 1979, primarily due to a slowdown in the restaurant component.

As noted earlier, investment in machinery and equipment increased strongly in 1979. The output of agricultural implements manufacturers grew by almost 20% in 1979. Increased demand associated with strong advances in net farm income in both 1978 and 1979 was a contributing factor. Miscellaneous machinery and equipment manufacturers' production increased by more than 10% for the second consecutive year. This industry produces a variety of industrial machinery and equipment and some consumer-oriented products. Strong increases were also recorded by the commercial refrigeration and air conditioning (20%), the office and store machinery (26%), and the electrical industrial equipment (6%) industries. Communications equipment manufacturers increased their output by 10%, partly in response to investment demands in the telecommunications industries.

Construction output advanced 2% in 1979 following slight decreases in 1978 and 1977. Growth in 1979 was mainly attributable to an increase in non-residential building construction following three years of decline. An increase in the current dollar share of investment by trade, financial and commercial services partly accounted for the increase. Governments' share of total investment decreased to its lowest level since 1971.

Residential construction activity declined substantially for the third consecutive year. Housing starts in total declined about 13% in 1979. Substantial declines occurred in starts of semi-detached, row and apartment dwellings. The number of single detached

production des brasseries s'explique en partie par l'augmentation du tiers du volume des exportations. La production des distilleries, qui avait été touchée par des grèves en 1978, a augmenté de façon appréciable, les exportations grimpant légèrement.

Dans le domaine des transports, le groupe des industries assurant surtout le transport des passagers a progressé d'environ 8 %, grâce en particulier à la poussée de 13 % dans le transport aérien. Le taux de croissance moyen dans cette branche d'activité s'établit à 10 % depuis 1971. Le transport par autocar a fléchi de 6 % et le transport urbain de 7 %. Dans les deux cas, des grèves expliquent une partie du fléchissement. L'indice des prix à la consommation indique que les tarifs du transport en commun ont augmenté de 15 % en 1979.

Le groupe des divertissements et des loisirs a accusé un léger recul en 1979. D'ailleurs, on a enregistré une très faible croissance dans ce groupe au cours des trois dernières années, alors que les taux de croissance au début des années 70 dépassaient 10 %. Les services personnels ont crû de moins de 1 % au cours de l'année. Les services d'hébergement et de restauration ont régressé, en raison surtout d'un ralentissement de la composante des restaurants.

Comme nous l'avons déjà mentionné, les investissements en machines et en équipement ont grimpé fortement en 1979. La production des fabricants de machines agricoles s'est accrue de près de 20 %, en raison d'une demande stimulée par la forte progression du revenu agricole net tant en 1978 qu'en 1979. La production des fabricants de machines et d'équipement divers s'est haussée de plus de 10 % pour une deuxième année de suite. Cette industrie produit un éventail de machines et d'équipement industriels et certains produits destinés aux consommateurs. De fortes hausses ont également été observées pour la climatisation et la réfrigération commerciales (20 %), les machines pour le bureau et le commerce (26 %) et l'équipement électrique industriel (6 %). Les fabricants de matériel de communications ont augmenté leur production de 10 %, en partie par suite de la demande des industries des télécommunications.

Dans la construction, la production a grimpé de 2 % en 1979, après de légères baisses en 1978 et 1977. Cette situation s'explique surtout par l'augmentation de la construction d'immeubles non résidentiels, après trois années de baisse. Une partie de l'augmentation est attribuable à la hausse des investissements en dollars courants réalisés par les services commerciaux et financiers. La part des administrations publiques dans l'investissement total est tombée à son plus bas niveau depuis 1971.

Pour une troisième année de suite, la construction résidentielle a fléchi considérablement. Les mises en chantier totales ont régressé d'environ 13 % en 1979, surtout dans les logements jumelés et en rangée et dans les appartements. Les mises en chantier de logements individuels

housing starts was about equal in 1978 and 1979. Mortgage interest rates for conventional mortgages ranged from a low of 11% in April to over 14% in November, 1979.

The weakness in residential construction activity in 1979 led to a decline in the output of wholesalers of building materials and supplies. A number of other industries were also affected by the level of construction activity. Sawmills, planing mills and shingle mills advanced by less than 1% in the face of the weakening residential construction demand in both Canada and the United States. Lumber prices had reached record highs and demand was strong until the fourth quarter of 1979. Exports of lumber to the United States decreased nearly 6%; exports worldwide declined about 1%. Veneer and plywood mills' real output decreased by 6%.

Most of the non-metallic mineral products industries such as ready-mix concrete, clay products and glass products manufacturers were weak in 1979. The exception was the cement industry which may have benefitted from the strength in non-residential construction.

The export-oriented industries showed diverse movements in 1979. The output of iron mines increased in 1979, following strikes at the Quebec and Labrador mines from March to July in 1978. (Exports of iron ore fell in 1978 and increased sharply in 1979.) Ore inventories decreased substantially from the end of 1978 to the end of 1979.

Output of other metal mines — which produce mainly copper, nickel, lead and zinc — decreased by about 3% in 1979. This followed an almost 18% decline in 1978. Strikes in 1978 which continued into 1979 were responsible for much of the decrease. Copper production decreased in 1979. Nickel production increased slightly in the year as nickel prices increased. Nickel inventories, which had been at extremely high levels in 1978, returned to more normal levels in 1979.

Asbestos mining increased by more than 9% in 1979 following a strike in 1978. Potash mining increased in 1979 as export volumes rose more than 13%. The shortage of railway hopper cars which had affected shipments in 1978 was not as severe in 1979.

Coal mining output increased about 6% in 1979, in response to increased thermal generation; western coal was used for the first time in Ontario. Coal exports increased slightly.

sont demeurées à peu près égales à celles de 1978. Les taux d'intérêt des hypothèques conventionnelles se sont échelonnés de 11 % en avril à plus de 14 % en novembre 1979.

La faiblesse de la construction résidentielle a entraîné un fléchissement de la production des grossistes en matériaux de construction. D'autres industries ont également été touchées. Ainsi, les scieries, ateliers de rabotage et usines de bardeaux ont progressé de moins de 1 % en raison de la faiblesse de la construction résidentielle, tant au Canada qu'aux États-Unis. Les prix du bois ont atteint des sommets et la demande a été forte jusqu'au quatrième trimestre de 1979. Les exportations de bois de construction vers les États-Unis ont diminué d'environ 6 % et celles vers l'ensemble des pays, d'environ 1 %. La production réelle des usines de placages et de contre-plaqué a chuté de 6 %.

La plupart des industries de fabrication de produits minéraux non métalliques, notamment les fabricants de béton préparé, de produits d'argile et de verre, ont été anémiques en 1979. Les fabricants de ciment font toutefois exception, ayant bénéficié de la vigueur de la construction non résidentielle.

Les industries consacrées surtout à l'exportation ont suivi des mouvements inégaux en 1979. La production des mines de fer a augmenté, par suite de la fin des grèves qui ont frappé les mines du Québec et du Labrador de mars à juillet 1978. (Les exportations de minerai de fer sont tombées en 1978, mais ont grimpé de façon appréciable en 1979.) Les stocks de minerai ont beaucoup diminué de la fin de 1978 à la fin de 1979.

La production des autres mines métalliques, produisant surtout du cuivre, du nickel, du plomb et du zinc, s'est repliée d'environ 3 % en 1979, après une baisse d'environ 18 % en 1978. La poursuite des grèves amorcées en 1978 explique en grande partie cette diminution. La production de cuivre a régressé, alors que celle de nickel a légèrement augmenté grâce au renchérissement du métal. Les stocks de nickel, qui étaient extrêmement élevés en 1978, sont revenus à des niveaux plus normaux en 1979.

Les mines d'amiante ont progressé de plus de 9 % en 1979, après que ce secteur eut fait face à une grève en 1978. Les mines de potasse ont aussi augmenté leur production, le volume des exportations s'élevant de plus de 13 %. La pénurie de wagons-trémies qui avait limité les livraisons en 1978 n'a pas été aussi sévère en 1979.

La production des mines de charbon s'est haussée d'environ 6 % en 1979, en raison de l'accroissement de la demande de production d'énergie thermique; l'Ontario a utilisé le charbon de l'Ouest pour la première fois. Les exportations de charbon ont aussi augmenté légèrement.

Output of motor vehicle manufacturers fell in 1979. The major reason for the decrease was a sharp decline in the exports of both passenger cars (25%) and trucks (10%). Production in the motor vehicle parts industry also declined in 1979. There were a number of layoffs in the industry beginning in May and increasing in the last four months of the year.

Pulp and paper manufacturers' real output increased 6% in 1979. Wood pulp exports increased by almost 7% while domestic shipments decreased by about 2%. Production of fine papers increased substantially in 1979 as imports dropped 20%. Domestic shipments of newsprint increased about 4% in 1979; exports declined slightly. Newsprint was in short supply in Canada and the United States, due in part to strikes at United States' mills early in the year. Minor strikes in Canada occurred throughout the year and capacity utilization declined from 98% to 97% in 1979. Newsprint inventories in the United States reached a seven-year low in 1979.

Forestry production increased less than 4% in 1979. Increased pulpwood production of almost 7% accounted for most of the change. Logging output increased slightly in the year, reflecting the reduced demand for lumber and plywood in the construction industry and the slow rate of growth in furniture manufacturing.

Agricultural output dropped nearly 2% below its 1978 level, largely due to a decline in wheat and other grain production. Poor weather conditions delayed both spring seeding and fall harvesting operations, resulting in an estimated 19% decline in the wheat crop and a 6% decline in other grains. Livestock production was essentially unchanged in 1979, posting only a fractional increase over the previous year. Within livestock, the large increase in hog production was offset by a decline in cattle production. Poultry, vegetable and tobacco production was up over 1978, while marginal declines were registered in the output of potatoes and dairy products.

Among the industries producing mainly intermediate goods and services such as materials and fuel, production movements were mixed in 1979. Petroleum and coal products manufacturing industries rose 7% in 1979. This constituted the largest annual increase since 1973. Higher-than-average increases occurred in the output of diesel fuel, petrochemical feedstocks, and aviation turbo fuel. Gasoline, which accounts for the largest share of production, increased by almost 5%.

Output in the chemical and chemical products in-

La production des fabricants des véhicules automobiles a faibli en 1979, en raison surtout d'une forte baisse des exportations de voitures particulières (25 %) et de camions (10 %). La production de pièces pour véhicules automobiles a également fléchi. À compter de mai, les mises à pied ont été nombreuses; le phénomène s'est aggravé au cours des quatre derniers mois de l'année.

La production réelle des usines de pâtes et papiers a grimpé de 6 % en 1979. Les exportations de pâte de bois ont crû d'environ 7 %, tandis que les livraisons intérieures diminuaient d'environ 2 %. La production de papiers fins s'est considérablement accrue, en raison d'une baisse de 20 % des importations. Les livraisons intérieures de papier journal ont progressé d'environ 4 % en 1979, alors que les exportations fléchissaient légèrement. La rareté du papier journal au Canada et aux États-Unis observée en 1979 résulte en partie des grèves qui ont ralenti les usines des États-Unis au début de l'année. Des grèves mineures au Canada ont été réparties sur toute l'année et l'utilisation de la capacité de production est tombée de 98 % à 97 %. Les stocks de papier journal aux États-Unis ont atteint leur plus bas niveau depuis sept ans.

L'exploitation forestière a marqué une hausse un peu inférieure à 4 % en 1979, surtout à cause de l'augmentation de la production de bois à pâte (près de 7 %). L'abattage a faiblement progressé au cours de l'année, en raison d'une baisse de la demande de bois débité et de contre-plaqué dans l'industrie de la construction et du faible taux de croissance de l'industrie du meuble.

La production agricole a été inférieure de presque 2 % à celle de 1978, particulièrement à cause d'un fléchissement de la production de blé et d'autres céréales. Le mauvais temps a retardé l'ensemencement au printemps et la récolte d'automne, entraînant ainsi une baisse estimative de 19 % de la récolte de blé et de 6 % de celle d'autres céréales. La situation n'a guère changé en 1979 pour le bétail, qui affiche une augmentation négligeable par rapport à l'année précédente. La forte augmentation dans la production de porcins a été annulée par un fléchissement de la production de bovins. La volaille, les légumes et le tabac ont grimpé par rapport à 1978, tandis que les pommes de terre et les produits laitiers baissaient à peine.

Parmi les industries produisant surtout des biens et des services intermédiaires, par exemple des matériaux et des combustibles, les mouvements de production ont varié en 1979. La fabrication des produits du pétrole et du charbon a augmenté de 7 %. Il s'agit là de la plus forte hausse annuelle depuis 1973. Des progressions plus fortes que la moyenne ont été observées pour la production de carburant diesel, de charges d'alimentation pour l'industrie pétrochimique et de carburéacteur. L'essence, qui représente la plus grande part de la production, a augmenté de près de 5 %.

La production dans l'industrie chimique a grimpé de

dustries rose 4% — less than half the 1978 increase. All component industries increased with the exception of paint and varnish and soap and cleaning compounds. Manufacturers of industrial chemicals increased 7%, continuing the pattern of relatively strong growth since 1976. Manufacturers of synthetic resins and manufacturers of printing inks followed a similar pattern. In recent years a significant portion of the overall growth in the chemical industries has been export-oriented, given additions to capacity in petro-chemicals and fertilizers of world-scale plants.

The output of iron and steel mills increased more than 6% in 1979, about one-half the previous years' increase. Two factors restricting growth were an increase in time lost due to strikes and reported near-capacity operations. There were large increases in shipments to the railway rolling stock industry — about 25%, agricultural implements manufacturers — about 20%, and the metal stamping industry — more than 10%.

Smelting and refining output again decreased substantially in 1979. The earlier part of the year was affected by the nickel mining strike and later in the year there were strikes in aluminum smelting.

Freight transport advanced by 4%. Rail transport output increased about 2% in the year. Iron ore was one of the major contributors to the increase. Other increases were in the transportation of non-metallic mineral products and grains other than wheat. There were significant declines for automotive products, wood products and wheat. Truck transport increased by nearly 4%.

The 8% increase in pipeline transport was the strongest rate of growth since 1973, reflecting the 11% advance in crude petroleum and gas mining. Both industries had exhibited low production levels during the 1974 to 1978 period, and still remain below their peak levels established in 1973.

Gas distribution rose 3%. Increased deliveries to industrial customers were the strongest area, rising more than twice as fast as deliveries to residential and commercial customers. Both residential and industrial conversions to natural gas were reported to be at record levels but somewhat reduced consumption per customer stemmed any significant growth.

Electric power rose by nearly 7% in 1979; this is about equal to the average rate of increase over the

4 %, moins de la moitié de la hausse enregistrée en 1978. Toutes les industries de ce groupe ont connu des augmentations de production, sauf les fabricants de peintures et vernis et les fabricants de savon et de produits de nettoyage. La production des fabricants de produits chimiques industriels s'est accrue de 7 %, suivant le fort rythme de croissance enregistré depuis 1976. Les fabricants de résines synthétiques et les fabricants d'encre d'imprimerie ont connu une évolution semblable. Au cours des dernières années, une partie importante de la croissance globale dans l'industrie chimique est due aux exportations, qui ont permis de porter la capacité des usines de produits pétrochimiques et d'engrais à l'échelle internationale.

La production sidérurgique s'est élevée de plus de 6 % en 1979, soit environ la moitié de l'augmentation enregistrée l'année précédente. Les pertes de temps causées par les grèves et une activité tout juste inférieure à la capacité de production sont deux facteurs qui ont réduit la croissance. De fortes hausses ont été enregistrées pour les livraisons à l'industrie du matériel ferroviaire roulant (environ 25 %), aux fabricants de machines agricoles (environ 20 %) et à l'industrie de l'emboutissage des métaux (plus de 10 %).

La fonte et l'affinage ont encore perdu beaucoup de terrain en 1979. Au début de l'année, l'industrie a été frappée par une grève dans les mines de nickel et plus tard d'autres grèves sont venues perturber l'industrie de la fonte d'aluminium.

Le transport de marchandises a progressé de 4 % et le transport ferroviaire, d'environ 2 %. Le minerai de fer a joué un rôle important dans cet accroissement. Le transport des produits minéraux non métalliques et des céréales autres que le blé a également augmenté. Des baisses importantes ont été observées pour les produits de l'automobile, les produits du bois et le blé. Le transport par camion a grimpé de près de 4 %.

Le transport par pipeline a connu son plus fort taux de croissance (8 %) depuis 1973, par suite de la montée de 11 % dans l'exploitation des puits de pétrole brut et de gaz. Ces deux industries avaient en effet connu de faibles niveaux de production au cours de la période 1974 à 1978, et elles n'ont pas encore dépassé le sommet atteint en 1973.

La distribution de gaz s'est élevée de 3 %. Les livraisons aux clients industriels ont été particulièrement vigoureuses, affichant une croissance deux fois supérieure aux livraisons destinées aux clients résidentiels et commerciaux. La conversion au gaz naturel, tant dans le secteur résidentiel que dans l'industriel, a atteint des niveaux sans précédent; le fléchissement de la consommation par client a cependant endigué toute croissance appréciable.

L'énergie électrique s'est haussée de près de 7 % en 1979, soit à peu près le taux moyen de croissance pour la

1971 to 1979 period. Exports of electric power increased substantially but their contribution to total growth was small. Thermal generation increased at a faster rate than did hydro.

In telephone systems, long distance services increased about 10%, compared to about 6% for both business and residential local service. This is a continuation of the trend over the 1971 to 1978 period when long distance service increased about 50% more quickly than did local services. Another of the main sources of strength has been the expansion in data transmission facilities and services.

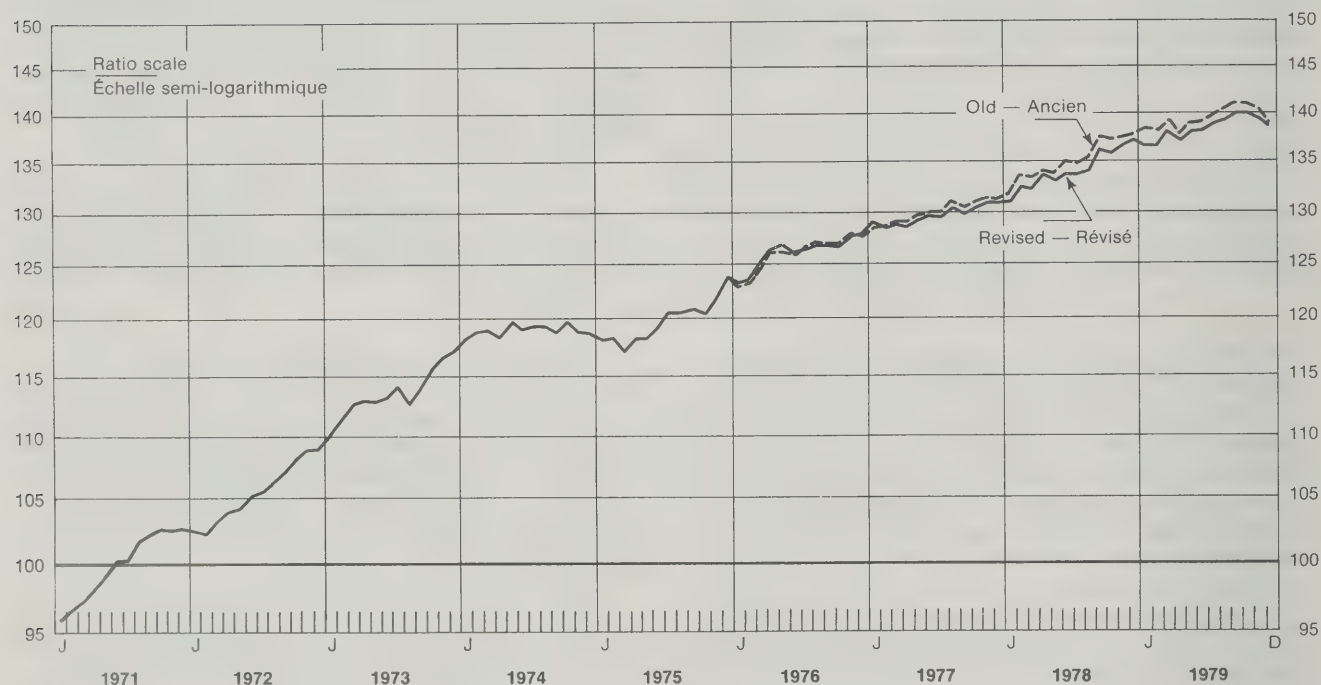

période 1971 à 1979. Les exportations d'énergie électrique ont augmenté considérablement, mais l'apport à la croissance totale a été faible. L'énergie thermique a crû plus rapidement que l'énergie hydraulique.

Pour les réseaux de téléphone, les services interurbains ont augmenté d'environ 10 %, contre environ 6 % pour les services résidentiels et commerciaux. Cela s'inscrit dans l'évolution observée pour la période 1971 à 1978, où la hausse des appels interurbains a dépassé d'à peu près 50 % celle des services locaux. Les installations et les services de transmission de données ont aussi contribué à la croissance.

Indices: 1971 = 100

1976	1977	1978	1979	1980	1981	Industrie	C.A.É.	No
120.5	113.2	121.8	126.3			Industrie de l'habillement	5:07	41
117.7	104.9	112.2	114.4			Industrie des vêtements pour hommes	243	42
125.4	122.0	131.3	135.4			Industrie des vêtements pour dames .	244	43
109.1	99.1	113.3	126.2			Industrie des vêtements pour enfants .	245	44
130.8	138.0	145.2	144.3			Industrie du bois	5:08	45
129.2	139.8	153.0	154.0			Scieries, ateliers de rabotage et usines de bardeaux.	251	46
121.0	131.0	135.7	127.0			Fabriques de placages et de contre-plaques.	252	47
149.6	145.6	141.6	144.0			Industrie des portes, châssis et autres bois ouvrés.	254	48
117.5	107.6	115.2	116.1			Industrie du meuble et des articles d'ameublement.	5:09	49
122.1	106.8					Industrie des meubles de maison.....	261	50
133.4	141.7					Industrie des meubles de bureau.....	264	51
113.1	114.2	125.2	133.0			Industrie du papier et activités connexes.	5:10	52
110.7	114.1	127.1	134.6			Usines de pâtes et papiers	271	53
121.4	117.0	125.0	134.0			Fabricants de boîtes en carton et de sacs en papier.	273	54
112.0	106.6	108.0	115.0			Transformations diverses du papier ..	274	55
128.3	130.6	137.9	143.7			Imprimerie, édition et activités connexes.	5:11	56
124.1	129.7	138.7	142.7			Imprimerie commerciale et industrie du clichage, de la composition et de la reliure commerciale.	286;287	57
132.2	131.4	137.2	144.6			Édition seulement et édition et impression.	288;289	58
107.7	114.9	122.8	123.9			Première transformation des métaux ...	5:12	59
116.2	120.0	135.3	144.2			Sidérurgie.....	291	60
104.8	96.6	113.1	124.0			Fabriques de tubes et tuyaux d'acier .	292	61
123.1	119.3	123.5	117.5			Fonderies de fer.....	294	62
86.7	106.2	100.9	89.9			Fonte et affinage	295	63
118.9	116.7	121.6	127.7			Fabrication de produits en métal (sauf machines et équipement de transport).	5:13	64
134.9	125.8	136.9	147.9			Industrie des produits métalliques d'architecture et d'ornement.	303	65
119.7	122.1	131.1	145.1			Industrie de l'emboutissage, du matriçage et du revêtement des métaux.	304	66
107.7	116.5	129.7	137.9			Industrie du fil métallique et de ses produits.	305	67
151.2	141.3	143.8	141.7			Fabricants de quincaillerie, d'outillage et de coutellerie.	306	68
120.0	122.1	122.0	127.1			Fabrication de produits métalliques divers.	309	69
138.9	141.3	157.4	181.6			Fabrication de machines (sauf électriques).	5:14	70
122.1	126.6	142.4	158.7			Fabricants de machines et d'équipement divers.	315	71
130.3	136.5	144.4	138.6			Fabrication d'équipement de transport..	5:15	72
93.2	104.5	127.3	152.8			Fabricants d'aéronefs et de pièces....	321	73
147.9	164.0	165.0	153.5			Fabricants de véhicules automobiles et de carrosseries de camions et remorques.	323;324	74
149.6	170.0					Fabricants de véhicules automobiles ..	323	75
137.9	127.4					Fabricants de carrosseries de camions et remorques.	324	76
133.8	137.7	148.7	128.7			Fabricants de pièces et accessoires d'automobiles.	325	77
120.6	88.9	116.1	146.4			Fabricants de matériel ferroviaire roulant.	326	78

A Note on CANSIM[®]

Data in this publication were retrieved from **CANSIM** (Canadian Socio-Economic Information Management System) and were manipulated and processed to create a photo-ready copy. All tabular data appearing in this publication, as well as many other data series, are available to the public from **CANSIM** via terminal, on computer printouts, or in machine readable form.

The pages 109 to 126 contain a list of Databank Numbers which can be used to access the series in **CANSIM**. For example, to retrieve Real Domestic Product, monthly, without seasonal adjustment, you must use "D 100215".

For further information write to **CANSIM**, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8, or call (613) 995-7406.

Note au sujet de CANSIM[®]

Les données figurant dans cette publication ont été extraites du **CANSIM** (Système canadien d'information socio-économique). Elles ont été traitées de façon à produire une copie destinée à la photocomposition. Toutes les données présentées dans cette publication et beaucoup d'autres données contenues dans le **CANSIM** peuvent être extraites par l'intermédiaire d'un terminal sous forme d'imprimés d'ordinateur ou sous une forme lisible par la machine.

Les pages 109 à 126 renferment une liste des numéros Databank qui peuvent être utilisés pour avoir accès aux séries du **CANSIM**. Ainsi, pour extraire le produit intérieur réel mensuel avant désaisonnalisation, il suffit d'utiliser "D 100215".

Pour plus de renseignements, écrivez à **CANSIM**, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0Z8, ou téléphones à (613) 995-7406.
